Acknowledgements

We received help and advice from many different people and organisations during the research which led to the writing of this report. We are particularly grateful to Jamila Gulyamova and Nilufar Begibaeva (British Council, Uzbekistan) for their wise counsel, good humour and patience in responding to our many requests.

We would like to thank warmly members of the British Council’s CPD Champions Panel for their articulate, helpful and unstinting support.

We also appreciated the openness and support shown by colleagues in the Ministry of Pre-School and Public Education, and by the management at Avloniy who carry first-line responsibility for CPD and INSETT for state school teachers.

We would also like to acknowledge, with thanks, the contribution to our understanding and thinking by:

- Members of the English Reform Steering Group
- The Director and team at the Regional English Language Office (RELO)
- The Director and team at the Research Traingle Institute (RTI), UEEP project
- The Director and team at the American Council for International Education (ACCELS)
- The PRESETT team at the University of World Languages, Tashkent
- The PRESETT team at Tashkent State Pedagogical University named after Nizami
- The PRESETT team at Akfa University
- English Teachers interviewed at Sergeli District School and at Tashkent city Training and Retraining Institute
- Trainers at the Tashkent city Training and Retraining Institute
- All the School Heads and English Teachers who took time to complete our CPD questionnaires
Acronyms used in this report

ACCELS  American Councils for International Education

CELT  Certificate in Teaching English as Foreign Language to Adults (now officially renamed as Certificate in Teaching English to Speakers of Other Languages)

CELT-S  Certificate in English Language Teaching – Secondary

CLIL  Content and Language Integrated Learning

CPD  Continuing Professional Development

DELTA  Diploma in Teaching English as Foreign Language to Adults (now officially renamed as Diploma in Teaching English to Speakers of Other Languages)

ECTs  Early Career Teachers

ELT  English Language Teaching

ERSG  English Reform Steering Group

ESN  English Speaking Nation

F2F  Face-to-face

IELTS  International English Language Testing System

INSETT  In-Service Teacher Training

LMS  Learning Management System

LPA  Language Promotion Agency

MOHSSE  Ministry of Higher and Specialised Secondary Education

MPSE  Ministry of Pre-School and School Education

OPEN  Online Professional English Network

OTC  Online Teacher Community

PRESETT  Pre-Service Teacher Training

RELO  Regional English Language Office

Terms of Reference

The Terms of Reference as stated in the British Council Request for Proposals issued in November 2022 are as follows:

‘For: Collaboration to map English teacher journey and develop new approaches to CPD for English teachers in state schools in Uzbekistan’

To work with the British Council in Uzbekistan and deliver the following outputs:

1. A report describing the current training and professional development available for prospective and existing state sector English language teachers in Uzbekistan and detailing their journey or pathways through the training and development available. This could include but is not limited to:
   a. National policy relating to teacher training and development, competence standards and performance assessment for English language teachers
   b. PRESETT processes
   c. Government prescribed INSETT, including motivations and rewards
   d. Ranges and types of Continuing Professional Development (CPD) available outside of government provision
   e. Views on and responses to current provision from ALL relevant stakeholders and beneficiaries (ministry officials, teachers, teacher educators school leaders, educational institutions and international partners).
   f. An appraisal of the quality of current provision to generate recommendations and areas for development (referencing and integrating outcomes from the University of Leicester research and other relevant reports available).
   g. An outline approach for the practical implementation of recommendations relating specifically to CPD

2. A presentation of the main findings of the report and the outline of the approach for Uzbekistan stakeholders and the Ministry of Pre-School and School Education of the Republic of Uzbekistan.

We outline below stakeholders and documents consulted, and also offer a concept of what CPD is and what a CPD journey involves. We then address the terms of reference above directly, with the exception of the above, which we address by embedding the views of relevant stakeholders within discussion of other terms of reference.
Executive Summary

i. The main outcome of our research and its findings is to recommend that CPD be understood holistically, as a career-long professional journey building on a mixture of school-based activity and training courses (see especially Sections 11 and 12 and the consolidated list of recommendations below in section 5 below).

ii. The terms of reference for this consultancy were understood and fully met (see Section 3 and sections 5 - 12 below).

iii. We approached the consultancy as a research task, but with open minds to allow our conclusions to be determined by our findings rather than by any preconceived ideas (see Section 6).

iv. Because the CPD landscape in Uzbekistan is fragmented and varied in terms of objectives and provision, we found it necessary to consult a wide range of stakeholders, each with their own understanding of CPD and its relationship with INSETT (see Section 7).

v. The documents we consulted were useful as background and as a way of triangulating our findings with those from our interviews, discussions and the questionnaire surveys. These documents are listed in Section 8.

vi. The main beneficiaries of a new approach to CPD will be schools and teachers. The findings from our questionnaire surveys of School Heads and Teachers of English are summarised in Section 10.

vii. In Section 11, we address the core terms of reference under five main headings: Policy, Pre-Service Teacher Education and Training, In-Service Teacher Education and Training, the Range of Available CPD Opportunities, and Quality Issues. It is in this section that the majority of our recommendations emerge.

viii. Recognising the gap that often exists between intentions and action, we have included some very clearly specified suggestions for the implementation of a new approach to CPD in Section 12.

ix. The appendices include documents, detailed survey results and informal records of selected meetings and focus group discussions.
Policy Recommendations

We recommend that:

**Recommendation 1**
The Ministry of Pre-School and School Education should formulate and adopt a national policy on Continuing Professional Development for state school teachers of any subject. This policy should ideally be based on a number of key principles, e.g.:

- every teacher has a right and an obligation to develop professionally throughout their career;
- there must be equality of access to CPD opportunities for teachers in rural as well as urban settings across the country;
- professional learning should be seen as a career-long process for teachers;
- all teachers need to keep up with changes in curriculum, teaching materials, and assessment practices;
- all schools, as learning organisations, must ensure that conditions conducive to CPD are created and maintained;
- individual CPD is inextricably linked to the development of every school as an institution, and hence to the quality of education it offers to learners;

**Recommendation 2**
Schools and communities of practice should be recognised as hubs of CPD activity.

**Recommendation 3**
CPD provision should consist of a mix of needs-based INSETT and follow-up CPD activity in these hubs.

**Recommendation 4**
Heads should be provided with training and guidance in how to create the necessary conditions for professional development in schools.
Recommendation 5
Teachers and Heads should be supported with training and guidance on the principles and practice of CPD as an ongoing learning process.

Recommendation 6
Consideration should be given to the use of CPD portfolios as a means of documenting each teacher’s CPD activity and that this should be reviewed annually in an appraisal meeting with the school Head or another senior colleague.

Recommendation 7
Each school should develop its own institutional CPD policy and practices, based on the national policy but also addressing the needs and priorities identified regularly by teachers and the school Head.

Recommendation 8
The document detailing 17 ways of earning CPD credit points should be reviewed and revised to include recognition only for CPD activities and processes that demonstrably contribute to improvement in teaching. The updated list should include a mixture of courses and participation in teacher-led initiatives such as Telegram discussion groups and local teacher clubs.

Recommendation 9
CPD provision for state schools should be linked to the same kinds of teacher competencies and standards as are prescribed for Presidential schools.

PRESETT Recommendations

We recommend that:

Recommendation 1
The PRESETT curriculum for all providers be re-examined and modified to accommodate a CPD dimension, and to ensure that student teachers receive the support they need as they make this journey over a four-year period of study. Examples of CPD-oriented activity that can be built into every PRESETT programme include:

- materials design
- peer observation and feedback during teaching practice
- introduction to professional reading through article discussion
- classroom-based research
- keeping a reflective journal
- possibly assessment by portfolio built up over each academic year

www.britishcouncil.org
Recommendation 2
MPSE liaise with MOHSSE to ensure that the national PRESETT curriculum is standardised across all providing institutions so that new English teachers’ professional journey starts off on an equal footing and with a comparable state of readiness to teach children in schools.

Recommendation 3
PRESETT exit language exams be carefully calibrated to CEFR level C1 so that students do not have to face the expense of paying for an international proficiency exam.

Recommendation 4
All PRESETT-providing institutions should keep records of graduates who progress into teaching posts at state and private schools so that the Ministry can begin to assess the impact of PRESETT studies on the quality of English teaching in both state and private sectors.

Recommendation 5
PRESETT institutions, Avloniy and Training/Retraining Institutes work closely together to ensure a smooth transition from a teacher’s pre-service experience to full practising teacher status.

Government prescribed INSETT Recommendations

We recommend that:

Recommendation 1
MPSE, in partnership with Avloniy and with all training providers, should consider the findings of this report as a basis for working towards coherence in INSETT policy and provision within an overall view of English teachers’ evolving needs and priorities. This partnership should be based on an understanding of the place of both training courses and school-based follow-up activity as significant ingredients of CPD. This understanding would require updating of the Avloniy INSETT syllabus and Regional Training and Retraining Institute course design.

Recommendation 2
Avloniy should continue its work on clarifying the sub-components of its teacher competencies.

Recommendation 3
The training offered by Training/Retraining Institutes under Avloniy be subjected to a thorough review to ensure that it is fit for purpose in terms of meeting teachers’ needs.

Recommendation 4
INSETT courses should be taught in ways that develop teachers’ professional autonomy and should therefore go beyond simple transmission of knowledge towards a view of training as potentially transformational.

**Donor-funded CPD Recommendation**

We recommend that:

**Recommendation 1**
UK and US donors continue and build on their current level of cooperation probably through the work of the ERSG. This cooperation should certainly include discussion and review of exit strategies. (Within the limited scope of this report, we have not been able to be more specific about the direction that this cooperation might take in future. Nonetheless the recommendation stands).

**Quality Recommendations**

**Quality dimension 1: The balance between CPD focus as professional accountability and CPD as professional learning**

We recommend that

**Recommendation 1**
MPSE consider the extent to which the Presidential School standards, attitude to and provision for CPD is transferable to teachers in general government state schools.

**Quality dimension 2: CPD coherence**

We recommend that

**Recommendation 1**
MPSE consider articulating a CPD strategy based on stated principles to underpin a national CPD policy

**Recommendation 2**
MPSE address disconnects in CPD provision as outlined on pp 54-55 of this report

**Quality dimension 3: CPD sustainability**

We recommend that
Recommendation 1
Online learning should continue to form part of CPD provision for teachers of English.

Recommendation 2
MPSE investigate the feasibility of developing a light touch monitoring and evaluation system based on the features laid out pp 57-58 of this report, using the Presidential school standards as a starting point for action.

Recommendation 3
MPSE build in a costed monitoring and evaluation budget within their overall CPD budget, so that a concern for monitoring and evaluation is integrated into both planning and action.

Recommendation 4
CPD provision in general should be needs-based and should provide for follow-up support at school level in order to strengthen teacher independence, critical thinking, and impact in the classroom.

Recommendation 5
MPSE investigate options for supporting early career teachers in their teaching via options such as mentoring or a specialised course.

Recommendation 6
MPSE create standards for teacher educators, so that there are clear criteria for the appointment of trainers on all approved INSETT programmes.

Recommendation 7
MPSE establish certificated trainer development courses so that all trainers are qualified for their role.

Recommendation 8
MPSE establish trainer competencies to support ongoing teacher educator professional development.

Recommendation 9
MPSE support Avloniy with INSETT course design for teachers of English through partnership with an overseas institution. British Council and ACCELS could advise on possible partners if MPSE wished to investigate the feasibility of partnership with a UK or US institution.
Recommendations for Implementation

We recommend that:

**Recommendation 1**
MPSE work urgently on building sustainable capacity and awareness of CPD across the education system, drawing on suggestions in Section (a) above.

**Recommendation 2**
all key providers and stakeholders work, within the framework and remit of the English Reform Steering Group, towards a shared vision of CPD in order to bridge the gap between policy and practice.

**Recommendation 3**
MPSE require each school to appoint a ‘CPD Champion’ to be responsible for all aspects of school-based CPD.

**Recommendation 4**
The British Council continue to convene the CPD Champions Panel, members of which are well-placed to advise MPSE on CPD and to help to drive the initiative forward

**Recommendation 5**
MPSE consider trialling portfolios, as a concrete step towards a wider understanding of CPD, for a one- or two-year period and, if they are successful, implementing them at scale and possibly for teachers of all subjects across the school curriculum.
Our approach to this consultancy

We approached the Terms of Reference in the following ways:

i. We gathered and read all available literature and documentation relating to CPD for all State Sector school teachers in Uzbekistan. For a list of these items, see section 6.

ii. With the help of colleagues in the British Council, we identified all the main stakeholders in CPD/INSETT with a view to consulting them during our investigation. These stakeholders and the ways in which we decided to consult each of them are included in Section 5 below.

iii. Limits on funding meant that fieldwork in Uzbekistan would necessarily be time-limited and so we used both questionnaires and online interviews with stakeholders as our main investigative tools. For some stakeholders, we used more than one research method in order to obtain a more balanced and triangulated perspective.

iv. In the end we were able to plan for two short visits to Tashkent, one by Simon Smith from 14 – 17 February, and then a follow-up visit by Jacqueline Douglas on 6 – 7 March. These visits included more interviews with stakeholders (some of them following up on online consultations) and also focus group discussions with key decision makers (the English Reform Steering Group) and with a newly constituted CPD ‘Champions Panel’ who we recommend should play a key role in advising on CPD initiatives after this report has been read and discussed. See Section 11 for more about a possible future role for the Champions Panel.

The main objectives of our research were:

i. to address and meet the Terms of Reference as comprehensively as possible
ii. to piece together an overview of CPD opportunities currently available to teachers of English;
iii. to identify gaps in the current provision as well as teachers’ stated needs and wants;
iv. to gauge providers’ and participants’ understanding of CPD and how it relates to training;
v. to provide a sound basis for future planning and recommendations in the area of CPD for state school English teachers in Uzbekistan, with particular focus on a continuous process or journey which might be feasible and attractive to teachers.
# Stakeholders consulted

This table offers an overview of the key stakeholders, the mode of consultation and the date(s) or periods involved:

</tbody>
</table>
Access to many of these documents was facilitated by the British Council but also by some of the key stakeholders who readily made them available to us. In other cases, we were able to access them online. Most of them were extremely helpful to us in our efforts to build a comprehensive view of the current CPD provision for state school teachers.

**Documents searched for but not found:** National teacher educator standards document
Conceptualising Continuing Professional Development (CPD)

In order to formulate a policy, at national or institutional level, there needs to be a shared understanding of what CPD means for all stakeholders, both as a concept and in practice. The evidence from almost all our research for this report is that this shared understanding does not exist at present and what follows is an attempt to conceptualise it and to consider the practical implications.

A process, not an event.
The word ‘continuing’ suggests that development is not timebound or event-dependent. It also implies some form of flow and progression in a teacher’s career. Very few people teach in exactly the same way throughout a career. Events such as INSETT courses may or may not contribute significantly to any teacher’s learning. In fact, one-off INSETT courses have been shown to be remarkably inefficient in changing teachers’ thinking or practice, mainly because they are too short to allow depth of engagement with teachers’ beliefs and personal theories. See, for example, Lamb (1995), Lange (2013), and Waters and Vilches (2000). However, a reality check on the notion of ‘continuing’ is needed here. Many teachers go through stages in their careers which are development-intensive, perhaps during their first year of teaching for example. There will be other stages when ordinary human priorities take over, for example when people get married, have children, have health problems or take on responsibilities beyond teaching. This happens on any kind of journey, which is why a ‘journey’ is such an appropriate metaphor for CPD.

The meaning of ‘professional’ for a teacher
In any modern profession, trends and knowledge never stand still. Innovation is a part of every professional’s life. Keeping up with changes in teaching methods, in teaching materials, technology and even in language and terminology is a constant challenge. It is thus a professional obligation for a teacher of any subject and at any level to stay up to date, whether by attending courses, by professional reading, belonging to a teacher’s group, observing classes and being observed, or some other means. A good professional is open to new ideas and is able to critically evaluate them in the light of their experience and the realities of their context.
The concept of ‘development’

The essence of development as a notion is that it is autonomous and voluntary. Nobody can be forced to develop. In a CPD context, it is an intransitive notion. However, in a healthy and progressive climate, whether nationally or at institutional level, development is often prioritised, incentivised and recognised. Teachers, like other professionals, learn both consciously and unconsciously from experience, and they modify their practice to accommodate this learning.

A CPD Journey

Seen in these terms, a teacher’s professional journey may take different routes from beginning to end. Here is a fictional example over a 20/25-year period:
Age 17/18

- enrolls on a PRESETT programme
- thinking of a possible career in teaching

Age 19 - 21

- as a trainee teacher, receives help from tutors with teaching and teaching-related activity
- keeps a journal with reflection during teaching practice
- wide reading around teaching and learning

Age 21

- graduates from PRESETT programme
- first teaching post in a state school with guidance from a senior teacher as mentor; keeps a teaching portfolio to record CPD activity

Age 23-25

- growing confidence as a teacher
- attends a course about how to use the new textbooks
- marries and has first child; takes maternity leave

Age 26 - 30

- joins a local teacher’s club
- now experienced enough to mentor a new teacher

Age 30 - 35

- applies successfully for a scholarship to attend a short course in the UK
- embarks on a part-time ELT MA programme allowing study online; graduates after three years of study

Later career

- attends mandatory INSETT courses
- writes an article for teachers' magazine
- coordinates CPD activity in her school; is respected and consulted by younger teachers
What this example illustrates is the potential for a teacher to develop and by doing so to make a contribution to the development of their school and the profession more widely. Each teacher’s path will be different and their development may depend on support at different stages as well as on normal life issues.

Survey Findings and Analysis: Head Teachers and Teachers of English

Introduction
We decided to use questionnaires to survey the views of Heads and Teachers of English on CPD, mainly because of the high numbers involved in both groups. The questionnaires were put on the Avloniy Telegram platform in January with a five-day window for responses.

We surveyed Heads because in our experience, CPD for ELT involves an ecosystem of school, local, political, cultural, social and financial elements which go beyond ELT. We see Heads as key to supporting or blocking CPD opportunities for teachers. This is also supported by a number of CPD studies which point to the need for effective leadership to support teacher professional learning at school level. Timperley et al, for example, in their best evidence synthesis, though often writing about contexts different from in Uzbekistan, find that:

*Effective leaders actively supported the professional learning of their staff and, at times, participated themselves.* (2007: p111)

We received 219 completed responses from Heads. We understand that this represents approximately 2% of Heads nationwide.

We received 2,508 completed teacher returns in all, amounting to 17.08% of the population of teachers of English in Uzbekistan.

Limitations of our survey
For reasons of time, we prioritised practicality in our investigation. This undoubtedly affected the reliability and validity of our findings. A number of factors that may also have affected reliability and validity include:

- limited time to pilot the questionnaires, which would have eliminated some ambiguities
- our reliance on machine translation of the responses
- our lack of familiarity with school contexts which made it difficult to interpret some responses
- lack of time for a more detailed analysis: we feel that more detailed scrutiny by an Uzbek researcher could reveal useful and more robust findings for the future.

Later face-to-face meetings with two groups of teachers enabled us to follow up on questionnaire findings and to clear up some emerging issues.

Findings from questionnaire for Heads (n = 219)
We are aware that Heads carry responsibility for CPD for all teachers in their schools and that this was certainly reflected in some of their responses.

For a question by question breakdown of responses please see Appendix 10

- 167 responses were from Heads in rural schools, and 38 were from Heads of urban schools. (Q 4)
- 171 respondents reported that English teachers were actively engaged in some form of CPD activity, mostly either attending training or language improvement courses. (Q 7)
- 89 respondents reported that they maintain a methodology day (usually Friday) for English teachers but 105 said they did not. (Qs 8/9)
- 77 Heads reported that there were different facilities to support CPD for English teachers, including: ICT access, seminars and courses, opportunities for teachers to work on themselves. (Q 10)
- Only 32 Heads stated that they had funds available to support CPD. 137 stated they did not have funds; some teachers (no numbers available) received a book grant of a million som to buy the new textbook. (Q 11)
- 77 respondents reported that they are expected to observe and analyse English lessons. Many see their role as evaluative, focussing on teacher performance but there was also evidence of a more supportive view of lesson observation and of the link between teacher development and school development, and also of a more learning-centred approach to observation, focussing on the students as much as on the teacher (Q 12)

Summary of some particular issues from rural/village schools
The vast majority of respondents were from rural settings (see responses to Q4). There was little overall consensus in responses but these issues did stand out:

- need for more training opportunities, face-to-face as well as online
- need for more direct contact with native speakers, international agencies etc
- need for more properly qualified English teachers (i.e. with B2 or C1 level)
- need for more resources (especially IT).

Some general conclusions from the Head Teacher survey

- Many head teachers from our sample see CPD in terms either of training or gaining language proficiency certificates.
- There is relatively little evidence that Heads see CPD as a shared enterprise. It seems to be seen as an individual responsibility (‘they should work on themselves’) or as being concerned with certificates and salary bonuses.
• There is relatively little sign of CPD activity at school level.
• It seems that the idea of Friday as a methodology day has been or is being phased out.
• Many respondents are clearly aware of the need for teachers to improve their English.
• There is very little mention of the English Speaking Nation (ESN) initiative in the responses, which is at odds with our teacher data. We are not sure of the reasons for this.
• Heads seem to recognise the advantages of study abroad and contact with native speakers for language teachers.
• Classroom observation by head teachers is seen largely as an opportunity to judge teacher performance, sometimes with stated criteria but more often without.
Findings from questionnaire for Teachers of English (n = 2,508)

Please see Appendix 11 for a fuller breakdown and discussion of findings.

Years of teaching experience, grades taught, qualifications
Just over 1400 of the respondents have been teaching English for 10 years or fewer - roughly 57.5% of the sample. Just over 1000 (nearly 43%) have been teaching English for 11 years or more. 11.19% of this more experienced group have been teaching English for more than 20 years (Appendix Q1).

Q2 reveals an even spread of teachers responsible for the range of classes from Grades 1-11. The lowest percentage here is just over 40% of respondents teaching Grade 2, the highest just over 51% for Grade 6.

The overwhelming majority of teachers gained their teaching qualification at a university or pedagogical institute (Q4).

Experience of and feedback on INSETT
Just under half of our sample (46%) have attended 20 days or more of in-service training in the last 5 years (Q5). Of the 54% or so of the sample who had attended fewer than 20 days, 21% (520 teachers) have attended 5 days or fewer. This figure may include some teachers who have been teaching for less than 5 years.

Avloniy, the British Council and the American Council or USAID account for the majority of training providers teachers have had contact with (Q6), though a small number of teachers have also attended training offered by their school, a university or another provider.

Around 90% of teachers found training easy or fairly easy to attend (Q7). Around 31% of teachers work in schools which do have a Methodology Day, with 69% reporting no Methodology Day (Q11).

With regard to which training courses teachers perceived as most useful and why (Q8), teachers mention courses run under the umbrella of USAID, ACCELS, RTI and RELO 358 times. This breaks down as ESN courses 158 times, TESOL courses 88 times, ‘American courses’ 77 times, and USAID courses 55 times. Teachers mention British Council courses 204 times, and Avloniy courses 125 times. Courses run by a University receive 42 mentions, and TKT courses 28.

While a variety of reasons are given for the usefulness of courses, the most striking pattern is that 439 teachers said that they found it useful to learn more about methods or methodology.

What teachers do to develop teaching skills or knowledge
In response to an open question (Q9) on what teachers do beyond attending courses in order to keep teaching skills and/or knowledge up to date, the following are the most frequent responses

a) Attending a course 502
b) I work on myself 354
c) Watching online lessons 285
d) Reading 268
e) Using the internet 170
f) Watching or using video generally 165
g) Taking a test or exam 138
h) Using other social media channels 74

Attending courses appears as the most popular way to work on professional learning. 169 of the references in a) mention online courses.

What teachers do to improve their own English

Q10 asks teachers what they do to improve their own English. Teachers were able to choose multiple options here. 43% of teachers attend a course, 40% read in English, 61% study at home, 49% listen to podcasts or radio, while 43% watch films in English.

Teachers’ views on their own development needs

In answer to Q12, which asks about teacher’s main training or development needs, about 44% expressed a wish to improve their own English, 36% prioritised teaching skills, and 18% a desire to learn how to use the new textbooks for English.

Teachers’ suggestions on improving professional development ideas for teachers.

The final question (Q13) asks teachers for suggestions on improving professional development ideas for teachers. There is some rich data here which merit further study and analysis. Amongst the most frequent patterns in responses to emerge are:

a) The value teachers place on updating language knowledge and skills by study abroad and/or contact with people from English speaking countries (659 mentions)
b) The importance attached to attending training courses (530 mentions)
c) A desire for financial assistance with CPD (54 mentions)
d) An interest in clubs and exchanges of knowledge and/or skills (32 mentions)

Category b) suggests that, as with Qs 9 and 10, teachers are interested in attending courses as a way of continuing to learn. However, in category c) some teachers said that the cost of attending a C1 course was too high, and in some cases unaffordable. A few responses said that course fees should be refunded to candidates who gain a C1 pass. Others say simply that they would like a salary increase. Category d) is a small but interesting one. It suggests that some teachers are willing and able to look beyond courses
as a source of professional learning. The category includes suggestions to organise clubs for speaking and discussion, and an interest in exchanging ideas and experiences with other teachers.

Summary of findings

Though a number of health warnings clearly apply to the nature and extent of both our findings and our interpretation of them, we think a number of patterns do emerge clearly.

- The teacher sample see attending courses as a viable way to improve both language and pedagogical skills. (responses to Qs 9, 10)
- British Council and Avloniy courses have received positive feedback. (Q8)
- The teacher sample see both language and pedagogical development as significant ingredients in their professional learning. (Qs 9, 12)
- They are interested in learning more about teaching methods and ideas. (Q8)
- Teachers value contact with speakers of English from outside Uzbekistan as a way of helping their own language learning. (Q13)
- Teachers are willing to invest time and effort into their professional learning. (Q9, 10, 13)
- A small minority of teachers are interested in professional learning via clubs and exchanges. (Q13)

Findings by Region

Halfway through Appendix 11 we present a set of findings broken down into 5 main geographical areas based on the 14 regions of Uzbekistan. We took a random sample of 20 respondents from each main area. Our purpose in doing this was to detect any possible differences in perceptions and practices of CPD from one area to another. However, we were unable to detect any significant differences in this micro-analysis and in most aspects it confirmed the findings summarised above. Please see the appendix for detailed data by area, including statistics and a selection of responses to many of the questions.

Summary of findings from both questionnaires
• The main view of CPD to emerge is that it is event-oriented, with a focus on training provided externally, rather than process-oriented and more reliant on individual initiative.
• There seems to be little evidence of seeing CPD as a journey in either set of responses.
• Responses from Heads seem to see CPD largely as a solo enterprise rather than something they would instigate or support. However, teachers’ responses show that they do also value courses and qualifications.
• There is a clear interest from teachers, too, in professional learning through contact with native speakers of English and with other teachers of English.

Commentary

For a more process-oriented view of CPD to emerge and prosper, there would need to be a significant culture change in schools, allowing teachers to take more direct responsibility for their own CPD, and requiring Heads to understand their role as supporters and facilitators of their teachers’ professional journey. This change would need to be taken forward slowly, and with due regard for Heads’ quality assurance role in their own schools and for teachers’ need, expressed clearly in our survey, for the qualifications which will enhance their professional status and their personal confidence. We also have some data from our second F2F interview with teachers (Appendix 16) which suggests that some teachers see CPD as someone else’s responsibility rather than their own. This data also indicates that the idea of CPD as a journey is an alien one for these teachers.

In sum, these findings suggest that Heads would need leadership training (e.g. on how to foster different kinds of professional learning in their schools, how to observe and discuss English lessons) and teachers a different kind of INSETT (e.g. on how to set up a teachers’ club) in order to set this kind of change in motion. They also indicate that some teachers would take time to acclimatise to the notion of choice, agency and journey in CPD.

Given the value both Heads and teachers attach to courses which focus on methods and techniques, and given the focus of this consultancy on CPD as a journey, we recommend that courses should continue to form part of CPD provision. We further recommend that schools and communities of practice could be useful vehicles both for following-up on course content and for providing teachers with a chance to explore their own professional priorities.

These recommendations tally also with the findings of Timperley et al (2007 p xxx, preface), in their best evidence synthesis of CPD for all subject teachers in New Zealand. They found that a mix of communities of practice and outside support worked well in supporting professional learning.

*Effective professional communities were characterised by two conditions. Firstly,*
participants were supported to process new understandings and their implications for teaching. Sometimes this involved challenging problematic beliefs and testing the efficacy of competing ideas. Expertise external to the group brought new perspectives and assisted in challenging prevailing dialogical norms.

Secondly, the focus was on analysing the impact of teaching on student learning. This focus was assisted by grounding discussions in artefacts representing student learning.

New Zealand is clearly a very different context to Uzbekistan, However, we think that a mix of outside support from courses targeted at teacher needs followed up via discussion and sharing in communities of practice is worth serious consideration as a future model of CPD in Uzbekistan. This is because it balances the course dimension, which teachers like and are familiar with, with a sharing and discussion dimension which emphasises the idea of ongoing learning. Schools can therefore play an important role as centres of professional learning. In some rural areas, where numbers of teachers in a school are small, there are likely to be benefits in establishing wider communities of practice, possibly online.

We make recommendations on a number of issues arising from our survey analysis in the next section, as all our recommendations arising from scrutiny of survey data relate to CPD policy.
Addressing the core terms of reference

a. National policy relating to teacher training and development, competence standards and performance assessment for English language teachers

Summary
The government decree of 19 January 2022 (Appendix 1) sets out a clear commitment to promoting and funding foreign language study in Uzbekistan. This suggests a clear political will to improve the status and standard of foreign language learning in the country.

However, we have been unable to find either a national policy relating to teacher training and development or a national policy relating to CPD for all state school teachers. Further discussion in this section is based on the premise that there is no clear published national CPD policy.

We have seen limited evidence of competency standards and performance standards for teachers of English. In practice, CPD provision seems to consist largely of INSETT courses, with the focus more on learning in one-off events than on learning as a continuing process. Our investigation has therefore yielded no evidence of CPD as a journey for teachers in general state schools either in policy or in implementation. However, there does appear to be an understanding of CPD as a journey in one strand of the standards for teachers in Presidential schools.

Absence of national CPD policy
We have been unable to find a clear national CPD policy which sets out key principles of what CPD is and why it is important for teachers, schools, children, and parents.

CPD provision in practice is largely INSETT-driven
CPD provision has recently moved from the old system of course attendance once every 5 years to a new system in which teachers are expected to engage in lifelong learning. Options here currently consist of

i. F2F courses run chiefly by Training and Retraining Institutes
ii. Online courses on Avloniy’s LMS platform.
iii. Private sector course providers
iv. University course providers
Thus, the visible professional learning activity teachers are engaged in involves them taking courses. A number of teachers are also enrolled on international language proficiency or ELT qualification courses. Pass grades lead to a salary bonus of 50% for 2 years.

Clearly, courses can play a significant role in professional learning. However, this view of CPD is a questionable one, as it is based on attendance at one-off events which are generally neither interlinked nor responsive to teachers’ developmental needs. The current course events are not informed by an overarching set of principles. They may in themselves be useful, but do not necessarily lead to a sense of progression in professional learning. Course-led CPD in its current form in Uzbekistan therefore does not represent a coherent approach to CPD, and does not see CPD as a journey.

As argued in the previous section, we think that a policy informed by a recognition that professional learning involves processes would be a useful starting point for CPD implementation. Courses would still have a part to play in professional learning, but these should be accompanied by a set of options which would include process-based options such as sharing experiences and ideas at school or local level as suggested by some teacher questionnaire responses (Appendix 11).

We suggest that CPD implementation that could also usefully consider other process-oriented options such as mentoring, reflection logs, social networking and teacher development groups. See Bolitho and Padwad 2012 and Champions Panel suggestions in Appendix 14.

Consequences for implementation of the current absence of CPD policy

i. CPD may not necessarily be embedded in Head, school or teacher thinking

If there is no CPD policy, we think that this makes CPD strategy, i.e. the implementation of CPD principles laid out in a policy document, problematic. This is because in the absence of stated principles for CPD in the country, CPD may not necessarily be at the forefront of the thinking of Heads, teachers, schools or INSETT providers. One possible effect of this is that some Heads, teachers and schools may not prioritise professional learning as a key ingredient in teaching or in school life.

We think that if there were a national CPD policy, each school could develop its own aligned institutional CPD policy and practices. If schools and communities of practice were focal point for CPD activity, as we have advocated above, such school policy and practices could focus on priorities identified by teachers and the school Head.

ii. Haphazard CPD provision and engagement

The absence of a national CPD policy also poses problems for INSETT providers, as it puts them in a difficult position with regard to identifying or targeting needs, prioritising these, and then designing suitable teacher education courses and materials.
A further consequence is that those responsible for CPD at school, local or level may have different understandings of what CPD is. It is arguable that there may be some benefit in divergent views, as they can allow in some cases for tailored CPD initiatives at school or local level. For example, a school may encourage teachers to work on learning projects which are useful to them, and to share findings with colleagues.

However, in the absence of policy guidelines it is also possible that schools or local authorities will pursue notions of CPD which are less useful than they might be. An example here would be a school which requires all teachers to attend a course on preparing learners for Olympiads. While some teachers may learn from this preparation work, others may have gained far more for improving their teaching by finding out about classroom management via observation and feedback, by developing and sharing materials, or by improving their English.

### iii. Different priorities and understandings between decision makers and teachers

A further drawback of a CPD policy vacuum is that those responsible for CPD at national level may have a different understanding of it from classroom teachers or decision-makers at school level. We saw a clear example of this during our investigation, when we asked the Champions Panel to discuss the 17 CPD options published by Avloniy (see Appendix 14 for both the CPD options and Panel feedback). The Panel felt that the CPD options were in the main unsuitable as they

- 8 out of 17 options do not involve continuity
- do not acknowledge sufficiently school, local and regional CPD initiatives (no options seem to do this)
- contain options which do not necessarily improve classroom teaching (15 out of 17 options are not clearly linked to improved classroom teaching)
- stress individual over collaborative professional learning (12 out of 17 options)
- are, in part, elitist, as some options provide credits to a very small number of teachers
- favour teachers in cities over those in remote areas
- are at times more academic than pedagogical in nature
- omit key CPD options such as mentorship
- are weighted questionably at times in terms of credit points

We saw a further example of different understanding between those responsible for CPD at national level and classroom teachers in a strand of responses to the teacher questionnaire (Appendix 11). The Avloniy CPD options mention language and pedagogy courses as routes to CPD. There was good evidence that in general teachers appreciated well-run courses. However a considerable number of teachers also engage in professional development activities which are not mentioned in the 17 CPD activities document. Examples include large numbers of teachers who report that they learn through self-study, for example by analysing online videos, and websites. There were also a number of teachers who like to learn from professional reading. Some teachers also value sharing experiences formally informally via Telegram or
iv. Problems in monitoring and evaluation

The absence of a CPD policy also leads to significant problems in monitoring and evaluating the effectiveness of any type of CPD, as there are no yardsticks against which policymakers at national or regional level can gauge either professional learning or account for returns on investment. We discuss monitoring and evaluation in more detail in section 10.

v. Competency standards and performance assessment

- Absence of CPD in teacher standards.

The Teacher Standards of 2013 (Appendix 2) focus on the skills and knowledge teachers need in their job. A significant thrust of the standards seems to us to be about a teacher’s knowledge of legal requirements, ability to carry out in-school duties, and understanding various psychological aspects of child development.

We are unable to see any policy or guidance on CPD in this document. However, we have read this document via machine translation, and it is possible that the standards do mention the nature and role of CPD for teachers.

- Absence of performance assessment in teacher standards

We are unable to see clear evidence of performance assessment in the teacher standards, though there are references throughout the document to the skill level required to carry out specific roles in school. All roles require either skill level 5 or 6. We are not sure yet what these skill levels consist of.

- Unclear role of competencies on Avloniy course platform

The Avloniy course platform list we received contains 7 transversal teacher competencies (Appendix 4). Our understanding is that teachers need to self-assess their competencies before and after taking a course. We understand that the competencies are work in progress (Appendix 13) but find them problematic in their current guise for 4 main reasons.

Firstly, we are unable to see the connection between the competencies and the teacher standards. Secondly, the competencies are not currently broken down into constituent components. This makes them unclear and so minimally useful to teachers and to Avloniy, we feel. We understand that Avloniy are currently working on this. Thirdly, we note that the core INSETT syllabus Avloniy has designed (Appendix 5) contains 8, rather than 7 competencies. We wonder if the competencies have been updated recently. This is because Prepare, the coursebook in use in Grades 5-11, has been designed around the Cambridge Life Competencies (See https://www.cambridge.org/elt/blog/wp-content/uploads/2018/04/Life-Competencies-
These competencies are Creativity, Critical thinking & Problem-solving, Learning to learn, Collaboration, Emotional development, and Social responsibilities. The Avloniy choice of Life Skills within teacher competencies therefore suggests to us a view of Life Skills which is out of alignment with the Life Skills framework which teachers of English are expected to understand and teach in government secondary schools.

Clearly, decisions on Life Skills need to be applicable across the curriculum, and any decision is likely to be delicate and involve compromises. However, on balance, we think that the Life Skills provision on the Avloniy LMS platform could usefully be elaborated on, so that it forms a clear basis for action for teacher self-assessment and for CPD providers.
vi. The idea of CPD as a journey is more evident in Presidential schools

By contrast, the professional standards document for Presidential schools (Appendix 3) does include performance assessment criteria. They also pay specific attention to CPD though inclusion of Self-development and professional growth as one of the 7 professional skills it expects teachers to develop. Teachers are assessed on the extent to which their work evidences these 7 skills.

The 4 main ingredients of self-development and professional growth are:

- engaging in reflection
- attending courses
- observing, discussing and documenting discussion of 30 hours of lessons a year
- developing research skills via professional reading and sharing findings with colleagues.

It is noteworthy that Self-development and professional growth receives the same weighting in assessment as all other 6 elements of professional expertise.

These aspects of Presidential school standards for teachers of English suggest a clear view of the nature and purpose of CPD. They contain ingredients which suggest that professional learning involves a process of reflection, discussion, sharing, and purposeful collection of evidence from lesson observation and investigating one's own classroom. These features, seen as a whole, build a picture of CPD as a process which can involve both course and non-course based elements, a process which sees value in both social and individual modes of learning. The first, third and fourth CPD ingredients could also be included in a teacher portfolio, a purposeful collection of evidence about learning over time (see, for example, Attinello et al 2006).

The link with process, in particular, does suggest the idea of CPD as a journey. We think that the introduction of teacher portfolios could be a feasible means of helping teachers to begin to see CPD as a journey via inclusion and discussion with colleagues F2F or online of artefacts related to teaching and student learning. Such artefacts might include any self-designed or adapted materials, samples of learner work, a Telegram discussion thread, critical incidents, or teaching questions (e.g. How can I help a child with dyslexia?). The content of this portfolio could serve as a vehicle for annual discussion with the Head teacher each year in a review meeting. Head and teacher would review the teacher’s professional learning over the school year, and agree together a focus for professional learning over the coming school year. We think that portfolios are transferable across the curriculum to teachers of other subjects.

As outlined in our discussion of survey results in Section 9, state school teachers would need time to get used to the idea of CPD as a journey. They would therefore also need help with the practicalities of the thinking behind and practice of keeping a professional portfolio. We discuss how portfolios might work for Uzbek state school teachers of English in Section 11.
Overall, it appears that CPD receives more explicit attention for teachers in Presidential schools than for those in general state secondary schools. It seems to us, therefore, that expectations of what makes a teacher professional differ between the 2 school types, with more detailed attention to professional learning given to teachers in Presidential schools. This seems to us anomalous and inequitable, as it arguably implies that children in Presidential schools are engaging with a more informed and professionally-committed teacher than children in general state secondary schools.

In our view questions which arise for decision makers from scrutiny of Presidential school standards are whether

- the clear focus on CPD in Presidential schools is transferable or adaptable in some guise within a CPD policy document for teachers of English in general state schools.
- the elements of CPD for teachers of English in Presidential schools are applicable to teachers of all curriculum subjects.

**Policy Recommendations**

We recommend that:

**Recommendation 1**
The Ministry of Pre-School and School Education should formulate and adopt a national policy on Continuing Professional Development for state school teachers of any subject. This policy should ideally be based on a number of key principles such as the following:

- every teacher has a right and an obligation to develop professionally throughout their career;
- there must be equality of access to CPD opportunities for teachers in rural as well as urban settings across the country;
- professional learning should be seen as a career-long process for teachers
- all teachers need to keep up with changes in curriculum, teaching materials, and assessment practices
- all schools, as learning organisations, must ensure that conditions conducive to CPD are created and maintained;
- individual CPD is inextricably linked to the development of every school as an institution, and hence to the quality of education it offers to learners;

**Recommendation 2**
Schools and communities of practice should be recognised as hubs of CPD activity.

**Recommendation 3**
CPD provision should consist of a mix of needs-based INSETT and follow-up CPD activity in these hubs.
Recommendation 4
Heads should be provided with training and guidance in how to create the necessary conditions for professional development in schools.

Recommendation 5
Teachers and Heads should be supported with training and guidance on the principles and practice of CPD as an ongoing learning process.

Recommendation 6
Consideration should be given to the use of CPD portfolios as a means of documenting each teacher’s CPD activity and that this should be reviewed annually in an appraisal meeting with the school Head or another senior colleague.

Recommendation 7
Each school should develop its own institutional CPD policy and practices, based on the national policy but also addressing the needs and priorities identified regularly by teachers and the school Head.

Recommendation 8
The document detailing 17 ways of earning CPD credit points should be reviewed and revised to include recognition only for CPD activities and processes that clearly contribute to improvement in teaching. The updated list should include a mixture of courses and participation in teacher-led initiatives such as Telegram discussion groups and local teacher clubs.

Recommendation 9
CPD provision for state schools should be linked to the same kinds of teacher competencies and standards as are prescribed for Presidential schools.
b. PRESETT

Summary

A new English teacher’s professional journey can be seen as starting in Year 1 of the PRESETT programme, when a student begins the process of transition from being a language learner to becoming a teacher of that language.

There is evidence that the designers of the national PRESETT curriculum conceive a PRESETT student’s undergraduate career as a journey. The facts that there is a national curriculum, and that systematic learning processes are built in to the PRESETT course support this view.

However, not all PRESETT graduates in Uzbekistan take the same journey, as some institutions do not follow the national curriculum, some entry tests are do not give students a valid point of departure for their journey, and PRESETT exit tests do not provide an arrival at the intended journey destination.

In addition, it is not clear how many PRESETT graduates arrive at their destination, or whether INSETT providers build on what PRESETT graduates have learnt on their undergraduate journey.

i. CPD within the national PRESETT curriculum does focus on a professional journey

Discussion with colleagues at UWL (Appendix 17) suggest that PRESETT graduates are involved in processes supportive of professional learning. There is no dedicated module on CPD in the curriculum but a number of the modules from Year 2 onwards focus on the realities of teaching in school. For example, there is a graded and guided approach to Teaching Practice, which progresses from guided observation in Year 2 to teaching apprenticeship in Year 3, and full responsibility for lessons in Year 4.

It is of note that reflection is infused into the curriculum within assignments and module content. Assignment work in most modules includes an element of reflecting on practice, for instance. So, too, the main methodology modules, and modules or part modules on lesson planning, discussion of professional articles, and classroom investigation (two modules in Years 3 and 4). The thinking behind content and process is very much to prepare students for their career as teachers by developing skills of critical and independent thinking and judgment.

This continuous approach of infused reflection to professional learning seems to us an informed one, as the processes it entails provide learning opportunities for reflection to become part of a future teacher’s thinking and behaviour. Anderson (2015) stresses
the value of such opportunities in helping teachers to think about how languages are learnt and what kind of teaching supports learning.

ii. Varying journeys are offered by different PRESETT providers

However, not all PRESETT students experience the same journey. Interviews with a private university (Appendix 18) and with a state provider (Appendix 19) reveal that some PRESETT institutions do not follow the national curriculum.

In the case of the private provider, they have designed their own curriculum, as they said that they felt the PRESETT curriculum included extraneous content which is not suited to future teachers. They see their curriculum as more practical than the original. However, it is not entirely clear what they mean by ‘original’. We are thus unsure if this university has adapted a philology-based PRESETT curriculum or at least parts of the national PRESETT curriculum, or if they are aware that a national PRESETT curriculum exists. The state provider informed us that they feel a PRESETT graduate needs a broader education than that offered by the national PRESETT curriculum, and so they have included more philology-oriented content. In addition, they have added content on translation, as they feel that this offers PRESETT graduates with a range of job opportunities beyond that of teacher. Presidential decree 290 gives this specific university financial, academic and organisational independence from the start of this year, and so it has no need to follow the national PRESETT curriculum if it does not wish to do so.

While this level of independence may be entirely appropriate and desirable for the study of academic subjects, we believe that a laissez-faire approach to professional qualifications is wholly unsuitable in principle and in practice. This is because a professional qualification is not only academic in nature. The consequence, we think, is that PRESETT graduates who enter the teaching profession will have different understandings of what language learning is, what effective teaching is, and what being a professional involves. In addition, some will have had more practical preparation and support for their future profession than others. In our view, this devalues the professional qualification offered, as not all qualifications have the same standards or expectations of professionalism. It is therefore likely that some learners of English and schools will be at a disadvantage from having teachers who are far less prepared than they might be for their work.

In sum, we think that these discrepancies in curriculum content and in implementation of PRESETT raise serious doubts about the quality and suitability of some PRESETT qualifications as an entry into the profession.

iii. Journeys are disrupted due to problems around entry and exit tests

Interviewees from the private and state universities referred to above (Appendices 18 and 19) and from Tashkent City Training and Retraining Institute (Appendix 20) told us that University B1 entry tests are subject to corruption. This means that not everyone
with a B1 entry test certificate has a B1 profile, and so may be starting their journey from a different place than intended. They may also not reach the intended language proficiency destination of the professional qualification.

Universities also told us that the PRESETT qualification is not currently in itself sufficient for entry to a teaching career, as future teachers need a C1 language proficiency certificate in order to work in a state school. This is anomalous, as in theory the national PRESETT language exit test is C1-aligned. It also suggests that the PRESETT qualification is not considered by MPSE as fit for purpose.

If C1 language proficiency remains an entry point for teachers of English into state schools, we think that University language exit tests should be calibrated to C1. This would remove blockages to the professional journey, and use resources more efficiently and effectively. It would also be fairer on PRESETT graduates and institutions than the current status quo.

We observe that the MOHSSE is responsible for university curriculum and qualifications, but that MPSE is responsible for hiring and supporting teachers. There is currently a mismatch between their policy and practices in the PRESETT curriculum and exit tests. This is leading to an unnecessary waste of human and financial resources. We recommend that MOHSSE and MPSE colleagues consider meeting with a view to aligning PRESETT curricula and ensuring that PRESETT exit tests are C1 aligned so that they enable direct entry into a teaching career in government schools.

iv. There is a lack of clarity on post-qualification continuity

We found it difficult to gain precise data on the number of PRESETT graduates who go into teaching. We do, however, have data from UWL, Nizami, and Bokhara universities (Appendix 8). It is not clear whether such data is regularly collected, analysed and evaluated by key decision makers. If this does not currently occur, we think that it would be useful for decision makers to do this as part of their monitoring and evaluation. Scrutiny of such data would enable MPSE to gauge both return on investment (ROI) and the impact PRESETT studies have on entry into both private and state schools.

The practicalities for INSETT providers of building on the experiences, knowledge and skills of PRESETT graduates are likely to be challenging in some aspects if students graduate from universities with different profiles. Scrutiny of Avloniy’s 36-hour core syllabus outline, and of Tashkent Regional Training and Retraining Institute’s materials suggest perhaps that PRESETT experience is not taken into account in their course design. This feeling is strengthened by an interview with Avloniy (Appendix 13), in which a colleague confirmed to us that as far as he knows, INSETT materials design does not currently build on a PRESETT foundation.

### PRESETT Recommendations
We recommend that:

**Recommendation 1**

The PRESETT curriculum for all providers be re-examined and modified to accommodate a CPD dimension, and to ensure that student teachers receive the support they need as they make this journey over a four-year period of study. Examples of CPD-oriented activity that can be built into every PRESETT programme include:

- materials design
- peer observation and feedback during teaching practice
- introduction to professional reading through article discussion
- classroom-based research
- keeping a reflective journal
- possibly assessment by portfolio built up over each academic year

**Recommendation 2**

MPSE liaise with MOHSSE to ensure that the national PRESETT curriculum is standardised across all providing institutions so that new English teachers’ professional journey starts off on an equal footing and with a comparable state of readiness to teach children in schools.

**Recommendation 3**

PRESETT exit language exams be carefully calibrated to CEFR level C1 so that students do not have to face the expense of paying for an international proficiency exam.
Recommendation 4
All PRESETT-providing institutions should keep records of graduates who progress into teaching posts at state and private schools so that the Ministry can begin to assess the impact of PRESETT studies on the quality of English teaching in both state and private sectors.

Recommendation 5
PRESETT institutions, Avloniy and Training/Retraining Institutes work closely together to ensure a smooth transition from a teacher’s pre-service experience to full practising teacher status.

c. Government prescribed INSETT, including motivations and rewards

Summary
We begin with a brief cautionary note about the extent of our own understanding of government-prescribed INSETT. We then analyse one course from each of the 2 main government-endorsed INSETT providers through a framework adapted from Kennedy 2005.

We conclude that both courses are concerned mainly with communicating information, with little attention paid to teachers developing critical thinking and pedagogical solutions to issues in their own classrooms. Motivation and rewards seem related to duty and salary. We are unable to find evidence of CPD as a journey in our analysis of government prescribed INSETT.

Our own understanding is still developing
We have developed a reasonable working understanding of government-prescribed courses but in the time available were not able to:

- go deeply into teachers' experience of the current provision
- speak to many trainers in training and retraining institutes
- familiarise ourselves more fully with Avloniy's Learning Management System
- find out detail about Avloniy criteria for approving private providers of government-mandated INSETT

Government prescribed INSETT providers
At present only 2 types of course designed by state providers are available to teachers of English in Uzbekistan. Avloniy and Training and Retraining Institutes provide these INSETT nationally on behalf of MPSE. These INSETT courses focus on pedagogy.

Outline of courses sampled and analysed.
Avloniy informed us (Appendix 12) that because CPD is transitioning from periodic INSETT updates to a system of continuous professional learning, the range of course types designed by state providers is limited to 2 at the moment. One is the Teaching English though English course designed by George Mason University https://sites.google.com/view/mason-tete/home?pli=1 Avloniy have made this course
available with the help of ACCELS on their LMS. The other variant is based on a core syllabus outline linked to 8 competencies which has been designed for all subject teachers.

We have chosen to focus here on analysis of 36-hour national INSETT syllabus sent to us by Avloniy (Appendix 5), and a course designed by Tashkent Regional Training and Retraining Institute (TRTRI). This is entitled *Modern Approaches and Innovations in Teaching a Foreign Language* designed in 2020 (Appendix 7).

Once more, caveats are in order. We have reviewed the documents via machine translation, and we are not certain if the 2020 course is still in operation. There were other courses from TRTRI that we could have reviewed, but shortage of time has dictated that we have opted for a micro analysis of one set of materials rather than a comprehensive analysis of all.

**Avloniy National INSETT syllabus**

The Avloniy core syllabus consists of 36 hours. Its cover page explains that it is intended as a continuous professional development course for all subject teachers of general secondary educational institutions.

The course consists of 8 topics. These topics are seen as competencies by Avloniy. The have informed us that work is under way to add sub-components to these competencies, so that they serve as more useful reference points for teachers and course providers than at present. (Appendix 13)

The 8 teacher competencies are:

1. Communication skills
2. ICT and media literacy
3. Self-development and continuous professional development
4. Responsibility and flexibility
5. Ability to teach inclusively
6. Knowledge and use of normative legal documents of education in professional activities
7. Teaching methodology
8. Assessment literacy

The purposes of the course are given as:

- to regularly update the professional knowledge, skills and qualifications necessary
- to increase the effectiveness of the educational process, based on modern methods
- to develop teachers’ professional competence based on the qualification requirements.

www.britishcouncil.org
The course outline states objectives for the course and professional competencies it aims to address. Though the machine translation is fuzzy, the objectives are predominantly phrased in terms of conveying information to teachers. The paradigm here seems to be INSETT as transmitting information about duties, requirements and new pedagogical trends.

We understand that all 4 course providers are eligible to design INSETT courses based on this syllabus outline. 36-hours is a minimum course length: they can provide a longer course if need be. Providers have freedom to design materials as they wish, provided that course objectives and content focus on the 8 competencies (Appendix 13).
TRTRI INSETT course: Modern Approaches and Innovations in Teaching a Foreign Language

See Appendix 7 for the course outline. The course consists of 9 topics:

1. Advanced foreign experiences and modern approaches in teaching a foreign language, modern attitudes.
2. STEAM approach and smart education technologies
3. Use of modern educational tools.
4. Educational process management technologies and types of assessment.
5. Effective ways of using information and communication technologies in foreign language classes
6. Introduction of education based on competence approach in foreign language teaching
7. Organisation of integrated lessons (CLIL) based on modern requirements.
8. Organisation of foreign language classes based on modern requirements and development of lesson plans.
9. International studies of student literacy assessment.

The purpose of the course is stated as

to develop the competencies of English language teachers of general secondary schools to use modern approaches and innovations in the educational process.

Later on, the educational aim of the course is given as:

to acquaint teachers with modern approaches and innovations in English language teaching, to apply them in practice, thereby ensuring the effectiveness of education.

The course outline sets out a number of competencies it expects teachers to be able to develop during the course. The course lasts 62 hours in all. It says that it includes a mix of lectures, discussion, debate and practical application, of which 14 hours are practical.

We note that there are some points in common with the Avloniy course, as evidenced by topics relating to competencies, assessment, digital literacy, and teaching methodology. Description of course content suggests that the main thrust of the course, like the Avloniy course, is about communicating information to teachers. This course was written before the advent of the 8 competencies, and so detailed analysis seems unnecessary, as it may be that this course now needs to be updated to align with the new competencies.

A framework for analysing the 2 government-prescribed INSETT courses.
We analyse both the Avonliy and the TRTRI courses through the prism of a framework adapted from Kennedy (2005). We outline below the framework before moving on to analyse the 2 courses.

Kennedy considers 9 models of CPD, and asks 5 related questions about CPD which she offers as a framework for analysis. Although Kennedy writes about CPD generally rather than INSETT specifically, we consider her model a suitable basis for analysis of government-prescribed INSETT in Uzbekistan for 2 main reasons. Firstly, because INSETT is one form of CPD. Secondly because we find her model a comprehensive and clear overview which considers the what, how and why of CPD in general terms. We outline below an adapted version of her work, containing 8 of her 9 models. The purpose and comments columns on the next page derive from a mix of her and our experiences. After explanation of Kennedy’s model on pp 42-43, we analyse a sample of current INSETT provision in Uzbekistan with reference to this model on p 44.
<table>
<thead>
<tr>
<th>CPD Model</th>
<th>Purpose</th>
<th>Comments</th>
</tr>
</thead>
</table>
| Training           | Teachers are given a chance to update skills in order to show competence | • Agenda usually decided by provider.  
• Can be effective in communicating new knowledge  
• May not always connect to teachers’ classroom context |
| Award-bearing      | Teachers show evidence of their suitability via the gaining of a qualification | Validation by an outside body                                                               |
| Deficit            | To remove or mitigate perceived teacher weaknesses                       | • Often course-based.  
• Ignores scrutinising system organisational and management factors, weaknesses, which may account for some teacher weakness  
• Often compulsory participation, variable teacher motivation |
| Cascade            | Spreading of good practice. Teachers attend training events and disseminate to other teachers | • Providers may focus more on numbers trained than on cascade design which maximises chances of transfer of ideas into the classroom  
• Impact often diluted at each successive level of the cascade  
• Often used to implement educational reform |
<p>| Standards/Competency-based | To create effective teachers by focusing on empirically-based connections between teacher effectiveness and student learning’ | May emphasise individual teacher competence and accountability at the expense of collaboration and teacher’s own ideas and abilities |
| Mentoring          | To support professional learning via a confidential one-to-one relationship | Can be hard to find and train skilful mentors. Requires support at school level, e.g. timetabling space or a reduction in teaching load. |</p>
<table>
<thead>
<tr>
<th><strong>Community of practice</strong></th>
<th>Similar to mentoring, but usually more than 2 people are involved</th>
<th>May include focus on whole school development as well as individual CPD</th>
</tr>
</thead>
</table>
| **Action research**      | Teachers investigate their classrooms in order to address pedagogical questions or problems | • Teachers can do action research alone or collegially.  
• Requires time |
We note that the first 5 models are essentially top-down with regard to CPD provision, and that the other three allow for more bottom-up CPD initiative.

Kennedy argues that a key concern of CPD provision is to focus beyond the what and the how in order to consider the why. To this end, she distinguishes between transmissive, transitional and transformative CPD purposes. Each successive CPD purpose allows for greater teacher independence.

She argues that a transmissive CPD purpose aims mainly to support teachers to implement reforms which are part of the government’s policy. Kennedy sees a transformative CPD purpose broadly as aiming to support teachers in shaping their own professional practice. She views a transitional CPD purpose as having the potential to support either the government or the individual agenda.

She characterises the models thus:

<table>
<thead>
<tr>
<th>Model of CPD</th>
<th>Purpose of model</th>
</tr>
</thead>
<tbody>
<tr>
<td>The training model</td>
<td>Transmission</td>
</tr>
<tr>
<td>The award-bearing model</td>
<td></td>
</tr>
<tr>
<td>The deficit model</td>
<td></td>
</tr>
<tr>
<td>The cascade model</td>
<td></td>
</tr>
<tr>
<td>The standards-based model</td>
<td>Transitional</td>
</tr>
<tr>
<td>The coaching/mentoring model</td>
<td></td>
</tr>
<tr>
<td>The community of practice model</td>
<td></td>
</tr>
<tr>
<td>The action research model</td>
<td>Transformative</td>
</tr>
</tbody>
</table>

Kennedy also asks 5 questions about CPD which she offers as a framework for analysis

1. What types of knowledge acquisition does the CPD support, i.e. procedural (knowing how to) or propositional (knowing that)?

2. Is the principal focus on individual or collective development?

3. To what extent is the CPD used as a form of accountability?

4. What capacity does the CPD allow for supporting professional autonomy?
5. Is the fundamental purpose of the CPD to provide a means of transmission or to facilitate transformative practice?

We use a hybrid of Kennedy’s CPD purposes and questions to analyse the Avloniy and TRTRI courses on the next page
<table>
<thead>
<tr>
<th>Course</th>
<th>Avloniy</th>
<th>TRTRI</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type of knowledge acquisition</td>
<td>Knowing <em>that</em></td>
<td>Knowing <em>that</em>, though just under a quarter focusses on knowing <em>how to</em></td>
</tr>
<tr>
<td>Principal focus</td>
<td>Individual</td>
<td>Individual</td>
</tr>
<tr>
<td>Extent of accountability focus</td>
<td>Mainly on accountability, as competencies underpin the core syllabus content</td>
<td>Focussed mainly on accountability, as competencies are to the fore.</td>
</tr>
<tr>
<td>Capacity for supporting professional autonomy</td>
<td>As the course seems mostly focussed on information, it seems unlikely to foster a high degree of teacher autonomy in the short term. Arguably, some teachers may be able to use the information they gain from the course to develop elements of autonomy in their own teaching.</td>
<td>Comments on Avloniy course apply here</td>
</tr>
<tr>
<td>Fundamental CPD purpose</td>
<td>Mostly transmissive. This view is based on the course purpose focussing on updating knowledge and on scrutinising descriptions of course content and topics. Developing teacher competencies is also part of the course purpose, so the course in theory contains a transitional purpose. This is hard to see within the description of course content, however.</td>
<td>Superficially transitional, though course content and description seem mostly transmissive</td>
</tr>
</tbody>
</table>

In sum, both courses seem largely focused on propositional rather than procedural knowledge, and on individual rather than collective development. The main CPD orientation is transmissive, despite aspects which at first sight may seem transitional. It is of
course possible that some teachers will digest and apply course content in context-sensitive ways when they return to schools, but this outcome does not seem well supported by course content.

We note that policy may be shifting towards a deficit view of CPD (Appendix 22). Though there will certainly be weaknesses in the overall teaching cadre, we have concerns about this possible shift for the reasons outlined in our discussion of Kennedy’s model and of the current INSETT provision above. This is because of the number of variables involved in learner performance, the difficulty of gaining robust data linking learner performance to teacher performance, and the difficulty of providing effective, well-designed, sustained and supported CPD provision based on a coherent theory of change. See Yoon et al (2007) for a more detailed study of the relationship between teacher CPD and learner achievement, and Orr et al (2013) on the difficulty of attributing improved pupil performance to the effect of workshops.

We can find relatively little focus on processes in these courses, and so we see minimal evidence of the idea of CPD as a journey in analysis of our 2 sampled government-prescribed INSETT courses.

If MPSE were to develop a CPD policy which sees CPD as a journey, and which acknowledges the value of both courses and school-led activity in teacher professional learning, this would have consequences for INSETT course design. In order to achieve coherence between policy and practice, INSETT courses would need to be designed and taught in ways which are more transformational and less transmissive. Avloniy INSETT syllabus design, and Regional Training and Retraining Institute course design would also need reflect the value of school-based follow-up activity, by building in components which give teachers the opportunity to try new ideas out in class. They would also need to build in to their design guided reflection questions for teachers to share and discuss at school or in local communities of practice.
Motivations and rewards
Teachers of English need to gain 18 credit points per year as part of their CPD. They gain 9 points for attending a government-prescribed INSETT course (Appendix 6), and so the motivation is to some extent related to fulfilling an obligation, though of course individual teachers will come to courses with their own motivations.

The main rewards and motivation within the overall approach to CPD are financial, however. This is because teachers gain a 50% salary bonus for 2 years if they obtain a recognised international qualification. These qualifications are:

- Cambridge Advanced Certificate (C1)
- IELTS - 7+
- TKT- 1, 2 and 3 (4 modules needed for University teachers)
- TESOL- Level 6
- CELTA or DELTA
- TOEFL- C1
- Aptis for teachers C1

We can see the value of encouraging teachers to gain international qualifications and also understand the value of giving teachers choice. However, we question the thinking behind the selection of some of the qualifications, because:

a) They are of different value
CELTA is a level 5 qualification and DELTA a level 7 in The Quality Assurance Agency for Higher Education framework for higher education qualifications in England, Wales and Northern Ireland 2014 [https://www.qaa.ac.uk/the-quality-code/qualifications-frameworks](https://www.qaa.ac.uk/the-quality-code/qualifications-frameworks)

b) They require different levels of language proficiency

The other qualifications all require or are aimed at C1.

c) They mix pedagogy and language focus
TKT, CELTA and DELTA focus on pedagogy, the other qualifications on language proficiency

d) The pedagogy qualifications do not all focus directly on classroom teaching
TKT focuses on knowledge about teaching, so unlike CELTA and DELTA, does not aim directly to improve teaching.

e) The classroom teaching which is focused on is not directly related to primary and secondary school children.
The Cambridge qualifications on the list do not focus explicitly on the age group of children learning English in state schools in Uzbekistan. TKT main suite exams focus on learners older than 12. CELTA and DELTA are targeted at teaching adults.

f) They require different amounts of time to complete

TKT is a basic qualification: it is available on demand and can be taken without a course. Each exam lasts for 80 minutes. CELTA and DELTA include a teaching practice requirement. A DELTA course lasts between 12-18 months. An intensive CELTA course lasts 4-5 weeks F2F or online, or about a year if part-time. C1 Language proficiency courses are also likely to involve months of study.

Some of the stakeholders we consulted feel that the focus on certificates has led to distorted priorities in CPD, as it causes teachers and sometimes Heads to focus on obtaining a qualification more than on what is important in teaching or learning. The situation was characterised by one interviewee as certificate mania (Appendix 17). See Appendices 14 and 16 for other references to this view.

While a law of unintended consequences may be in play with regard to the current status of international qualifications in CPD, there is also counter evidence which supports the focus on certificates. Teachers in a Tashkent school seemed generally supportive of the initiative, for example (Appendix 15) and data from some teacher questionnaires (Appendix 11) also seems to be in favour of obtaining international certificates. Over 50 responses in the teacher questionnaires claimed that teachers’ salaries are too low (Appendix 11) so in the short term, at least, we infer that this initiative will be welcomed by some who wish to increase their earnings.

If teachers gain an international certificate, in theory they receive a refund of their course fees. Teachers in a Tashkent school told us that this is difficult and time-consuming to do in practice (Appendix 15), though an Avloniy colleague said that some teachers do not feel the need to reclaim their fee. A MPSE representative said that the Ministry of Finance needs to check the number of applications before it can issue refunds.

<table>
<thead>
<tr>
<th>Government prescribed INSETT Recommendations</th>
</tr>
</thead>
</table>

We recommend that:

**Recommendation 1**

MPSE, in partnership with Avloniy and with all training providers, should consider the findings of this report as a basis for working towards coherence in INSETT policy and provision within an overall view of English teachers’ evolving needs and priorities. This partnership should be based on an understanding of the place of both training courses and school-based follow-up activity as significant ingredients of CPD. This understanding would require updating of the Avloniy INSETT syllabus and Regional Training and Retraining Institute course design.

**Recommendation 2**

www.britishcouncil.org
Avloniy should continue its work on clarifying the sub-components of its teacher competencies.

**Recommendation 3**

The training offered by Training/Retraining Institutes under Avloniy be subjected to a thorough review to ensure that it is fit for purpose in terms of meeting teachers’ needs.

**Recommendation 4**

INSETT courses should be taught in ways that develop teachers’ professional autonomy and should therefore go beyond simple transmission of knowledge towards a view of training as potentially transformational.
**d. Ranges and types of Continuing Professional Development (CPD) available outside of government provision**

Our data points to 4 main types of CPD available from non-governmental sources. These are CPD via

a) Self-study  
b) Individual initiatives other than self-study  
c) Attending courses run by language schools within Uzbekistan  
d) Attending donor-funded courses,

**a) Self-study**

Our main data for availability of this type of CPD comes from teacher survey responses ([Appendix 11](#)).

Self-study typically involves searching the internet, watching internet and social media channels. Illustrative survey responses for this way of learning:

- Watching YouTube Tutorials to have interactive lessons  
- I watch English with Cambridge on YouTube  
- I look for grammar books and visual aids and interactive methods, games on the Internet

Teachers also consider professional reading as a significant self-study option, e.g.:

- I read additional resources  
- Read some articles

Often, responses contained a mix of self-study and other options. For example:

- To improve my skills, I often attend trainings, watch master classes and read foreign articles. As far as knowledge is concerned, I work at home in my free time to work on myself

There is some supportive data from online and F2F interviews. ([Appendices 11 and 15](#)) Teachers from a Tashkent school, for example, told us that they study Internet material without specifying exactly what, and 2 teachers mentioned how useful studying the Prepare Teacher’s Book is in helping them to think about their own teaching.

We have found minimal documentary evidence with regard to CPD via self-study. The only source we have found is on the RELO’s website. RELO provides access to back Issues of English Teaching Forum journal. See...
b) Individual initiatives other than self-study

As with self-study, the main body of evidence for this type of CPD comes from our survey data (Appendix 11). Typical teacher comments focused on attending F2F or online courses:

- I attend various trainings and seminars
- I attend online courses
- I study in additional courses

Responses also mentioned interactive CPD options:

- I participate in webinars
- I also participate in additional online groups
- I learn various methods and information through groups on Google and Telegram

A few responses mentioned learning through sharing:

- Share ideas with other teachers
- We analyse our lessons by exchanging ideas with my colleagues. I ask students for their thoughts on my lesson and read teaching guides

There are also examples from our online and F2F interviews. One teacher from a Tashkent school told us that they had paid out of their own pocket for a Cambridge CELT-S course. This was extremely expensive, but a valuable learning experience, she said. Teachers also reported attending British Council courses as useful.

c) Attending courses run by language schools within Uzbekistan

Our meeting with trainers at the Tashkent City Training and Retraining Institute is the main source of data for this. We understand that Avloniy have licensed 3 private providers of in-service courses. We know that one of these providers is the Turon Bank. See Appendix 13 for details of how licensing works.

These providers run courses designed by Avloniy, so although the provider is private, content is state-designed.

d) Attending donor-funded courses

Our main evidence here comes from document sources. The courses are run by British, and American donors
Types of course include

i. An intensive one-week British Council summer course online (OTC), consisting of Discussion Forums, webinars, and a speaking club. See: https://www.britishcouncil.uz/en/programmes/education/future-english/online-teacher-community-summer-school

ii. A 10-week British Council Online Training Course (OTC) consisting of 5 modules of approximately 3 hours study time per week. Tasks involve teachers in discussion forums and a reflective journal. Each module includes a live session from a facilitator. Modules are
   • Engagement (= Introduction)
   • Classroom Management
   • Inclusive Learning
   • Assessment for Learning
   • Assessment of Learning

   This is a 3-year F2F 3-tier cascade programme now in its final year. Core Uzbek trainers receive trainer training and go on to train trainers to be in the first tier. These trainers, train further trainers, known as regional peer mentors in the second tier. The regional peer mentors train teachers in the third tier. ESN aims to have trained 15,000 teachers by autumn 2023. The training of teachers occurs regionally every Friday. Courses last approximately 140 hours.

v. 2-month Online Professional English Network (OPEN) Programme courses run by US universities. These courses are accessible to any teacher from around the world with B2 English or above. The scheme is run by RELO. See https://uz.usembassy.gov/education-culture/relo/

vi. We have 7 survey and 1 interview reference to attending courses run in Finland by Finnish donors. We do not have any further information on these courses.
As UK and US donors are the main CPD and INSETT providers for teachers of English in Uzbekistan, we turn our attention briefly to 2 aspects of their work, namely cascades and exit strategies.

There is evidence that cascades are used as a mode of teacher education in Uzbekistan, chiefly by American donors. Cascades can reach large numbers of teachers, and can seem an attractive option in a large country with big numbers of teachers.

ESN represents a huge investment of time and resources, and has received positive feedback. However, one danger with cascades is that CPD providers tend to focus more on numbers of teachers trained than on the quality and relevance of the training. Focussing on numbers of teachers reached provides important information for budget holders, but overlooks the fact that while cascades can succeed as a training mechanism, they can fail in effecting change (McDevitt 1998)

There are a number of potential problems with cascades as a form of CPD. These include:

- Transmission loss: *If you’re too far away from the source, you can easily avoid getting soaked* (McDevitt 1998)
- A context gap between cascade content and pedagogy and *classrooms’ realities* (O’Sullivan 2002)
- selection of trainers in tier 1 (Shezi 2008)
- reduced training time allocated to lower tiers (Wedell 2005)
- lack of follow-up (Dichaba and Mokhele 2012)

Some of the content on the RELO webpage suggest that cascade designers are aware of a number of the potential cascade pitfalls, but this awareness of the limitations of cascades has not always been evident in discussions we have had about cascades. We suggest that if need be, colleagues involved in the cascade model take time to consider or refresh themselves on options to address distortion and dilution, and check for inclusion of these options in cascade design. Such options include:

- Parallel planning to maximise congruence between cascade content and aims and classroom context (Wedell 2005). See our earlier reference to parallel planning
- Participative materials development (Hayes 2000)
- Localising responsibilities within cascade structures (Hayes 2000)
- Build in support groups and cluster schools in lower tiers (Herriot et al 2000)

We note that there is good communication between UK and US donors informally and via ERSG. Given that both British and American donors currently play a key role in CPD
provision, we suggest that they continue this cooperation, and focus particularly on sustainability and exit strategies.

**Donor-funded CPD recommendation**

We recommend that:

**Recommendation 1**

UK and US donors continue and build on their current level of cooperation probably through the work of the ERSG. This cooperation should certainly include discussion and review of exit strategies. (Within the limited scope of this report, we have not been able to be more specific about the direction that this cooperation might take in future. Nonetheless the recommendation stands.)
e. An appraisal of the quality of current provision to generate recommendations and areas for development (referencing and integrating outcomes from the University of Leicester research and other relevant reports available).

We find it difficult to define quality within this investigation. Some reasons for this relate to a number of practical considerations, similar to those outlined in discussion of government prescribed INSETT.

We need to acknowledge also the patchiness and inconsistency of some of our data, and our own evolving understanding of how key stakeholders see quality.

The consistency and clarity of data collected
At times there are contradictions in our findings which we have not yet been able to clarify. It would be useful to understand, for example, why Heads did not refer to ESN in their questionnaire responses, while ESN received numerous mentions from teachers. Similarly, courses from one course provider received generally positive feedback in teacher questionnaires, but less positive feedback in a teacher focus group interview.

Though the University of Leicester report was a helpful starting point for this consultancy, we feel that developments in the teacher education landscape have moved on apace since the time of its writing, and so rely only on our own data sources and professional reading.

Insufficient understanding of how major stakeholders see quality
We are unsure of how different stakeholders in Uzbekistan themselves view quality. See White (1998) for more on how this effects assessment and evaluation of quality in teacher education.

If stakeholders are concerned, for example, with accountability (e.g. return on CPD investment in terms of improved learning results or increased teacher language proficiency), quality is mainly defined as outcomes-related. Typically, this view is likely to be held by those responsible for CPD via providing funding, or those responsible for quality assurance. White argues (1998 p138) that an outcomes view of quality tends to bureaucratise quality, as it tends to focus on value for money and standardisation. In our experience it can also lead to a preoccupation with numbers (e.g. of teachers attending a course) as indicators of success.

By contrast, if stakeholders favour process in teacher education (e.g teachers being able to solve pedagogical problems through collaboration and critical thinking), quality has more to do with process. Typically, this view tends to apply to those who take an interest in their own CPD, and sometimes those responsible for running in-service courses intended to contribute to CPD. This view of quality focuses more on an iterative process which focuses more on ongoing development of autonomous, professional skills, knowledge and attitudes.

Clearly, this dichotomy is an oversimplification. However, in broad terms, we agree with White that quality in English language teacher education needs to acknowledge both an
accountability dimension and a professional dimension. Our survey and interview data, suggests that teachers value courses which teach them about methods and techniques (See section 9 and Appendices 11 and 15). It also indicates that some teachers are keen to learn from sharing ideas and discussing pedagogical issues (see section 9 and Appendices 11, 14, 15 and 16). We therefore think that this view of quality represents a balance that may be possible and desirable in the provision of CPD for teachers of English in Uzbekistan.

This balanced view embraces quality from both a top-down system perspective, and from a bottom-up teacher perspective of teachers. We think that this view is relevant to our analysis, because an emphasis on quality favours a typically top-down perspective of accountability which is likely to reduce teaching to a set of replicable behaviours. An accountability view of quality typically fails to accommodate local context, the experiences of teachers involved in CPD and soft skills such as increased professional empathy, understanding of learners and confidence. On the other hand, if quality is largely concerned with processes and experiences, there is a danger that the focus on the journey alone may not focus sufficiently on a destination in terms of outcomes.

In previous discussion in section 10, we have noted some inconsistencies in CPD provision. We think that a system of CPD provision needs to have a degree of internal coherence and consistency in order to work efficiently and effectively in order to have an impact on both accountability and professional learning.

We have spoken with a number of Uzbek colleagues who have expressed, unprompted, their concerns over the sustainability of the current CPD provision. As this clearly affects the long-term viability for CPD for teachers of English, we therefore include sustainability as a third dimension of quality

For the purposes of this analysis, we therefore consider quality to consist of the extent to which CPD provision

- balances accountability and professional learning
- represents an internally coherent system
- is sustainable in its current form

We consider each of these dimensions of quality below.

**Quality dimension 1: The balance of accountability and professional learning in CPD provision**

Overall, CPD provision seems to us to weighted in favour of accountability. Evidence for this comes from our analysis of 2 sample government-prescribed INSETT courses in Section 10c, and from the stipulation that teachers of English must gain a C1 language proficiency or other international qualification in order to enter the profession. It is also apparent in an interview with Avloniy (Appendix 13) in which Avloniy take a deficit view of teacher learning. They are current investigating a pilot study of whether it is possible to attribute test scores of Maths students to teaching performance, and to design INSETT courses targeted at teachers with perceived weaknesses in areas of the curriculum on which students underperform. The national teacher standards and 8 teacher
competencies on the Avloniy platform and national INSETT syllabus outline also focus largely on accountability.

We note a contrast with the orientation of CPD provision on some donor-led INSETT courses, where the focus seems more concentrated on professional learning. The British Council OTC course appears aimed more at facilitating online communities of practice amongst teachers of English. RELO colleagues told us that they hope that communities of practice will emerge from its ESN cascade course, (Appendix 21) though it is not clear to us to what extent this focus is designed into course content. The Education for Excellence Teacher Support System Study reports a prime focus of its work being to help teachers and trainers promote collaboration and support within schools. This, again, suggests a focus more on professional learning than on accountability.

This CPD initiative therefore seems to us to balance both accountability and professional learning, and to represent a degree of quality in CPD provision. We think that MPSE consider the extent to which the Presidential Schools’ approach to CPD is applicable and transferable to state school CPD provision.

**Quality dimension 2: The extent to which CPD provision is internally coherent**

**The need for a CPD policy and accompanying CPD strategy**

We have outlined above that CPD policy and principles, where they exist, seem vague rather than specific. We have not found a document which sets out what CPD is and what its purpose is. In addition, we have found can see no real evidence of a CPD strategy for ELT, beyond giving responsibility to Avloniy through its provision of online courses available on its LMS. One Uzbek colleague has called the introduction of the LMS a technical response to a professional issue. (Appendix 23). This comment is not intended in any way to disparage the high degree of professionalism Avloniy are clearly putting into their work. But the fundamental point remains that online courses alone are not sufficient to support professional learning adequately. They can clearly form part of the CPD landscape, but need to be complemented by other means of professional learning if the CPD system in Uzbekistan is to gain coherence.

While the teacher questionnaires reported good feedback on government-prescribed INSETT provision (Appendix 11), we have encountered some dissatisfaction with INSETT from teachers, due to peripheral content, transmissive teaching, and some content being delivered by lectures in Uzbek (Appendix 15). The fact that much of the content of the 36-hour syllabus course outline is generic and will be taught in Uzbek to teachers of English (see Appendix 7) supports this view. Here again we think that a CPD policy would serve to inform strategy, which would in turn make it easier to monitor quality of INSETT and CPD provision.

We offer here illustrative principles from Walter and Briggs (2012), derived from analysing 35 evidence-based studies of teacher professional development. These might possibly be a useful starting point for considering CPD strategy, as the principles are clear, unfussy, few, and applicable beyond teacher English to all curriculum subjects.
Walter and Briggs’ study concludes that the professional development that makes the most difference to teachers:

- is concrete and classroom-based
- brings in expertise from outside the school
- involves teachers in the choice of areas to develop and activities to undertake
- enables teachers to work collaboratively with peers
- provides opportunities for mentoring and coaching
- is sustained over time
- is supported by effective school leadership

(Walter and Briggs 2012 p1)

The need to address disconnects in CPD provision

We have noticed and discussed earlier a number of apparent disjuncts in the current teacher education landscape. The effect of this is a general lack of joined-up thinking between different providers of CPD. We have noted a lack of congruence:

- within PRESETT, not everyone following the national curriculum
- between PRESETT certificates and gateway qualifications for a teacher of English
- between PRESETT and INSETT: INSETT courses do not always build on knowledge and skills of PRESETT graduates. PRESETT providers are not always aware of the INSETT landscape
- within certificates eligible for salary bonus
- between the CPD purpose of government and donor-led CPD providers
- between standards for general state school and Presidential school teachers
- within the 17 approved CPD activities
- between Avloniy competencies and teacher standards
- between the purpose of some government-prescribed INSETT courses, their content, and the means through which they are taught.

We note also that Avloniy, the main CPD provider, is short of human resources, time and ELT expertise (Appendices 13 and 22). They report themselves that although they are working extremely hard, this shortage has affected the coherence and thus the quality of their work. Three examples of the impact of shortage of resources follow:

Firstly, though Avloniy now check IP addresses for online courses, it is still possible to impersonate using someone else’s device. In addition, Avloniy do not have the resources to check names of course takers. This means that it is possible for teachers to take the same course the following year. This is more likely in the current situation in which only 2 course types run by state providers for teachers of English exist at the moment.

Secondly, there is no assessment of pass/fail and apparently no requirement to submit assignments, though teachers are not able to skip online course content. It is therefore possible for teachers not to engage fully with course content.
Thirdly, Avloniy have told us that their diagnosis of teacher needs via multiple choice questions is still work in progress (Appendix 12). We are therefore currently unsure how effective diagnosis of needs is, and what degree of choice teachers have on course selection in relation to needs identified.

All 3 examples suggest that this makes reliable and useful monitoring and evaluation of both learning and accountability problematic. We discuss monitoring and evaluation further in section 10.

Quality dimension 3: The extent to which CPD provision is sustainable in its current form

The need to include online learning as an ingredient of CPD provision
One form of CPD provision, namely online CPD, does seem to us to be sustainable. The teacher questionnaires provide evidence that some teachers enjoy and benefit from online study. We have anecdotal evidence from conversations with Uzbek colleagues that online courses are also appreciated by some in remote areas for their convenience and sometimes for their content. Online CPD provision alone, however, is clearly insufficient, as not everyone will have good internet access or literacy, and some teachers are likely to benefit as much or more from other modes of professional learning. For the future, therefore, it appears that online learning should form part of a range of CPD options for teachers of English.

We therefore recommend that online CPD provision continues to form part of the CPD landscape for teachers of English in Uzbekistan.

The need to build system capacity for CPD provision at school and national level

We discuss this in more detail in Section 11 below.

The need to base INSETT courses on teacher needs and to follow courses up with teacher support in order to achieve impact
Although Avloniy diagnose teacher needs via multiple choice questions, we do not know how valid its diagnosis is, as we have not seen the questions ourselves. Given that Avloniy is limited in the range of courses it can offer to teachers of English, we wonder about their value as a needs diagnosis tool at present, but can see that they may be useful in the longer term.
As far as we can see, other INSETT courses are based on legal and administrative imperatives derived from government decree. This prioritises the accountability dimension of professional learning seen from the perspective of national decision-makers over needs seen through the eyes of teachers. Accountability is clearly an important consideration in professional learning, but as we have argued above, an ability to cater to the professional learning dimension of CPD also forms parts of the quality picture.

We have observed that courses are not targeted at specific types of teacher, e.g. teachers of Grades 1-4 or early career teachers. If the purpose of courses is to transmit knowledge, then carefully targeted courses are arguably indicative of quality, as they meet this purpose. If CPD initiatives are mainly school-based and in line with context and teachers’ needs, teachers are more likely to welcome and follow them up. Both of these measures would strengthen the notion for course providers; and for teachers’ of CPD as a journey with a purpose and an intended destination.

Lamb’s experience (1995), writing about interviewing course participants from an INSETT course in Indonesia during evaluation one year later, is a good example of how courses designed by course providers without a needs analysis can be well received by teachers at the time of attendance, but may have little or no long term impact. He reports that there was minimal transfer of practices recommended by the course. The 2 main reasons for this, he argues, are that the course was based on what providers rather than teachers thought was important, and that there was no follow-up in school with teachers after the course.

Waters and Vilchez (2000) discuss a school-based follow-up development programme (SFDA) in the Philippines. The intention of SFDA was for the course to function not just as an end in itself, but also as a means of enabling and encouraging longer-term school-based learning. They authors point to a number of direct and indirect benefits for course impact from the follow-up. Lange (2013), writing about a cascade course follow-up in Cameroon, also underlines the value of post-course support in building bridges between course content and school reality.

The need to support early career teachers (ECTs)
A related point to the one in the previous section is the need to support early career teachers, who we consider to be teachers in their first 2 years of teaching (See https://getintoteaching.education.gov.uk/support-for-early-career-teachers/).
Anecdotally, we have heard that such teachers are typically left to sink or swim when they start their teaching career. A mentoring scheme and or targeted courses for ECTs would be one way of adding quality to CPD for teachers of English. We have heard both informally and formally (Appendix 22) that many graduates enter teaching as a profession of last resort. It is therefore possible that some of those who do become teachers are weaker PRESETT graduates. In this scenario, the need for, and potential value of, mentoring and support is underlined.

The need to support teacher educators
We have spoken to a number of committed Uzbek teacher educators and scrutinised feedback given in the teacher surveys on courses taught by Uzbek teacher educators. We have noted positive feedback in the teacher questionnaires (Appendix 11). However, as noted earlier, we have also heard doubts about the skill and expertise of teacher educators. Some of the INSETT course materials also suggest a lecture-based mode of education. The ability to lecture well is a key skill for teacher educators, but so are abilities to facilitate, and to teach interactively. It seems anomalous to us that there are standards for teachers, but as far as we can see, none for teacher educators.

We recommend that MPSE considers supporting professional development for teacher educators. It could usefully do this by designing, with outside help if necessary, a trainer development course, and developing teacher educator standards. The British Council CPD framework for teacher educators https://www.teachingenglish.org.uk/publications/resource-books/cpd-framework-teacher-educators could perhaps serve as starting point, though we would recommend a far more concise and less hierarchical framework of 2-3 pages maximum for ease of reference.

Making available a set of common core reference materials for INSETT providers would be a low cost, low maintenance way of helping teacher educators to continue with their own professional learning. We have illustrated what this might consist of via an annotated set of references in Appendix 9.

**Developing a costed light-touch monitoring and evaluation system**

Monitoring and evaluation is a major concern of colleagues in MPSE (Appendix 23). They are concerned to base CPD policy and strategy on evidence, and are also aware that it is not feasible or desirable to monitor and evaluate everything. Colleagues at Avloniy also see monitoring and evaluation as a high priority. They have informed us that they are able to monitor quantity to some extent - e.g. course attendance, how long teachers spend on courses and course tasks. Their hope is that computer algorithms will increasingly be able to yield and analyse quantitative data. They say that analysing qualitative data is much more complex, particularly as it requires human involvement, and they are short of human resources.

A common thread with both responses from key CPD decision-makers here is that they are working with finite financial and human resources. It seems therefore that while computers can continue to work with quantitative data, a light touch monitoring and evaluation system would provide qualitative data, and would balance the focus on accountability with the concern for finding out about the nature and quality of professional learning.

One way to develop a light touch monitoring and evaluation system would be to base this at school level. If credits were given for school-based CPD, teachers could complete a portfolio of learning based on school activity such as shared materials writing, teacher clubs, mentoring, and article discussion. They could submit these portfolios for review by Heads at school level. Option 6 in the Presidential school standards could usefully serve as an example of how such monitoring might work at school level. Following review,
teachers could send a brief and simple digital summary to a regional or national platform of any learning in the year which was valuable and why. They could then outline a possible CPD activity they wish to do attached to a pedagogical question or goal for the following school year. Regional educational authorities could sample such information and provide a brief overview to Avloniy and MPSE, possibly with reference to principles of CPD policy. As Avloniy is able to expand its range of course provision, it could use this information to inform future course design linked to pedagogical questions and priorities which emerge from data.

Even a light-touch monitoring and evaluation system requires dedicated resources and funding. This is because it is easy for monitoring and evaluation to be compromised when competing against other CPD priorities if monitoring and evaluation funding is infused into an overall CPD budget. We therefore suggest that MPSE earmark a dedicated monitoring and evaluation budget within its overall CPD funding and strategy. This would enable it to use resources to translate monitoring and evaluation intentions into corresponding action.

Both of these recommendations are in line with our recommendations in the previous section recommending need-based course design and school follow-up.

**The need to support the main INSETT provider**
Avloniy colleagues are working with a high degree of professionalism and skill. However, they have also explained that they are working in a new landscape, and are keen to learn even more about online course design, with regard to content, materials and tasks for teachers of English. ([Appendix 13](#)).

The only Uzbek CPD initiative we have found which puts professional learning firmly in the picture, is the Presidential School teacher standards (see above). All 7 standards are linked to performance descriptors. This document is also the only evidence we have found with Uzbek CPD provision of thinking as CPD as a journey. Its focus on processes seem to us relatively low cost and low maintenance, and so amenable to light touch monitoring and evaluation.

### Quality Recommendations

**Quality dimension 1: The balance between CPD focus as professional accountability and CPD as professional learning**

We recommend that

**Recommendation 1**
MPSE considers the extent to which the Presidential School standards, attitude to and provision for CPD is transferable to teachers in general government state schools.

**Quality dimension 2: CPD coherence**
We recommend that

**Recommendation 1**
MPSE considers articulating a CPD strategy based on stated principles to underpin a national CPD policy

**Recommendation 2**
MPSE address disconnects in CPD provision as outlined on pp 54-55 of this report

**Quality dimension 3: CPD sustainability**

We recommend that

**Recommendation 1**
Online learning continues to form part of CPD provision for teachers of English.

**Recommendation 2**
MPSE investigate the feasibility of developing a light touch monitoring and evaluation system based on the features laid out on pp 57-58 of this report, using the Presidential school standards as a starting point for action.

**Recommendation 3**
MPSE build in a costed monitoring and evaluation budget within their overall CPD budget, so that a concern for monitoring and evaluation is integrated into both planning and action.

**Recommendation 4**
CPD provision in general should be needs-based and should provide for follow-up support at school level in order to strengthen teacher independence, critical thinking, and impact in the classroom.

**Recommendation 5**
MPSE investigate options for supporting early career teachers their teaching via options such as mentoring or a specialised course.

**Recommendation 5**
MPSE create standards for teacher educators, so that there are clear criteria for the appointment of trainers on all approved INSETT programmes.

**Recommendation 6**
MPSE establish certificated trainer development courses so that all trainers are qualified for their role.
Recommendation 7
MPSE establish trainer competencies to support ongoing teacher educator professional development.

Recommendation 8
MPSE support Avloniy with INSETT course design for teachers of English through partnership with an overseas institution. British Council and ACCELS could advise on possible partners if MPSE wished to investigate the feasibility of partnership with a UK or US institution.

Towards implementation: planning and strategy

We include this section on implementation as an aid to the challenging process of moving from theory and policy to action and practice.

(a) Policy and Strategy

i. Possible ways of building system capacity for CPD provision at school and national level

British Council, Avloniy, Uzbek and American donors have all told us that CPD provision for teachers of English faces capacity issues. The major INSETT and CPD initiatives in the country are donor-led and labour-intensive. This is particularly the case with the large-scale ESN cascade project. We are not aware yet of credible plans to support Uzbeks in leading CPD provision at national level given the evident shortage of funding and human resources.

One option to sustain CPD provision would involve a clearly costed and timebound sustainability plan. This could include such elements as:

- support for processes that enable CPD at school level (e.g. mentoring, teacher clubs, sharing in communities of practice)
- supporting and training Heads to create a school climate conducive to professional learning.
- strengthening institutions which have a CPD remit.
- strengthening the current cadre of INSETT trainers.
- publicising via a Telegram channel a repository of free online CPD resources (e.g. videos, articles, materials for discussion).
- coordinating donor-led project exit
strategies with key CPD players such as MPSE, Avloniy, and Training and Retraining Institutes. This may involve, for example

➢ creating or strengthening conditions to maintain the involvement of ESN Master trainers and regional mentors who have worked on ESN.
➢ donors and Uzbek colleagues planning CPD work in tandem, with 3 parallel focuses on the organisation of any CPD courses in terms of
  a. overall aims and organisation
  b. the fit of these with the classrooms teachers are working in
  c. long-term strategies to help teachers to adapt and apply their learning when they return to their classrooms.

This is akin to Wedell’s concept of parallel planning (2005).

• continuing with ERSG, with a view to it moving beyond sharing information to regular action planning.
• considering the feasibility of forming and trialling a CPD for English Policy and Implementation Alignment Action Unit to bring together policy makers and representatives from schools, CPD providers and other key stakeholders. This could consist of at least 2 people. They should be given a specific brief, possibly for a finite period, to design policy and action to align policy and implementation for CPD for teachers if English. They could be a body within MPSE, or possibly an ad hoc group composed of representatives from different sectors, e.g., a Ministry, Avloniy, state training and retraining providers, Champions Panel representatives, PRESETT providers etc. They should meet either intensively or at regular periods of time over a specified period to agree, formulate and align CPD policy for English by a given date. They would review their work at regular intervals. If this pilot worked, it could be used for CPD policy and practice alignment for other curriculum subjects.

ii. Ways of linking policy and strategy to professional realities

Decisions at policy level are sometimes not implemented or are distorted in their implementation because they are not understood or not well communicated. In addition to the measures suggested in (i) above to address this gap, we recommend that each school be asked to identify a CPD ‘champion’, who would be responsible for organising CPD initiatives within the school. She/he would need to keep abreast of policy at national level as well as issues at school and local level. Ideally, this would be a committed teacher, probably with experience of INSETT and other CPD activities such as mentoring early career teachers. Such an appointment would take some weight off the shoulders of School Heads, many of whom commented in or survey on their workload.

We also see a continuing role for the British Council’s ‘Champions Panel’ in advising on implementation strategies for CPD at national, regional and school level. Several members of the panel are experienced ELT professionals who have been key contributors to the British Council’s English Reform Project over many years but, crucially, it also includes practising teachers and teacher trainers who have a keen interest in moves towards strengthening the CPD landscape.
(b) Practical strategies and activities

i. CPD-friendly activities
When teachers engage with their own beliefs and practices in a supportive environment, the potential for CPD is present. Some CPD-oriented activities include:

- peer lesson observation and feedback
- researching one’s own classes
- keeping a diary or journal
- keeping a portfolio recording events, experiences, lesson notes, materials designed etc
- reflecting on teaching and learning
- taking active part in exchanges of experience through a teacher’s club or online forum
- professional reading and discussion
- writing a professional article
- preparing a talk or a presentation for a local or regional conference
- taking feedback from learners and discussing it with them and with colleagues

The list is not exhaustive, of course, but what all these options have in common is the potential for depth of thinking and engaging with beliefs, values and attitudes in relation to learning and teaching.

ii Portfolio: contents and purpose
A portfolio is a particularly useful way of keeping professional development records over a career-long journey such as the one we illustrated in Section 8 above. Whether a teacher uses a loose-leaf folder or an electronic equivalent, it can be used to document each completed CPD activity, along with evidence (e.g. course certificates), other documentation (e.g. notes on observation and feedback, lesson plans, etc) as well as reflection on teaching experience.

It is worth noting that portfolios are a professional development tool which has potential for adoption by teachers of any subject across the school curriculum.

The main purposes of a portfolio
- a way of documenting a teacher’s professional development over an entire career
• a way of making development conscious and visible
• a basis for a teacher to discuss evolving CPD needs with colleagues and/or a head teacher
• an incentive for teachers to reflect on their practice and to take pride in professional achievements
• it offers a look at development over time, helping one see teaching as an ongoing process of inquiry, experimentation, and reflection.

A portfolio may typically include any of the following, with supporting evidence wherever possible:

<table>
<thead>
<tr>
<th>• a selection of lesson plans with post-lesson reflections</th>
<th>• a record of professional reading</th>
</tr>
</thead>
<tbody>
<tr>
<td>• a teaching diary (e.g. documenting critical classroom incidents, what a teacher has learned through practice)</td>
<td>• a teaching diary (e.g. documenting critical classroom incidents or what a teacher has learned through practice)</td>
</tr>
<tr>
<td>• feedback from learners</td>
<td>• teacher-produced materials with learner feedback</td>
</tr>
<tr>
<td>• notes on lessons observed by a supervisor</td>
<td>• conferences attended with attendance certificate</td>
</tr>
<tr>
<td>• notes on future development/training needs</td>
<td>• papers written for a professional journal</td>
</tr>
<tr>
<td>• notes on reciprocal peer observation and feedback</td>
<td>• recordings (video or audio) of lessons or lesson segments</td>
</tr>
<tr>
<td>• a comment on changes made in teaching with reasons</td>
<td>• records of mentoring/being mentored</td>
</tr>
<tr>
<td>• courses completed with accompanying certificates</td>
<td>• (for PRESETT students) a record of completed assignments</td>
</tr>
</tbody>
</table>

Some benefits of keeping a portfolio

It is important to see portfolios both as a professional requirement, from a system and whole-school perspective, and as a practical means for each individual teacher to keep track of their CPD over time. In this way they offer a win-win perspective on CPD and should be presented this way rather than as a bureaucratic requirement.

Personal/Developmental Benefits:

• making a teacher’s CPD conscious, concrete and accessible;
• enhancing a teacher’s pride in belonging to a profession
• providing a chronological record of stages in a teacher’s CPD over time, thereby emphasising the view of CPD as a career-long journey

www.britishcouncil.org
Formal/Accountability-Related Benefits:

- a basis for an annual appraisal meeting with School Head or other senior colleague;
- may contribute to a salary bonus if activities gain credit points;
- may provide a basis for connecting individual development with whole-school development.
- it is portable and may be useful to a teacher and a prospective employer when the teacher applies for a new post.

As portfolios would be an innovation for teachers, schools and administrators, they would need to be introduced carefully. We suggest the following measures:

- introducing portfolio-based assessment in Years 3 and 4 of PRESETT courses; thereby familiarising trainee teachers with portfolios as a developmental tool before they take up their first teaching post
- training for School Heads in the purposes and benefits of portfolios and also the role they need to play in supporting rather than judging their teachers; they will also need training in how to conduct appraisal based on the portfolio
- offering mentor support to new teachers in how to use portfolios
- possibly provide teachers with loose leaf folders or ring-binders for their portfolios (cost involved but this would be an incentive)
- alternatively, provide a simple electronic template for an online portfolio (see next page for an example)
- provide all teachers, teacher-mentors and trainers with an introductory information sheet about portfolios, to be followed up by school-based training when Heads are informed, trained and ready.

A sample of what a portfolio template might look like now follows. The name and school are purely fictional. The chronological sequencing of activities is intended to support the notion of CPD as a journey.
Sample Portfolio Template

Your Name and School:  Oybek Muhammedov,  School no 32, Samarkand

School Year:  2023-4

Your CPD plans for this school year:
To learn how to use the new textbook.  To attend at least one course.  To join the teachers’ club in our part of Samarkand.

Record of Activities:

<table>
<thead>
<tr>
<th>Date</th>
<th>Activity or other entry*</th>
<th>Your comments and reflections; evidence*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct 12</td>
<td>First lesson with new textbook</td>
<td>Difficult to use. I will ask Dilfuza if I can observe her lesson with the book</td>
</tr>
<tr>
<td>Oct 21</td>
<td>Observed Dilfuza’s class and asked questions afterwards.</td>
<td>Very helpful. I understood how to integrate grammar work. My notes are in the folder.</td>
</tr>
<tr>
<td>Nov 15</td>
<td>Two-day workshop on how to use the books.</td>
<td>I learned a lot, but I didn’t understand everything the American trainer said because he spoke very quickly. A copy of my certificate is in the folder.</td>
</tr>
<tr>
<td>Jan 22</td>
<td>Went to Teachers’ club for article discussion. I read the article by Jeremy Harmer before the meeting.</td>
<td>I was a bit nervous because everyone was more experienced than me. But it was good to meet other teachers. Copy of article is in the folder.</td>
</tr>
<tr>
<td>Jan 30</td>
<td>Meeting of English teachers in school to discuss exam results.</td>
<td>It was useful to agree what we need to do to improve results. Notes on the meeting are in the folder together with my notes for action.</td>
</tr>
</tbody>
</table>

* Each entry should be supported by documentary evidence of some kind.
Recommendations for Implementation

We recommend that:

Recommendation 1
MPSE work urgently on building sustainable capacity and awareness of CPD across the education system, drawing on suggestions in Section (a) above.

Recommendation 2
all key providers and stakeholders work, within the framework and remit of the English Reform Steering Group, towards a shared vision of CPD in order to bridge the gap between policy and practice.

Recommendation 3
MPSE require each school to appoint a ‘CPD Champion’ to be responsible for all aspects of school-based CPD.

Recommendation 4
The British Council continue to convene the CPD Champions Panel, members of which are well-placed to advise MPSE on CPD and to help to drive the initiative forward

Recommendation 5
MPSE consider trialling portfolios, as a concrete step towards a wider understanding of CPD, for a one- or two-year period and, if they are successful, implementing them at scale and possibly for teachers of all subjects across the school curriculum.

Cabinet decree of 19 Jan 2022 Decision on Additional Measures To Improve The Study Of Foreign Languages

O’ZBEKISTON RESPUBLIKASI VAZIRLAR MAHKAMASINING QARORI
XORIJY TILLARNI O’RGANISHNI TAKOMILLASHTIRISH BO‘YICHA QO‘SHIMCHA CHORA-TADBIRLAR TO‘G’RISIDA

Mamlakatimizda xorijiy tillarni o’rgatishni ommalashtirishni yangi bosqichga olib chiqish va sohansi rivojlanishish uchun tizimli ishlanma tashkil etish, ulg’ayib kelayotgan yosh avlodni har tomonlama barkamol qilib tarbiyalash, buning uchun uchun barcha shart-sharoitlarni yaratish maqsadida Vazirlar Mahkamasi qaror qiladi:

1. O’zbekiston Respublikasi Moliya vazirligi, Xalq ta’limi vazirligi va Vazirlar Mahkamasi huzuridagi Xorijiy tillarni o’rganishni ommalashtirish agentligining (keyingi o’rinlarda — Agentlik) “2022-yil uchun O’zbekiston Respublikasining Davlat budjeti to‘g’risida” O’zbekiston Respublikasining Qonuni bilan Xalq ta’limi vazirlikga Xalq ta’limi sohasidagi islohotlarga ko’maklashish jamg’armasi uchun ajratiladigan mablag’lar hisobidan Agentlikning budjetidan tashqari jamg’armasiga (keyingi o’rinlarda — Jamg’arma) bir martalik 15,0 mlrd so’m miqdoridagi moliyaviy ko’mak mablag’larini ajratish to‘g’risidagi taklifiga rozilik berilsin.

2. Belgilansinki, Jamg’arma Davlat budjetidan ajratilgan mablag’lar quyidagi maqsadlarda foydalaniladi:
dunyo bo'yicha samarali natija bergan o'qitish metodikalarini, dastur va darsliklarni maktabgacha ta'lim tashkilotlari, umumta'lim maktablari, akademik litseylar, oliy ta'lim muassasalari va o'quv markazlarida joriy etish;

xorijiy davlatlarda chop etiladigan zamonaviy o'quv va ilmiy adabiyotlar, darsliklar hamda o'quv qo'llanmalari, xalqaro testlar va ularni joriy qilish uchun tegishli ruxsatning ko'rsatilgan kontentlari mualliflik huquqlarini xarid qilish;

xorijiy tillarni o'rganishni ommalashtirish faoliyatiga axborot-kommunikatsiya texnologiyalari, dasturiy ta'minot loyihalarini ishlab chiqish va joriy etish;

xorijiy tillarni puxta o'zlashish, tilning asosiy ko'nikmalarini shakllantirish uchun videorolik, o'yin, ko'ngilochar ko'rsatuv, filmlar va boshqa o'qituvchilarni ta'minlash uchun moliyalashtirish;

Agentlik balansidagi bino va inshootlarni saqlash, ulardan foydalanish, qurish va ta'mirlash, zarur anjomlar, shu jumladan mebel, aloqa, kompyuterlar va boshqa vositalar bilan ta'minlash bo'yicha bo'lish bo'yicha xarakatlar.

Agentlik xodimlarini moddiy va ijtimoiy qo'llab-quvvatlash, O'zbekiston Respublikasi Prezidenti va Vazirlar Mahkamasining hujjatlari hamda topshirilgicha belgilangan vazifalarni amalga oshirish.

3. Vazirlar Mahkamasining “Xorijiy tillarni o'rganishni ommalashtirishni samarali tashkil etish chora to'g'risida” 2021-yil 19-maydagi 312-son qaroriga muvofiq Qoraqalpog'iston Respublikasi Vazirlar Kengashi, viloyatlar va Toshkent shahar shahrining hujjatlari hamda topshiriqlarida belgilangan vazifalarni amalga oshirish bilan bog'liq bo'lish;

Bunda Qoraqalpog'iston Respublikasi Vazirlar Kengashi Raisi, viloyatlar va Toshkent shahar hokimlari ushbu mablag'larni:

2021-yil yakunlari bo'yicha Qoraqalpog'iston Respublikasi respublika budjeti, Toshkent shahar va viloyatlar mahalli budjetlarida shakllangan erkin goldiy mablag'lar hisobidan joriy yiling 15-fevraliga qadar;

2022-yil uchun joriy yiling 15-iyuliga qadar ajratish choralarini ko'rsin.

4. Agentlik Vazirlar Mahkamasining huzuridagi Ta'lim sifatini nazorat qilish davlat inspeksiya, Maktabgacha ta'lim vazirligi, Xalq ta'limi vazirligi, Oliy va o'rtas maxsus ta'lim vazirligi bilan birgalikda:

ikki oy muddatda uzluksiz ta'lim tizimida chet tilini o'qitishning o'quv-metodik majmularini o'quvchilarining asosiy til ko'nikmalarini (tinglab tushunish, o'qish, yozish va gapirish) shakllantirishni nuqtai nazaridan to'liq qayta ko'rib chiqsin;

malakali mutaxassislarni jalg undan holda 2021-yil 1-martdan boshlab chet tilini bo'lish bo'yicha mablag'lar ichkiy yiling 15-iyuliga qadar ajratish.

www.britishcouncil.org
5. O'zbekiston Respublikasi Xalq ta'limi vazirligi:

2022/2023 o'quv yiliidan boshlab umumiy o'rta ta'lim tashkilotlari uchun zamonaviy til o'rgatish metodikalarini asosida ishlab chiqilgan chet tili darsliklarni to'liq chop etish va ta'lim tashkilotlariga yetkazish choralarini ko'rsin;

yangi darsliklardan foydalanish metodikalar bo'yicha o'qituvchilar va metodistlar uchun malaka oshirish kurslarini tashkil etsin.

6. Agentlik hamda O'zbekiston Respublikasi Oliy va o'rtas maxsus ta'lim vazirligining 2022/2023 o'quv yili qabulidan boshlab xorijiy tillar bo'yicha mutaxassislarni tayyorlashga ixtisoslashgan O'zbekiston davlat jahon universitetlari, Samarqand davlat chet tillar instituti, Toshkent davlat sharqshunoslik universitetining (fanlar majmuasi) chet tili darsliklarni to'liq chop etish va ta'lim tashkilotlariga yetkazish choralarini ko'rsin;

yangi darsliklardan foydalanish metodikalar bo'yicha o'qituvchilar va metodistlar uchun malaka oshirish kurslarini tashkil etsin.

Bunda ushbu bandning birinchi xatboshisida ko'rsatilgan oliy ta'lim muassasalariga:

Vazirlar Mahkamasining “Oliy ta'lim muassasalariga o'qishga qabul qilishda milliy va xalqaro baholash tizimlari sertifikatlarini tatbiq qilish chora - tadbirlari to'g'risidagi taklifi ma'qullansin.

Bunda ushbu bandning birinchi xatboshisida ko'rsatilgan oliy ta'lim muassasalariga:

Vazirlar Mahkamasining “Oliy ta'lim muassasalariga o'qishga qabul qilishda milliy hamda xalqaro baholash tizimlari sertifikatlarini tatbiq qilish chora - tadbirlari to'g'risidagi taklifi ma'qullansin.

7. Oliy va o'rtas maxsus ta'lim vazirligining 2022/2023 o'quv yiliidan boshlab umumiy o'rta, o'rtacha maxsus va professional, shuningdek, maktabdan tashqarida ta'lim tashkilotlari chet (ingiliz, fransuz, nemis, ispan, italyan, arab, xitoy, yapon, coreiya, turk, fors, pushtu, dari, urdu hind) tili darsliklarining ta'sisat sistemi yarajonida o'quv fanni bo'lishgan o'qituvchilarning va o'qituvchilarining fikrlarini kiritish, o'qish, yozish, gapirish hamda yordamni ko'rsatishga oshiriladi.

8. Belgilansinki, 2023-yil 1-yanvardan boshlab maktabgacha, umumiy o'rtasi, o'rtacha maxsus va professional, shuningdek, maktabdandan tashqarida ta'lim tashkilotlari chet (ingiliz, fransuz, nemis, ispan, italyan, arab, xitoy, yapon, coreiya, turk, fors, pushtu, dari, urdu hind) tili darsliklarining ta'sisat sistemi yarajonida o'quv fanni bo'lishgan o'qituvchilarning va o'qituvchilarining fikrlarini kiritish, o'qish, yozish, gapirish hamda yordamni ko'rsatishga oshiriladi.

9. Agentlik, Vazirlar Mahkamasining 2022/2023 o'quv yiliidan boshlab umumiy o'rtas maxsus, o'rtacha maxsus va professional, shuningdek, maktabdandan tashqarida ta'lim tashkilotlari chet (ingiliz, fransuz, nemis, ispan, italyan, arab, xitoy, yapon, coreiya, turk, fors, pushtu, dari, urdu hind) tili darsliklarining ta'sisat sistemi yarajonida o'quv fanni bo'lishgan o'qituvchilarning va o'qituvchilarining fikrlarini kiritish, o'qish, yozish, gapirish hamda yordamni ko'rsatishga oshiriladi.
qonunchilik hujjatlarida belgilangan minimal stavkasining 50 foizi miqdoridan ko'p bo'Imagan miqdorda Davlat budjeti maabl'ari hisobidan qoplab berish tartibini joriy etish;

vazirlik va idoralar tizimidagi kollej va texnikumlarning bino va inshootlarida faoliyatini amalga oshirganida ijara to'lovidan ozod etish (saqlash va kommunal to'lovlar bo'yicha xarajatlarni bundan mustasno) to'g'risidagi taklifiga rozilik berilsin.

10. 2022-yil 1-mayga qadar:

Vazirlar Mahkamasi huzuridagi Ta'lim sifatini nazorat qilish davlat inspeksiyasi xalqaro tan ollangan baholash tashkilotlari bilan hamkorlikda pedagog kadrning malaka toifasini olish bo'yicha chet tili o'qituvchilarining malaka sinovlarida tushunish, o'qish, yoqish hamda gapirish kompetensiyalarini baholash tizimini ishlab qilish;

Agentlik Axborot texnologiyalari va kommunikatsiyalarini rivojlantirish vazirligi bilan birgalikda xorijiy tillarni bilish va xorijiy til o'qituvchilarining malaka va ko'nkimlarini baholovchi miliy va xalqaro tizimda faoliyatini amalga oshirgan sertifikatlarning Yagona elektron bazasini ishlab qilish va amaliyotga joriy etsin.

11. Agentlik, Vazirlar Mahkamasi huzuridagi Ta'lim sifatini nazorat qilish davlat inspeksiyasi hamda Xalq ta'limining S1 darajadagi miliy yoki unga tenglashtirilgan mos darajadagi xalqaro tan ollangan sertifikatga ega rus tili fani o'qituvchilarining malaka o'ziga yoki davomida qonunchilik hujjatlarida belgilangan tartibda ustama to'lash tartibini 2022-yil 1-fevraldan boshlab joriy etish to'g'risidagi taklifiga rozilik berilsin.

12. Agentlik tuzilmasida umumiy shtat birliklari doirasida 3 ta shtat birligidan iborat Xorijiy tillarni bilish darajasi to'g'risidagi sertifikatlarni yagona bazasini yuritish bo'limi tashkil etilsin.

Agentlik direktoriga boshqaruv xodimlarining belgilangan umumiy soni va mehnatga haq to'lash fondi doirasida Agentlikning markazi apparati tuzilmasiga o'zgartirishlar kiritish huquqi berilsin.

#### Трудовые действия

- Проектирование образовательного процесса на основе Государственного образовательного стандарта общего среднего образования с учетом особенностей социальной ситуации развития учащихся
- Формирование у детей социальной позиции обучающихся на всем протяжении обучения в школе
- Формирование метапредметных компетенций, умения учиться и универсальных учебных действий до уровня, необходимого для освоения образовательных программ среднего специального, профессионального и высшего образования
- Объективная оценка успехов и возможностей обучающихся с учетом неравномерности индивидуального психического развития детей, а также своеобразия динамики развития учебной деятельности мальчиков и девочек
- Организация учебного процесса с учетом своеобразия социальной ситуации развития учащихся
- Корректировка учебной деятельности исходя из данных мониторинга образовательных результатов с учетом неравномерности индивидуального психического развития детей младшего, среднего и старшего школьного возраста

#### Необходимые умения

- Реагировать на непосредственные по форме обращения детей к учителю и распознавать за ними серьезные личные проблемы
- Ставить различные виды учебных задач (учебно-познавательных, учебно-практических, учебно-игровых) и организовывать их решение (в индивидуальной или групповой форме) в соответствии с уровнем познавательного и личностного развития учащихся младшего, среднего и старшего возрастов, сохраняя при этом баланс предметной и метапредметной составляющей их содержания
- Во взаимодействии с родителями (законными представителями), другими педагогическими работниками и психологами проектировать и корректировать индивидуальную образовательную траекторию обучающегося в соответствии с задачами достижения всех видов образовательных результатов (предметных, метапредметных и личностных), выходящими за рамки программы общего среднего образования

Presidential school standards

Prezident ta’lim muassasalari agentligi direktorining 2022-yil _____-oktayrbdagi _____-son buyrug’iga 1-ILOVA

Prezident ta’lim muassasalari agentligi tizimidagi maktablar o’qituvchilariga qo’yladigan
KASBIY TALABLAR

1-bob. Umumiy qoidalar

1. Mazkur kasbiy talablар o‘quvchilarning sifatlari ta’lim olishlarini ta’minlash maqсадida o‘qituvchida kasbiy kompetensiyalar shakllanishi uchun zarur bilim, ko’nikma va malakalar majmuini, samarali pedagogik faoliyatning asosiy ko’rsatkichlarini asosiy ko’rsatkichlarini belgilab beradi.

3. Ushbu kasbiy talablарда quyidagi asosiy tushunchalar qo’llaniladi:
o'qituvchining kompetensiyasi – o'qituvchining egallagan bilim, ko'nikma va malakalarini o'z shaxsiy, kasbiy va ijimoiy faoliyatida amaliy qo'illay olish imkoniyati;

fidbek (inglizcha “feedback”) - shaxs yoki faoliyatning xatti-harakatlari natijalari to'g'risidagi jarayonni yaxshilash maqsadida uni tahlil qilish, muhokama qilish, kamchiliklarni atroflishcha asoslash va hal etish maqsadida bildiriladigan fikr-mulohazalar yig'indisi;

fasilitator (inglizcha “osonlashtirish”, “jarayonni soddalashtirish”) - maqsadga samarali erishishni ta'minlash uchun guruh tadbirini rejlashtiradigan, yo'naltiradigan va boshqaradigan shaxs (u muhokamaning borishini, fikrlarning ravshanligini va barcha ishtirokchilarining ishtirokini nazorat qiladi);

refleksiya – insonning o'zining tomomidan uning o'zini, qarashlari, xislatlari, tajribasi va harakatlarini o'zaro munosabatlarini o'rganish jarayoni. Refleksiya insonning o'zini va qanday qilib oldinga harakatlanishini tushunishga yordam beradi.

ta'limga muhitı – o'qituvchi va o'quvchilar tomonidan yaratilgan ta'limga madaniyati va ma'naviy muhitı, baholash va sinfni boshqarish kabi ta'limga turli yordam usullari;

xavfsiz ta'limga muhitı – ta'limga, tarbiya va shaxsiy rivojlanish uchun barcha ishtirokchilarining ma'naviy, muammolarni ijobiy hal qilish imkoniyatini beruvchi ko'nikmalar;

kommunikativ ko'nikmalar (muloqot qobilibiyati) – boshqa shaxs bilan muloqotga kira olish va uni kerakli darajada saqlashga yordam beradigan barcha ko'nikmalar;

o'quvchining axloqiy ko'nikmalari – vaziyatga moslashuvchanchik, hayotdagi muammolarni ijobiy hal qilish maqsadiga beruvchi ko'nikmalar;

2-bob. Kasbiy talablarning asosiy va vazifalari

4. Kasbiy talablarning asosiy maqsadı o'qituvchiga qo'yiладigan kasbiy talablar va majburiyatlarini belgilab berishdan iborat.

5. Kasbiy talablarning asosiy vazifalari quyidagilardan iborat:

o'qituvchida kasbiy kompetensiyalar shakllanishi uchun zarur bilim, ko'nikma va malakalar majmuini, samarali pedagogik faoliyatning asosiy ko'rsatkiqlarini belgilab berish;

o'quvchini pedagogik ish uchun o'shish va samaradorlik darajasi oshirishga asos bo'lib xizmat qilish;

www.britishcouncil.org
Prezident ta’lim muassasalari agentligi tizimidagi maktablarga raqobatbardosh, yuqori malakali pedagog xodimlarni ishga jalb etishda o’tkazuvchilar salohiyatining “Umumiy o’rtta ta’lim maktab o’qituvchisi kasb standarti” talablariga muvofiqlashtirish.

Ushbu kasbiy talablar quyidagi foydalanuvchilarning keng doirasi uchun mo‘ljallangan bo‘lib, ular:

o’qituvchiga kasbgiga yo‘yladigan talablar tushunishda, o‘z kasbiy faoliyatini tahlil qilish va o‘zini o‘zi baholashda asos bo‘lib xizmat qiladi. Baholash va tahlil natijalari asosida o‘z kasbiy rivojlanishini rejalaştiradi;

ish beruvchi (maktab direktor)ga lavozim yo‘riqnomalarini ishlab chiqish, o‘qituvchilarning malakasini oshirishni rejalaştirish va Maktab baholash komissiyasining faoliyatini tashkillashtirishda xizmat qiladi;

Prezident ta’lim muassasalari agentligi (keyingi o’rinlarda – Agentlik) huzuridagi Pedagogik mahorat va xalqaro baholash ilmiy-amaliy markazi (keyingi o’rinlarda – Markaz)ga pedagog xodimni ishga qabul qilish mezonlarini shakllantirish, Markaz baholash komissiyasining faoliyatini tashkillashtirishda xizmat qiladi.

3-bob. O’qituvchi kasbiy faoliyatning asosiy tamoyillari

6. Quyidagilar o’qituvchiga kasbiy faoliyatining asosiy tamoyillari hisoblanadi:

o’quvchining shaxs sifatida shakllanishi va rivojlanishiga yordam berish orqali uning manfaati yo‘lida faoliyat yuritish;

o’quvchilariga kelib chiqishi, jinsi, millati, tilidani tilidan qat’iy nazar bir xil munosabatda bo‘lish;

jamiyatning faol a’zosiga ta’lim-tarbiya berayotganini har doim yodda tutish hamda o’quvchilarni boshqa insonlarga hurmat ruhida tarbiyalashning barcha imkoniyatlaridan foydalanish;

o’quvchining ota-onasini (ularning o’mini bosuvchi shaxsnini) hurmat qilish hamda bolaning ta’lim olish hamda rivojlanishda yuqori natijalarga erishish maqsadida ota-onalar bilan hamkorlik qilish;

har qanday sharoitda ham o’quvchilarga sifatli ta’lim berish;

ta’lim berish va ta’lim olish jarayonida o’quvchiga yo’naltirilgan yondashuvga amal qilish.

4-bob. O’qituvchining mehnat vazifalari
7. O’qituvchi pedagogik faoliyatni amalga oshirish uchun tegishli kasbiy kompetensiyalarga ega bo‘lishi kerak.

8. Quyidagilar Prezident ta’lim muassasasi o‘qituvchisi kasbiy faoliyatining vazifalarini xaritasi hisoblanadi:

</tbody>
</table>

9. O’qituvchi ta’lim va tarbiya jarayonlarini boshqarish vazifasini amalga oshirish uchun quyidagi funksiyalarni amalga oshiradi:

a) O‘quv jarayonini rejalashtirishda:
- o‘qitiladigan fanning real hayot bilan bog‘liqligiga asoslangan holda darslarni rejalashtirish;
- ta’lim standartlari, o‘quv dasturi talablarini hisobga olgan holda o‘quvchilariga differensial yondashuv asosida darsning aniq maqsadlarini belgilash;
- fanlararo bog‘liqlik va fanlar integratsiyasi tamoyillarini inobatga olgan holda darslarni rejalashtirish, bunda o‘quvchilarning jarayonlar o’rtasidagi bog‘liqlikni tushunishlarini ta’minlash;
- o‘quvchilarning rivojlanishini ta’minlash maqsadida formativ va summativ baholash natijalari hamda o‘zining darslariga berilgan fidbekni inobatga olgan holda dars rejasiga o‘zgartirishlar kiritish;
- o‘quvchilar egallaydigan yangi bilim va ko‘nikmalarni real hayotda qo‘llashlariga motivatsiya berishni nazarda tutgan holda darsning turi, metodlari va dars vaqtini oqilona rejalashtirish;
b) Ta’lim samaradorligini ta’minlash, o‘quvchining ehtiyojini hisobga oylan holida ta’lim dasturlarini amalga oshirishda:

o‘quv maqsadlari, o‘quvchilar ehtiyoji va yosh xususiyatlarini inobatga oylan holida ta’limning turli shakllarini, metodlari hamda samarali strategiyalarini qo‘llash, bunda o‘quvchilar ehtiyojini birinchi o‘ringa o‘yinishing, ularga erishish imkon bo‘lgan vazifalarni belgilash, muvaффaqtayga undovchi motivatsiya berish;

ta’lim standartlariga muvofiq o‘quv jarayonida bolalarda faol o‘rganish, ijodiy va tanqidiy fikrlash, jamoada ishlash, muammolarni hal qilish va qaror qabul qilish ko‘nikmalarini rivojlantirish;

o‘quvchilarning tadoqqotchilik ko‘nikmalarini rivojlantirish, dars samaradorligini oshirish maqsadida ta’limda axborot kommunikatsiya texnologiyalari rivojlanmasi;

o‘quvchilarga motivatsiya berish, ularni mustaqil ta’lim olishga jib qilish maqsadida turli metod va yondashuvlarni qo‘llash, o‘quvchilarni o‘z ta’lim natijalarini shaxsian javobgar bo‘lishga o‘rganish;

o‘quvchilarni loyiha ishlariga jib qilish, nazariy bilimlarni amaliyotda ta’limning ta’lim xususiyatlariga qo‘llashga o‘rganish;

d) O‘zlashtirishni ba’tish va qayta aloqa (fidbek)ini taqdim etishda:

formativ va summativ baholashning turli usullarini qo‘llagan holida o‘quvchilarni baholash hamda baholash natijalaridan darsni rejalashtirishda va o‘quvchilarga motivatsiya berishda foydalangan;

o‘quvchilarning baholash natijalari muntazam tahlil qilish, ularning ta’lim olishdagi qiyinchiliklarini aniqlash, ushbu tahlil natijalaridan olingan ma‘lumotlar asosida kundalik dars rejasa tashqarida o‘zgartirishlar kiritish, shuningdek, baholash vositalarini takomillashtirishda foydalangan;

o‘quvchiga baholash natijalari batafsil sharhlab, unga qayta aloqa (fidbek)ni taqdim etish orqali o‘quvchida akademik o‘sish uchun shaxsiy javobgarlik hissini uyg‘otish;

o‘quvchilarni rag‘batlanтирigan holida ularning bilim va ko‘nikmalariga qo‘yilgan baholar va ta’lim natijalarini yuzasidan o‘quvchilarga va ota-onalarga fidbek berish, o‘quvchilarning ta’lim natijalari yaxshilash maqsadida ota-onalarga maslahat berish;

e) Tarbiyaviy faoliyatni tashkil etishda:

o‘quvchilarni milliy qadriyatlarini hurmat qilish va vatanderlar vohnatish turli tarbiyalash, mintaqaning tarixiy-madaniy o‘zinga xosligini (o‘lkashunoslikni) o‘rganish maqsadida o‘yin, o‘quv-tadqiqot, loyiha shaxsiy kabi turli sinfdan tashqaravi mashg‘ulotlarni olib borish;

o‘quvchilarning maktab ustavi va ichki tartib-ko‘zidalarini tushunib, ularga amal qilishlariga yordam berish;

www.britishcouncil.org
o‘quvchilar o‘ziga xosligi, kuchli tomonlar, qat’iyatliliklarni rivojlantirishga yordam berish, ularga moslashuvchanchilik va jamiyat bilan o‘zaro munosabatda bo‘lish, o‘zini o‘zi boshqarish, shuningdek, o‘quvchilarning tashabbuskorligi va yetakchilik qobiliyatlarini rivojlantirishga o‘z hissasini qo‘shish;

o‘quvchilarda bag‘rikenglik tuyg‘usini shakllantirish, ularda emotional va ijtimoiy kompetensiylarni, o‘zgaruvchancha ko‘p millatli madaniy muhitda xulq-atvor ko‘nikmalarini rivojlantirishga o‘rgatish hamda tengdoshlar bilan tenglik, adolat, humrat tamoyillari asosida o‘zaro munosabat o‘rnatishga undash;

f) Xavfsiz rivojlantiruvchi ta’lim muhiti yaratish va ta’minlashda:

o‘quvchilarga emotional farovonlikni ta‘minlovchi xavfsiz ta’lim muhitida ta’lim olish huquqiga ega ekanliklarini tushuntirish;

o‘quvchilarga ijtimoiy hayotda faol ishtirok etishga yordam berish;

o‘quvchilarga turli tahdidlarning mohiyati, favqulodda va xavfli vaziyatlarda amalga oshiriladigan harakatlar ketma-ketligini tushuntirish;

o‘quvchilarda fuqarolik va madaniyatlararo kompetensiylarni shakllantirish, mas‘uliylati fuqaroni tarbiyalash maqsadida o‘quvchilarning individual ta’lim ehtiyotlarini hisobga oylan ular bilan yakka tartibda tarbiyaviy ishlarni olib borish;

o‘quvchilarga zamonaviy ommaviy axborot vositalari, raqamlari xavfsiz ishlashda yordam berish.

10. O‘qituvchi kasbiy rivojlansh va hamkorlik qilish vazifasini amalga oshirish uchun quyidagi funksiyalarni amalga oshiradi:

a) O‘zini o‘zi rivojlantirish va kasbiy o‘sishda:

refleksiyani muntazam ravishda amalga oshirish orqali o‘z ta’limiy faoliyatini baholash, o‘z kasbiy rivojlanshdiradi m芙蓉molarini aniqlash hamda ularni burtaraf etish cho‘ralarini ko‘rish;

milliy va xalqaro kasbiy rivojlansh dasturlarida, shuningdek, malaka oshirish kurslari, seminarlar, webinarlar, treninglar va hokazolarda ishtirok etish, egallagan ko‘nikmalar o‘z kasbiy faoliyatiga tatbiq etish va orttirgan tajribasini hamkasblari bilan o‘rtqoqlashish;

tajriba almashish maqsadida ochiq darslar o‘tkazish, o‘quv yili davomida hamkasblaring kamida 30 soat darsini kuzatish va tahlil qilish hamda o‘zingiz pedagogik ko‘nikmalarini rivojlantirishda hamkasblar tomonidan berilgan fidbeklardan samarali foydalanish;
pedagogik innovatsiyalarni o'rganish va kasbiy faoliyatida qo'llash orqali o'zining tadjiqotchilik ko'nikmalarini rivojlantirish, uslubiy tavsiyalar ishlab chiqish hamda pedagogik jamoatchilik bilan o'rtoqlash;

b) Hamkasbalar va o'quvchilarning ota-onalar (ularning o'rnini bosuvchi shaxslar) bilan hamkorlik qilishda:
ta'lim berish va kasbiy rivojlanish jarayonida axborot kommunikatsiya tehnologiyalaridan samarali foydalanish.

Hamkasbalar va o'quvchilarning ota-onalari (ularning o'rnini bosuvchi shaxslar) bilan hamkorlik qilishda:
ta'lim jarayonida ota-onalar bilan hamkorlik qilish, ularning maktab va sinf hayotida ishtirokini qo'llab-quvvatlash;
samarali ijtimoiy muloqotni tushunish va amalga oshirish, individual va jamoaviy ishda jamoatchilik (pedagoglar, ota-onalar) bilan o'zaro samarali munosabatlarni o'rnatish;
maktab hamjamiyati hayotida faol ishtirok etish, bunda o'z maktabning o'ziga xosligini targ'ib qilish va o'z oldiga qo'ygan vazifalarini bajarish uchun o'quvchilar, o'qituvchilar va ota-onalarni ma'naviy birlashtiruvchi tadbirlarni o'tkazish;
kasbiy xulq-atvori, shu jumladan, kiyinish odobi, jamoada o'zini tutish qoidalari, nutq madaniyati va hokazolarni namoyish etgan holda o'quvchilar uchun o'rnak bo'lish.

5-bob. O'qituvchining bilim, ko'nikma va malakalar

11. O'qituvchi o'z mehnat vazifalarini bajarishi uchun uning kasbiy tayyorgarlik darajasini belgilovchi hamda o'quvchilarga ta'lim va tarbiya berishda yuzaga keladigan pedagogik muammolarni hal qilishga imkon beruvchi zarur bilim, ko'nikma va malakalar yig'indisi;

Xususan,
a) O'quv jarayonini rejalaştirishda:

o'qituvchi bilishi kerak:

Prezident ta'lim muassasalari faoliyatiga oid normativ-huquqiy huqijatlaringa qo'yuv dasturlarini va davlat ta'lim standartlarini;
dars berayotganda fanni mazmuniga doir so'nggi yangiliklar va ta'lim berishing zamonaviy shakl va metodlari;
pedagogika fanni asosida yotuvchi zamonaviy ta'lim nazariyalarini, tanqidiy va ijodi fikrlash, hamkorlikda ishlash, muloqot;

akademik va kasbiy muvaffaqiyat uchun zarur bo'lgan XXI asr ko'nikmalari, shu jumladan tanqidiy va ijodi fikrlash, jmoada ishlash, qaror qabal qilish, muammolarni bartaraft etish, axborot kommunikatsiya tehnologiyalarning samarali qo'llash;

o'qituvchi bajara olishi kerak:
darsni rejalshtirishda fanlararo bog‘liqlikni inobatga olish hamda fanning real hayotiy vaziyatlarda dolzarbligi va ahmiyatini ta’kidlash;
 o’quvchilarni baholash natijalari hamda o’quvchilar, hamkasblar va maktab ma’muriyatining dars haqidagi fikr-muqohazalari asosida dars rejalarini moslashtirish va muvofiqlashtirish;
 faol ta’lim metodlari, shu jumladan, loyiha va tadqiqotga asoslangan ta’lim metodlaridan foydalangan holda darsni rejalshtirish;

b) Ta’lim samaradorligini ta’minlash (ta’lim dasturlarini amalga oshirish)da:
 o’qituvchi bilishi kerak:
 pedagogika va psixologiya asoslari, turli yosh va qobiliyatli bolalar guruhlari bilan ishlashning o‘ziga xos jihatlarini, o’quvchilarga motivatsiya berishning turli usullari;
 o’quvchilarni savol-javob qilishning turli usullari;
 o’qituvchi bajara olishi kera:
 motivatsiyalar va rag’batlantirish metodlarini qo’llagan holda o‘zlashtirish darajasi turli bo‘lgan o’quvchilar uchun differensial yondashuv strategiyalarini o‘z ichiga olgan dars mashq’ulotlarini o‘tkazish;
 o’quvchilarning ijodkorlik, kommunikativlik, tanqidiy fikr, mustaqil hamda jamoa bo‘lib muammolarini hal qilish, loyiha ishlarini bajarish qobiliyatlariga e’tibor qaratgan holda ularda tayanch kompetensiya va hayotiy ko’nikmalarini rivojlanish;
 o’quvchilarning mustaqil ta’lim olish ko‘nikmalarini rivojlanish uchun guruhlarda ishlab chiqish faqat vaqtida fasilitatorlik qilish;

c) Darslikdan tashqari materiallar bilan darsni boyitish uchun axborot kommunikatsiya texnologiyalariga va onlayn resurslarga e’tibor qilish;

b) Baholash va qayta aloqani taqdim etish (fidbek berish)da:
 o’qituvchi bilishi kerak:
 summativ va formativ baholashning asosiy tamoyillari;
 o’quvchilarning ta’limiy ehtiyojlarini hisobga oltar holda ularning ilmiy ko‘nikmalarini baholash uchun testlar va boshqa baholash vositalarini ishlab chiqish tamoyillari;
 darsni rejalshtirish uchun baholash natijalari tahlil qilish;
 o’qituvchi bajara olishi kerak
baholash natijasida olingan ma’lumotlarni tahlil qilish hamda ulardan ta’lim berish metodlarini moslashtirish va dars rejalariga tuzatishlar kiritishda foydalananish, bunda o’quvchilarning bilimidagi bo’shliqlarni to’irdish va ularning ta’limiy ehtiyojlariga javob berishinga e’tibor qaratish;

samarali qayta aloqani taqdim etish (fidbek berish);

**e) Tarbiyaviy faoliyatni tashkil etishda:**

_ o’qituvchi bilishi kerak:_

O’zbekiston Respublikasi Konstitutsiya-asosiy tamoyillari, O’zbekiston Respublikasi fuqarosining huquq va majburiyatlarini;

bolaning rivojlantish bosqichlari va har bir bosqichda bola xulq-atvorining o’ziga xos xususiyatlari;

ta’lim muassasasida shaxsning ijtimoiylashuvi va hayotga moslashish jarayonining o’ziga xos jihatlari;

_ o’qituvchi bajara olishi kerak:_

o’quvchilarni maktabning ijtimoiy hayotida faol ishtirok etishga motivatsiyalash va rag’batlantirish;

o’quvchilarning madaniy tafovutlari va individual xususiyatlarnini inobatga oltin holda tarbiyaviy faoliyatni tashkil etish, bolalar jamoasida do’stona muhitini qo’llab-quvvatlash;

har bir o’quvchining o’ziga xos ekanligini ta’kidlash, yetakchilik sifatlarini mustahkamlash va jamoada ishlash ko’nikmalarnini rivojlantirish orqali qiziqarli sinfdan tashqari mashg’ulotlarni tashkil etish;

**f) Xavfsiz rivojlantiruvchi ta’lim muhitini yaratish va ta’minlashda:**

_ o’qituvchi bilishi kerak:_

“Bola huquqlar to’g’risida”gi Konvensiya va bolaning xavfsizligiga oid boshqa xalqaro, milliy normalar va Qonun hujjatlari;

o’quvchilarning ijtimoiy va emotsional farovonligini qo’llab-quvvatlash;

hayot xavfsizligi asoslarini, favqulodda va xavfli vaziyatlarda harakat qilish tartibi;

gigiyena qoidalari, kun tartibini to’g’ri tashkil qilish tamoyillari va ratsional oqvatlanish asoslari, shuningdek, bolalar salomatligiga tahdid soladigan vaziyatlarda birinchi yordam ko’rsatish;

**www.britishcouncil.org**
raqamli axborot tahdidlari, shu jumladan, bolaning sog‘lig‘iga va (yoki) jismoniy, aqliy, ma‘naviy, axloqiy rivojlanishiga axborot yordamida yetkaziladigan zarár;

o‘qituvchi bajara olishi kerak:

sinfda, sindan tashqarida ijtimoiy o‘zaro hamkorlik va bola huquqlarini ta’minlovchi xavfsiz va sog‘lom muhitni yaratish;

emotsional farovonlikni mustahkamlashni ta’minlash, o‘quvchilar bilan o‘zaro ishonchalas asoslangan munosabatlarni o‘rnatish, o‘quvchilar orasida nosog‘lom xatti-harakatlarni aniqlash va oldini olish hamda zarur bo‘lganda psixologik yordam ko‘rsatish, favqullda vaziyatlar to‘g‘ri harakat qilish, bunda o‘quvchilar xavfsizligini birinchi o‘ringa qo‘yish;

o‘smirning ulg‘ayishi bilan bog‘liq fiziologik va psixologik jarayonlarni tahlil qilish va o‘quvchilarning yosh bilan bog‘liq o‘zgarishlarga to‘g‘ri munosabatda bo‘lish]{1400}i xavfsiz va sog‘lom muhitni yaratish;  

g) O‘zini o‘zi rivojlanish va kasbiy o‘sishda:

o‘qituvchi bilishi kerak:

uzluksiz kasbiy rivojlanishning ahmiyati, refleksiv amaliyat — professional rivojlanishning asosiy vositasi ekanligi;  

kasbiy rivojlanish imkoniyatlari haqida ma’lumot topishni va o‘z pedagogik kompetentsiyalarini rivojlanish uchun mustaqil ishlashning ahmiyati;

o‘quvchilar uchun qo‘llaniladigan vositalardan foydalangan vositalar, konstruktiv fidbekea bekor mohiyati;

amaliy tadqiqotlarni o‘tkazish tartibi;

pedagog xo‘jalarning kasbiy rivojlanishini uchun axborot kommunikatsiya texnologiyalari sohasidagi so‘ngi yangiliklar;

o‘qituvchi bajara olishi kerak:

o‘z kasbiy faoliyatini tahlil qilish va tanqidiy mulozhada yurish, takomillashtirishni talab qiladigan jihatlarini aniqlash, vazifalarni belgilash va kasbiy sohadagi muammolarni hal qilish yo‘llarini izlash;

seminar va treninglarda egallangan yangi ko‘nikmalarni o‘z pedagogik faoliyatiga tatbiq etish, bunday tajribalarni tahlil qilish va hamkasblari bilan o‘rtqoqlashish;

kasbiy faoliyatini tahlil qilish va tanqidiy mulozhada yurish, takomillashtirishni talab qiladigan jihatlarini aniqlash, vazifalarni belgilash va kasbiy sohadagi muammolarni hal qilish yo‘llarini izlash;

seminar va treninglarda egallangan yangi ko‘nikmalarni o‘z pedagogik faoliyatiga tatbiq etish, bunday tajribalarni tahlil qilish va hamkasblari bilan o‘rtqoqlashish;

kasbiy faoliyatini tahlil qilish va tanqidiy mulozhada yurish, takomillashtirishni talab qiladigan jihatlarini aniqlash, vazifalarni belgilash va kasbiy sohadagi muammolarni hal qilish yo‘llarini izlash;

seminar va treninglarda egallangan yangi ko‘nikmalarni o‘z pedagogik faoliyatiga tatbiq etish, bunday tajribalarni tahlil qilish va hamkasblari bilan o‘rtqoqlashish;

pedagogik faoliyatiga asoslangan amaliy tadqiqotlarni olib borish va natijalarni hamkasblari bilan o‘rtqoqlashish;
samarali ta’lim berish va kasbiy rivojlanish uchun axborot kommunikatsiya texnologiyalaridan foydalanish;

h) Hamkasbalar va o’quvchilarning ota-onalari (ularning o’rnini bosuvchi shaxslar) bilan hamkorlik qilishda:

o’qituvchi bilishi kerak:

ta’lim jarayonida ota-onalarning o’rni va ular bilan hamkorlik qilishning ahamiyati;

umumiylikka dahildorlik hissini o’quvchilar, o’qituvchilar, ota-onalar, maktab ma’muriyatini birlashtirishning asosiy kompenenti sifatida anglash hamda maktabning oldida turgan vazifalarni bajari.

O’zbekiston Respublikasining milliy qadriyatlariga muvofiq o’qituvchi – ko’pchilikning ko’z o’ngida turadigan va o’quvchilarga o’rnak bo’ladigan shaxs ekanligi;

o’qituvchi bajara olish kerak:

ota-onalarni farzandlarining maktabdagi hayotiga samarali jalb qilish;

maktabning oldida turgan vazifalarini bajari yoki o’quvchilar, o’qituvchilar va ota-onalarni birlashtirishning asosiy kompenenti.

O’zbekiston Respublikasining milliy qadriyatlariga amal qilish hamda o’z o’quvchilariga va hamkasblariga o’rnak bo’lish.

6-bob. Yakuniy qoidalar

13. Shartnoman i tuzish, bekor qilish va uning amal qilish muddati, pedagog xodimning huquq va majburiyatlari, mehnatni tashkil etish va unga haq to’lash, ijtimoiy-maishiy va boshqa shartlar amaldagi qonunchilikka muvofiq belgilanadi.
Maktabda o'qituvchilar faoliyatini baholash mezonlari

1-yo'nalish. O'quv jarayonini rejalaştirish (maksimal 16 ball):

<table>
<thead>
<tr>

O’ZBEKISTON RESPUBLIKASI XALQ TA’LIMI VAZIRLIĞI

UMUMIY O’RTA TA’LIM MUASSASALARINI BARCHA FAN O’QITUVCHILARI UCHUN UZLUKSIZ KASBIY RIVOJLANTIRISH KURSINING
NAMUNAVIY O’QUV DASTURI

Toshkent – 2022
O‘ZBEKISTON RESPUBLIKASI XALQ TA’LIMI VAZIRLIGI

A.AVLONIY NOMIDAGI PEDAGOGLARNI KASBIY RIVOJLANTIRISH VA YANGI METODIKALARGA O‘RGATISH MILLIY-TADQIQOT INSTITUTI

Umumiy o‘rta ta’lim muassasalarini barcha fan o‘qituvchilari uchun uzlaksiz kasbiy rivojlantirish kursining namunaviy o‘quv dasturi A.Avloniy nomidagi PKRYMO‘MTI Ilmiy kengashining 2022-yil “31”-maydagi 4-sonli bayonnomasi bilan ma’qullangan va tasdiqqa tavsiya etilgan

Tuzuvchilar: A.Radjiyev, F.Karimov, A.Baxramov

Taqrizchi: Carlise Womack Wynne – Shimoliy - Jorjiya universitetining Ta’lim kolleji professori, Ta’lim fanlari doktori
Toshkent-2022
Kirish

Dastur mazmuni O‘zbekiston Respublikasining ta’lim sohasidagi Davlat siyosati, mas’uliyat va moslashuvchanlik, axborot kommunikatsiya texnologiyalari va mediasavodxonlik, kommunikativ ko‘nikmalarni rivojlantirish, inklyuziv ta’limni joriy etish masalalari, o‘zini-o‘zi rivojlantirish, uzluksiz kasbiy rivojlantishlarni o‘z ichiga olib, ular bo‘yicha tegishli yangi bilim, ko‘nikma, malaka va kompetensiyalarni shakllantirishga yo‘naltilirgan.

O‘quv modullarining mazkur dastur doirasida taqdim etilayotgan mazmuni umumi o‘rta ta’lim va maktabdan tashqari ta’lim muassasalari pedagog kadrllarining malakasini oshirish mazmuni, sifati va ularning tayyorgarligiga qo‘yiladigan umumiy malaka talablari asosida shakllantirilgan bo‘lib, pedagoglarning o‘z kasbiy faoliyatiga doir zamonaviy bilim va innovatsiyalar, ilg‘or xorijiy tajribalardan samarali foydalanish hamda axborot-kommunikatsiya texnologiyalari o‘quv jarayoniga keng tatbiq etish darajasini oshirish hisobiga ularning uzluksiz kasbiy rivojlantishini nazarda tutadi.

Uzluksiz kasbiy rivojlantirish kursining namunaviy o‘quv dasturi quyidagi modullardan iborat:
1. Pedagopaque kommunikativ ko‘nikmalarini rivojlantirish
2. AKT va mediasavodxonlik
3. O‘zini-o‘zi rivojlantirish va uzluksiz kasbiy rivojlanish masalalari
4. Pedagog mas‘uliyyati va moslashuvchanchi
5. Inklyuziv ta’limni joriy etish masalalari
6. Ta’limning normativ-huquqiy hujjatlarini bilish va kasbiy faoliyatda foydalananish masalalari
7. Fandagi yangiliklar va fanni o‘qitishning dolzarb masalalari
8. O‘quvchilar kompetensiyalarini baholash usullari va vositalari

Kursning maqsadi va vazifalari

Kurs maqsadi: ta’lim-tarbiya jarayoni samaradorligini oshirish uchun zarur bo‘ladigan kasbiy bilim, ko‘nikma va malakalarni zamonaviy metodika asosida muntazam yangilash, malaka talablari asosida ularning kasbiy faoliyatga doir kompetentligini rivojlantirishdan iborat.

Kursning vazifalariga quyidagilar kiradi:

tinglovchilaraga jamiyatda amalga oshirilayotgan ijtimoiy-iqtisodiy islohotlar mazmuni va ta’lim-tarbiya jarayonlarini tashkil etishning huquqiy-me’yoriy asoslarini singdirish;

o‘zini-o‘zi rivojlantirishning bosqichli istiqbol rejasini tuzishga o‘rgatish;

ta’lim jarayonida pedagog mas‘uliyyati va moslashuvchanchingizning zamonaviy modellari va tiplarini o‘rgatish;

alohida ta’lim ehtiyotlariga ega o‘quvchilarga ta’lim-tarbiya berishing psixologik jihatlari o‘rgatish;

ilg‘or xorijiy tajribalarini o‘rganish, tahil etish va milliy ta’lim tizimiga moslashtrishni o‘rgatish;

tinglovchilarni ta’lim sifatini oshirishning yangicha metodikalar bilan qurollantirish;

AKTni ta’lim jarayoniga integratsiya qilishing turli yondashuvlari bilan tanishtirish;

pedagoglarning malaka talablari mos holadagi kasbiy kompetentligini zamonaviy yondashuvlar va innovatsiyalar asosida uzluksiz rivojlantirish.

Kurs yakunida tinglovchilarning bilim, ko‘nikma, malaka va kompetensiyalariga qo‘yladigan talablari:

**Kurs hajmi**

1. Pedagogning kommunikativ ko'nikalarini rivojlantirish

2. AKT va mediasavdonlik

AKTdan foydalaning holida o'quvchilarning ta'lim olish imkoniyatlarni kengaytirishga qaratilgan ta'lim strategiyalar.

Boshqa binlar o'zaro munosabalarni

Ta'lim jarayonida AKTdan foydalanish xavfsizligi, mas'uliyati va axqiy normalari, "Kundalik" avtomatlashirgan ta'lim axborotizmni.

O'quvchilarning g'orinuviyati. O'quvchilarning o'qiy ehtiyorlari konstruktiv, balanderaviyi, muloqot manolarini.

O'quvchilarning g'orinuviyati. O'quvchilarning o'qiy ehtiyorlari konstruktiv, balanderaviyi, muloqot manolarini.

O'quvchilarning g'orinuviyati. O'quvchilarning o'qiy ehtiyorlari konstruktiv, balanderaviyi, muloqot manolarini.
Turli vositalar orqali turli shakldagi axborotlarni tahlil qilish, baholash, boshqarish va yangi ma’lumotlarni yaratish.

3. O‘zini-o‘zi rivojlantirish va uzluksiz kasbiy rivojlanish masalalari
Butun hayot davomida ta’lim olish g’oyasi (lifelong learning). Kasbiy ehtiyojlarni amalga oshirish va kasbiy mahoratni rivojlantirish yo’llari, usul va vositalar. Uzuksiz malaka oshirishni amalga oshirishda elektron ta’lim (e-learning), individual ta’lim trayektoriyasi (personal learning space) va muhiti (personal learning environment). Uzuksiz kasbiy rivojlantirish platformasi va undan foydalangan.

Pedagog imijvi va muloqot madaniyati (Self-menejment).

O’qituvchilarga qo’yilgan talablar va umumta’lim fanlarining DTSlari talablaridan kelib chiqib o’z kasbiy mahoratini oshirish yo’nalishlylari.

Kasbiy rivojlantishiga oid manbalar. Ulardan foydalangan holda o’zing va maktob ehtiyojlardan kelib chiqib kasbiy malakasini oshirish. Kasbiy rivojlansh bo’yicha o’quvlar, ularni tanlash strategiyasi.

Kollejgal forumlar. Kasbiy bilim va mahoratini oshirish, pedagogik mahoratni takomillashtirishda kolejgal forumlardan foydalangan.

4. Pedagog mas’uliyati va moslashuvchanligi

5. Inklyuziv ta’limni joriy etish masalalari

Inklyuziya va inklyuziv ta’lim tushunchasi. O’quvchilarni jismoniy, intellektual, ijtimoiy, emotsional, tili va boshqa xususiyatlardan qat’iy nazarr birga o’qitishni tashkil qilish. Bunda yuzaga keladigan muammolar va ularni samarali hall etish usullari.
Alohida ta’lim ehtiyojlariga ega o‘quvchilarni ta’lim jarayoniga jalb qilishga oid me’yoriy hujjatlar. Imkoniyati cheklangan o‘quvchilarni umumta’lim
maktablarda sog‘lom bolalar bilan bir qatorda ta’lim olishlarini qo‘llab-quivvatlashning turli strategiyalari.

Alohida ta’lim ehtiyojlarga ega o‘quvchilarga ta’lim-tarbiya berishning psixologik jihatlari.

6. Ta’limning normativ-huquqiy hujjatlarini bilish va kasbiy faoliyatda foydalanish masalalari:
   – qonunchilik normalarini bilish hamda ularga riyoq qilish;
   – mamlayotgan ta’lim sohasidagi islohotlardan xabardor bo‘lish;
   – ta’limning normativ-huquqiy hujjatlarini bilish va kasbiy faoliyatida samarali foydalana olish;
   – o‘z kasbiy faoliyatiga doir normativ-huquqiy hujjatlarni ishlab chiqishda ishtirok etish;
   – bola huquqlari to‘g‘risidagi normativ-huquqiy hujjatlarni bilish va ularga riyoq qilishni tashkil etish.

7. Fandagi yangiliklar va fanni o‘qitishning dolzarb masalalari

Fandagi yangiliklar, kashfiyot va ixtirolar. Fanning ilmiy-nazariy asoslar bo‘yicha dolzarb muammolar, yangiliklar, ilmiy izlanishlar, dissertatsiyalar, ilmiy, ilmiy-metodik maqolalar, anjumanlar materiallaridan fanni o‘qitishda foydalanish.

Fanning yangi tahrirdagi DTS, modernizatsiya qilingan o‘quv dasturlari, darslik va o‘quv qo‘llanmalarini va ularning tahlili.

Fanni o‘qitish bo‘yicha ilg‘or pedagogik tajribalar va ularni amalda qo‘llash. Darslarda interfaol metodlardan foydalanish.

Ayrim murakkab mavzularini o‘qitish samaradorligini oshirish omillari.

Fan bo‘yicha ma’ruza, seminar, amaliyot, laboratoriya ishi, trening, ochiq mashg‘ulot va boshqa mashg‘ulotlarni tayyorlash, kuzatish va tahlil qilish.

Fanni o‘qitishda elektron darsliklardan foydalanish.

Fan metod birlashmalari ishini samarali tashkil etish shakl va usullari

Uzluksiz kasbiy rivojlanish, shu jumladan mustaqil malaka oshirish va bilim olishning tashkiliy, uslubiy asoslari.

Fan bo‘yicha o‘qituvchilarining ilg‘or tajribalarini aniqlash, tahlil qilish, o‘rganish, yo‘zish, umumlashtirish, ommalashtirishning zamonaviy texnologiyalari, shakl va usullari. Fanni o‘qitishda to‘plangan ilg‘or tajribalar.
8. O‘quvchilar kompetensiyalarini baholash usullari va vositalari
O’quvchilar bilimlari va kompetensiyalarini baholashning turli strategiyalari. Rasmiy va norasmiy, diagnostik va umumiy yondashuvga asoslangan baholash usullari.

O’quvchilar o’zini baholashi, o’quvchilar boshqa o’quvchilarini baholashi va o’qituvchi tomonidan baholash yondashuvlari, ulardan samarali foydalanish.

O’quvchilarning kompetensiyalarini baholash natijalarini tahlil qilish. Tahlillar asosida pedagogik faoliyatiga o’zgartirishlar kiritish.

Ota-onalami o’quvchilarning o’zlashtirishi natijalari bilan tanishtirish.

**Dasturning axborot-metodik ta’minoti**

Modullarni o’qitish jarayonida ishlab chiqilgan o’quv-metodik majmualar, ilmiy jurnallar, internet resurslarli, multimedia mahsulotlari hamda boshqa elektron va qog’oz variantdagi manbalardan foydalaniladi.

KELISHILDII:

O‘quv va ilmiy ishlar bo‘yicha direktor o‘rinbosari B.Mirxalikov

O‘quv jarayonini tashkil etish bo‘limi boshlig‘i O‘.Saidov
O'quv dasturi O'zbekiston Respublikasi Prezidentining 2018 yildagi "Xalq ta'limini boshqarish tizimini takomillashtirish bo'yicha qo'shimcha choralar to'g'risida"gi PF-5538-sonli Farmoni, O'zbekiston Respublikasi Prezidentining 2017 yil 7 fevraldagi "O'zbekiston Respublikasini yanda rivojlantirish bo'yicha Harakatlar strategiyasi to'g'risida"gi PF-4947-sonli Farmoni, 2017 yil 26 sentyabrda "Pedagog kadr当之ni tayyorlash, xalq ta'limi xodimlarini qayta tayyorlash va ularning malakasini oshirish tizimini yanda takomillashtirish chora-tadbirlari to'g'risida"gi PQ-3289-sonli Qarori, shuningdek O'zbekiston Respublikasi Vazirler Mahkamasining 2017 yil 6 apreldagi "Umumiy o'rtan o'qitishda zamonaviy yondashuvlar va innovatsiyalar" modulining maqsadi va vazifalari

3.1 "Xorijiy tilni o'qitishda zamonaviy yondashuv va innovatsiyalar"

modulining maqsadi va vazifalari

Modulning maqsadi: Umumiy o'rtan ta'lim maktablarini ingliz tilida o'qituvchilarining ta'lim-tarbiya jarayonida zamonaviy yondashuvlar va innovatsiyalarini qo'llash kompetensiyalarini rivojlantirish.

Modulning vazifalari:
- Tinglovchilarda xorijiy (ingliz) til o'qitishda zamonaviy yondashuvlarini tadbir qilish, innovatsiyalardan foydalanish uchun zarur bo'lib bilish va ko'nikmalarni shakllantirish;
- Ingliz tilida darslarida zamonaviy ta'lim vositalardan foydalanish ko'nikmalarni rivojlantirish;
- Zamonaviy talablar asosida ingliz tilida darslarini samarali tashkil qilish yo'llarini o'rgatish;

16
- ingliz tilini o'qitishda zamonaviy yondashuvlar va innovatsiyalarini qo'llash imkoniyatlarini o'rgatish.

**Modul bo'yracha tinglovchilarning bilim, ko'nikma, malaka va kompetensiyalariga qo'yiladigan talablard**

Xorijiy (ingliz) til fanining maqsadi o'rganuvchilarning ko'p madaniyatli dunyoda kasbiy, ilmiy va maishiy sohalarda faoliyat yuritishlarida kommunikativ kompetensiyasi (uning tarkibiy qismlari hisoblanuvchi lingvistik, sotsio-lingvistik, pragmatik va boshqa kompetensiyalarini) shakllantirishdan iborat.

Kompetensiya – kommunikatsiya (muloqot) ishtirokchilari tomonidan talabning aniq maqsadlariga qaratilgan nutq faoliyatini rivojlanishga imkon beradigan bilim, ko'nikma, malaka va shaxsliy fazilatlar yig'indisini ifodalaydi.

“Xorijiy (ingliz) til o'qitishda zamonaviy yondashuvlar va innovatsiyalar” moduli bo'yracha tinglovchilar:

- “Ta'lim to'g'risida”gi qonun, Kadrlar tayyorlash milliy dasturi va “Chet tili o'rganish tizimini yanada takomillashtirish chora-tadbirlari to'g'risida”gi PQ-1875-sonli qarorning mazmun-mohiyatini;
- xorijiy til o'qitishda zamonaviy yondashuvlar va innovatsiyalarini qo'llashning ahmiyatini;
- ta'lim mazmunini modernizatsiyalashning nazariy asoslanishi;
- xorijiy til o'qitishda qo'yiladigan hozirgi zamoni talablarni bilishi;

bilibi;
- xorijiy til o'qitish mazmuni, vositalari, metodlari va shakllarining uzviyligi va izchilligini ta'minlash;
- ilg'or tajribalarni o'z faoliyatida qo'llay olish ko'nikmasiga;
- fanni bo'yracha sinf va sinfdan tashqari ishlarni zamonaviy yondashuvlar va innovatsiyalarini tatbiq etgan holida tashkil etish;
- an'anaviy, noan'anaviy darslar, dars tizimi, dars tipi va dars turlarini bir biridan farqlay olish va to'g'ri tanlay olish malakasiga;
- ta'limgagi innovatsiya va zamonaviy yondashuvlarining mohiyati va ahmiyatini anglangan holida amaliyotga joriy etish;
- xorijiy til o'qitishda o'quvchilarni hamkorlikda ishlashga va faollashtirishga undovchi interfaol shakl va vositalari qo'llash;
- fanni o'qitishda xorijiy tajribalardan foydalana yig'indisini ifodalay olish kompetensiyalariga ega bo'lishlari lozim.

**Modulni tashkil etish va o'tkazish bo'yicha tavsiyalar**

“Xorijiy (ingliz) til o'qitishda zamonaviy yondashuvlar va innovatsiyalar” moduli ma'ruza va amaliy mashg'ulotlar shakildada olib boriladi.

Kursni o'qitish jarayonida ta'limgingan zamonaviy metodlari, pedagogik texnologiyalar va axborot-kommunikatsiya texnologiyalari qo'llanishi nazarda tutilgan:

- zamonaviy kompyuter texnologiyalari yordamida prezentatsion va elektron-didaktik texnologiyalardan;
- Nazariy mashg'ulotlarda taqdizot dasturida tayyorlangan
materiallar, doska va flipchart, ko'rgazmali materiallardan hamda video va audioyozuvlardan foydalaniladi.
- Amaliy mashg'ulotlarda texnik vositalar, tarqatmali vositalar, aqliy hujum, guruhlari fikrlash va kichik guruhlarda ishlash va boshqa interaktiv usullarni qo'llash nazarda tutiladi.

**Modulning o'quv rejadagi boshqa modullar bilan bog'liqligi va uzviyligi**

Modul mazmun o'quv rejadagi “Ta’lim jarayonlarida axborot kommunikatsiya texnologiyalarini qo‘llash”, “Ta’lim-tarbiya texnologiyalari va pedagogik mahorat” bloklari va “Xorijiy (ingliz) tilni o‘qitish metodikasi” moduli bilan uzviy bog‘langan holda pedagoglarning kasbiy pedagogik tayyorgarlik darajasini orttirishga xizmat qiladi.

**Modulning uslubiy jihatdan uzviy ketma-ketligi**

**Modulning ta’limdagi o‘rni**

Tinglovchilarni ingliz tilini o‘qitishda zamonaviy yondashuvlar va innovatsiyalar bilan tanishtirish, amalda qo‘llash va shu orqali ta’lim samaradorligini ta’minlash.

**1-mavzu: Xorijiy tilni o'qitishdagi ilg'or xorijiy tajribalar hamda zamonaviy yondashuvlar**

Nutq faoliyati turlari va innovatsiyalar. O'quv materiali mavzusini o'quvchilarga tushunish (tinglab-tushunish, gapirish, o'qish va yozuv) ni rivojlantrishda zamonaviy yondashuvlar roli va qulay etkazishta yordam beruvchi interfaol usulblarni dars jarayonida qo'ilanilishi. Ingliz tilida darslarni uchun o'quv materialini tayyorlash, o'quvchilarga etkazishda yangicha yondashuv.

**2-mavzu: STEAM yondashuvi hamda aqlli ta'lim (Smart education) texnologiyalarini**

Smart education( (aklili ta'lim) o'chiq axborot resurslari yordamida interfaol virtual muhitda amalga oshiriladigan moslashuvchan va individuallashdirilgan yangi global ta'lim texnologiyasi) va STEAM (ilm-fan, texnologiya, muhandislik, san'at va matematikani birlashtiruvchi zamonaviy yondashuv) yondashuvining xorijiy tilini orgatishdagi ahmiyati

**3-mavzu: Zamonaviy ta'lim vositalaridan foydalanish.**

Xorijiy tillarni o'rganishda diktant turlari va ulardan unumli foydalinish usullari. Mavzuga mos ta'limiy va nazorat uchun beriladigan matnlaridan to'g'ri foydalanish. O'quvchilarning umumiy saviyasi, ularning savodxonligini oshiruvchi, ingliz tiliga oid bilim, ko'nikma, malakalarini rivojlantruvchi, fikrlash qobiliyatini va nutq madaniyatini o'stiruvchi o'yinlarni tanlash yo'llarli.
4-mavzu: Ta’lim jarayonini boshqarish texnologiyalar va nazorat turlari

Ta’lim jarayonini boshqarish texnologiyalar va nazorat turlari. O'quvchilarning tarbiyaviy va ta’limiy salohiyatini oshiruvchi darslarni tashkil etish. O’qituvchi dars jarayonida o’quvchilar bilimini noanano'aviy tarzga baholash. Butun sifat o'quvchilarini bilimini baholash va dars texnologiyasini samaradorligini tahlil qilish.

5-mavzu: Xorijiy (ingliz) tilini o’rgatishda axborot-kommunikatsiya texnologiyalaridan foydalanish

Ingliz tilini o’rgatishda axborot-kommunikatsiya vositalarining roli juda katta. Ularni qo’llash imkoniyatlari ko’r’lami kundan-kunga kengayib, texnik vositalar o’quv jarayonining ajralmas qismiga aylanib bormoqda. YOshlarga ingliz tilini kompyuter orqali o’rgatish uchun birinchi navbatda kompyuter texnologiyalaridan foydalangan bo’lishi kerak.

Bu darajadagi foydalanishda nafaqat kompyuterterning mavjud imkoniyatlardan to’liq foydalana olish, balki u asosida yangi qonuniy oshirish imkonini bajarish. Bu qonuniy va unda ishlatiladigan samarali o‘qitish metodlari ustiqimiy o‘z ro’yini bo‘lishi kerak.

6-mavzu Xorijiy (ingliz)til fanini o‘qtishda kompetensiyaviy yondashuvga asoslangan ta’limning joriy etilishi

O'quvchilarni o‘qitishda kompetensiyaviy yondashuv nima va u qanay amalga oshirishi va unda ishlatiladigan samarali o‘qitish metodlari

7-mavzu Xorijiy tillarni o’rgatishda integratsion metodlardan foydalanish usullari.

O'quvchilarga ingliz tilini boshqa fanlar (geografiya, matematika, fizika, tarix, ona tili va boshqalar) orqali o’rgatish va bu orqali o’quvchilarning kommunikativ kompetensiyalarini rivojlantirish.

8-mavzu Zamonaviy talablar asosida xorijiy til jarayonini tashkil etish va dars ishlanmalarini ishlab chiqish.

Bu amaliy darsda tinglovchilar o'tilgan mashgulotlarni amalda qo'llash maqsadida guruhlarga bo'linib zamonaviy talablar asosida dars ishlanmalarini ishlab chiqadilar va gurugda taqdimot qiladilar.

9-mavzu O'quvchilarning o'quv savodxonligini baholashning xalqaro tadqiqotlari

Ingliz tilini o’rgatishning o'quvchilarning o’quv savodxonligini baholashning PISA,TIMSS, PIRLS xalqaro tadqiqotlari agzida roli.

21
MUSTAQIL TA’LIM MAZMUNI

Modulga oid o’rganilgan materiallar asosida “Xorijiy til o’qitishda zamonaviy yondashuvlar va innovatsiyalar” mavzusida mustaqil ish bajariladi.
O’QITISH SHAKLLARI

Mazkur modul bo’yicha quyidagi o’qitish shakllaridan foydalaniladi:

- ma’ruzalar, amaliy mashg’ulotlar (ma’lumotlar va texnologiyalarni anglab olish, aqliy qiziqishni rivojlantirish, nazariy bilimlarni mustahkamlash);
- davra suhbatlari (ko’rilayotgan topshiriqlar echimlari bo’yicha taklif berish qobiliyatini oshirish, eshitish, idrok qilish va mantiqiy xulosalar chiqarish);
- bahs va munozaralar (topshiriqlar echimi bo’yicha dalillar va asosli argumentlarni taqdim qilish, eshitish va muammolar echimini topish qobiliyatini rivojlantirish).

3.2 Xorijiy tillarni o’qitish metodikasi modulining ta’limdagi o’rni

Modulni o’zlashtirish orqali tinglovchilar xorijiy (ingliz) til o’qitish metodikasini o’rganib, mustahkamlab, amalda qo’llash va baholashga doir kasbiy kompetentlikka ega bo’lalilar.

**NAZARIY VA AMALIY MASHG'ULOTLAR MAZMUNI**

1-mavzu: Xorijiy tilni o'qitishda Davlat ta'limga standartlari, o'quv dasturlari, til bo'yicha umumevropa tavsiyalar va uning talqini, ya'ni CEFR bo'yicha tilni bilish bo'yicha belgilangan talab va darajalar

Chet tillarni o'rganish, o'rgatish, baholash bo'yicha Umumevropa tavsiyaları (CEFR) haqida umumiy ma'lumotga ega bo'lish. Tizimning tashkil etish tarixi bilan tanishtirish. Uning talablari va darajalari haqida tasavvuruga ega bo'lish. Tinglovchilar o'zlariga qo'yilgan talablarni bilishi va o'rganishi, shuningdek o'rgatish va baholashga doir masalalarni haqida tushunchaga ega bo'lishlari lozim

2-mavzu: Xorijiy (ingliz) tilni o'qitishning o'ziga xos xususiyatlari

va o'qitish metodlari.
O‘quvchilarni xorijiy tilni o‘qitishda ularning o‘rganish xususiyatlari etiborga olish va darslarda samarali metodlarni qullay bilish.

3-mavzu: Fan doirasida o‘quvchilar bilim, ko‘nikma hamda malakalarni baholash

Xorijiy til o‘qitishda baholash metodlari. Xalqaro standart doirasida baholash, ularning turlari

4- mavzu. Dars ishlanmalarini ishlab chiqishga qo‘yilgan talablar.

Dars ishlanmalariga quyilgan talablar haqida malumotga ega bulish. Dars ishlanmalarini ishlab chiqish va guruxlarda taqdimot qilish

5-mavzu Xorijiy til o‘qitishda dars turlari va ularga qo‘yilgan zamonaviy talablar

6-mavzu: Xorijiy tilni o‘qitishda muammoli ta’lim, qo‘shimcha va asosiy vositalar

Xorijiy til o‘qitishda “Case-study” usulidan foydalanish. Xorijiy til o‘qitishda “Case-study” usulidan foydalanishning ahamiyati va afzallik tomonlari. Keys turlari
7- mavzu. Fan bo‘yicha sinfdan va maktabdan tashqari ishlarni tashkil etish va o‘tkazishning samarali yo‘llari.

Maktab o‘quvchilarni Ingliz tili fanini o‘qitishda sinfdan tashqari ishlarini tashkil etishni rejalaştirish va samarali o‘tkazish usullari.

8-mavzu O‘quvchilarni o‘z-o‘zlarini boshqarish va hamkorlikda ishlashga o‘rgatish

9- mavzu Ochiq darslarni o‘tkazish va darsni tahlil qilish usullari

Dars tahlilining turlari. Dars kuzatuuvchilarining vazifalari va ularga qo‘yladigan talablilar.

Dars tahlilining turlari. Dars kuzatuuvchilarining vazifalari va ularga qo‘yladigan talablilar.

Ko‘chma mashg‘ulot “Xorijiy (ingliz) tilni o‘qitish metodikasi” moduli doirasida, talab darajasidagi moddiy-technika bazaga ega va ilmiy-uslubi yahutdan tajribali o‘qituvchilar va mutaxassislar faoliyat ko‘rsatayotgan umumta’lim muassasalarida tashkil etiladi.

O‘QITISH SHAKLLARI
Mazkur modul bo’yicha quyidagi o’qitish shakllaridan foydalaniladi:

- ma’ruzalar, amaliy mashg'ulotlar (ma’lumotlar va texnologiyalarni anglab olish, aqliy qiziqishni rivojlantirish, nazariy bilimlarni mustahkamlash);
- davra suhbatlari (ko’rilayotgan topshiriqlar echimlari bo’yicha taklif berish qobiliyatini oshirish, eshitish, idrok qilish va mantiqiy xulosalar chiqarish);
- bahs va munozaralar (topshiriqlar echimi bo’yicha dalillar va asosli argumentlarni taqdim qilish, eshitish va muammolar echimini topish qobiliyatini rivojlantirish).
Appendix 8
Statistics on PRESETT graduates entering the teaching profession in state schools.

Uzbek State World Languages University (personal communication)

The academic year 2019-2020
The total number of graduates: 1274 graduates who are working at state schools: 364 In percentage: 28.5%

The academic year 2020-2021
The total number of graduates: 1738 graduates who are working at state schools: 825 In percentage: 47.4%

The academic year 2022-2023
The total number of graduates: 1565 graduates who are working at state schools: 423 In percentage: 27%

According to the statistics, almost 70% are teaching, but many of them work at Language centres. Some of them are on maternity leave.

Nizami
They had 200 graduates majoring in English in 2022 and expect 400 in 2023. These numbers are relatively small compared with UWL, which reports 1500+ graduates annually.

However, the proportion entering state school teaching is far higher among Nizami graduates (80%-+) than among UWL graduates (30 – 40%). But a significant number of UWL graduates find employment in colleges and lyceums as well as in the private sector, and around 20% go on to full time MA studies in Applied Linguistics.

Bukhara State University (personal communication)

The academic year 2019-2020
The total number of graduates: 193 Graduates who are working at state schools: 125 In percentage: 64.7%
**The academic year 2020-2021**
The total number of graduates: 275
Graduates who are working at state schools: 179
In percentage: 65 %

**The academic year 2021-2022**
The total number of graduates: 409
Graduates who are working at state schools: 225
In percentage: 55 %

I should say these numbers may have changed because some graduates may be on maternity leave while working at schools.
Appendix 9
CPD literature for teacher educators

Books

*Bailey explores ways of observing and supervising teachers, both in-service and pre-service. Special attention is given to the value of supportive feedback.*

*A collection of case studies and stories on CPD from teachers and teacher educators within and beyond India.*

*A collection of essays on teacher development from humanistic and critical perspectives. There is also a clear focus on prescriptive educational systems which deskill and disempower teachers, thus obstructing continuous professional development.*

*The writers draw on their experience of working with undergraduate trainees and newly qualified teachers to draw up a mentorship scheme which allows experienced teacher to support their novice colleagues through the difficult early stages of teaching in schools.*

*Malderez and Wedell consider the design and planning of effective professional development programmes and sessions, mentoring teachers, assessing teacher learning, and professional development for teacher educators.*

*A handbook of practical ways in which teacher educators, mentors and managers can support teachers at different stages of their careers.*

Richards and Farrell consider the nature of teacher education and 11 options for language teacher professional development.

Principles and practices in teacher education with tasks and activities to use in training, backed up with illustrative case studies.

**Articles**

Kennedy outlines 9 models of CPD, and asks 5 related questions about CPD which she offers as a framework for analysis.

Lamb discovers teachers in Indonesia have misinterpreted some of the principles and practices of an apparently successful course when they apply it in their workplace. He advocates a participant-centred, awareness-raising approach to INSETT in which teacher-participants have an opportunity to speak about and engage with their own existing beliefs before taking new ideas on board.

The authors consider the views of 4 early career teachers of English in Vietnam who formed a critical friends group. The teachers had positive views, and felt that membership of the group improved their teaching.

Pickering, G. and Gunashekar, P. eds. (2016) *Ensuring Quality in English Language Teacher Education* New Delhi: British Council India. Available free from:
A selection of conference papers on 3 themes. These are:

- Policy and quality initiatives
- Monitoring and evaluating quality
- Enhancing the quality of curriculum, materials and methods in English language teacher education

A ground-breaking article which turns traditional thinking about the relationship between theory and practice on its head. The author shows how practice, if properly supported and analysed, can lead to the formulation and maintenance of a teacher’s personal theories and beliefs about teaching and learning.

Richardson and Díaz Maggioli outline 7 principles for effective professional development, and consider briefly what this means in practice.

The authors look at the benefits of following up an INSETT course in the Philippines with school-based teacher development sessions.

Wedell analyses data from a cascade course in China for teachers of young children. Data suggests that cascade training is not sufficient in itself for help teachers to use strategies learnt in training in the classroom. He argues that planning at both cascade level and classroom level needs to be done in order to optimise chances of a cascade achieving impact.
Appendix 10
Head Teacher Survey analysis

Hurmatli Hamkaslar,
Xalq ta'limi vazirligi va Britaniya Kengashi nomidan, biz maktablarda ingliz tili o'qituvchilarini tayyorlash va rivojlanirish ehtiyojlari to'g'risida hisobot tuzmoqdamiz. Ingliz tili o'qituvchilarining ehtiyojlarini kengroq tushunishimiz uchun o'qituvchilar bilan birga ish olib borishimiz zarur.
Ushbu so'rovnomada savollariga javob berib, Siz O'zbekiston bo'ylab ingliz tilini o'rganilish va o'qitilish standartlarini oshirishga qaratilgan ushbu hisobotga muhim hissa qo'shmasiz. Barcha javoblar ko'rib chiqiladi va sizning ismlaringiz hisobotda yoki boshqa hujjatlarda ko'rinmaydi.
Hamkorlik uchun tashakkur.

27-yanvarga qadar javod berishingizni iltimos qilib qolamiz O'zbek yoki ingliz tilida javob bering.

Maktabingiz haqida

1. Siz faoliyat ko'rsatayotgan maktab turini barchasini tanlang
   Boshlang`ich
   O`rta Umumta`lim
   Yuqori sinflar umumta`lim
   Ixtisoslashirilgan
   Prezident maktabi

2. Maktabdagi o`qituvchilar soni?

3. Ingliz tili o`qituvchilar soni?

4. Maktabingiz shahar hududida joylashganmi yoki qishloq?

5. Maktab direktori sifatida necha yildan buyon faoliyat yuritib kelasiz?

Maktabingizdagi ingliz tili o`qituvchilarining uzviy kasbiy rivojlanishi haqida
6. Maktabingizdagi ingliz tili o`qituvchilari kasbiy rivojlanish bilan mashg`ulmi?

7. Agar javob HA bo`lsa, iltimos mashg`ulot turini nomlang.

8. Maktabingizdagi ingliz tili o`qituvchilarining metod kuni mavjudmi?

9. Agar HA bo`lsa, iltimos,
   a. Qachonligini va davriyligini yozing
   b. Metod kunida shug`ullanadigan mashg`ulotlarini nomlang.

**Ingliz tili o`qituvchilarining kasbiy rivojlanishida sizning tutgan o`rningiz**

11. Ingliz tili o`qituvchilarining kasbiy rivojlanishini qo`llab-quvvatlash uchun maktabda mablag` ajratiladimi?

12. Maktabingizdagi ingliz tili o`qituvchilarining darslarini kuzatib tahlil qilishga majburmisiz? Agar javobingiz HA bo`lsa, nima qilishingizni va darsni qanday baholashingizni izohlab bering.

13. Maktabingiz ingliz tili o`qituvchilaring kasbiy rivojlanishi haqida yana boshqa fikrlaringiz
Q2 How many students are in the school?  (Answered: 216 Skipped: 3)
Numbers varied from 17 (lowest) to 2770 (highest). There were many instances of numbers well in excess of 500. (Need to check if this is at all likely – my guess is that these higher numbers may show the total school population rather than numbers of teachers).

Q3 How many students are in the school? (Answered: 215 Skipped: 4)
Numbers varied from 1 (lowest) to 439 (highest). This extremely high number may be the result of a slip of the finger on the keyboard or some kind of misunderstanding and is disregarded for statistical purposes. The next highest number of English Teachers is 40, with one answer given as 33.333 (presumably a way of accounting for one or more part-time teachers. The average number of English teachers per school across respondents is 6.12

Q4 Is your school located in an urban or rural area? (Answered: 216 Skipped: 3)
- Village (rural area; including ‘kishlok’ and ‘district centre’): 167
- City or town (urban area): 38  we ignored several confusing responses here.

Q5 How many years have you been working as a school Head? (Answered: 211 Skipped: 8)
Answers ranged from 1 month to 31 years. Three respondents stated that they were not school Heads.

Q6 Are English language teachers in your school engaged in professional development?  (Answered: 211 Skipped: 8)
Yes: 171  No: 25  Other (not clear or equivocal): 13

Q7 If the answer is YES, please name the type of training.  (Answered: 186 Skipped: 33)

NB: It is possible that our question confused Heads here – we are not sure if the Uzbek version distinguishes between training and development.

Answers grouped loosely here:
- Attending training courses (including online courses): 29
- ESN training: 6
- Certificate-oriented courses (C1, IELTS, TKT, APTIS, APRO Test etc) : 61
- English course, language improvement, English clubs (no mention of certificate): 10
- Work on oneself, independent work: 12
- Miscellaneous with no real grouping possible (including a few indecipherable answers: 47
Q8  Is there a methodology day for English language teachers in your school?  
(Answered: 209 Skipped: 10)  
Yes: 89  
No: 105  
Other (not clear or equivocal): 15

Q9  (i)  If yes, when does it take place?  
(Answered: 107 Skipped: 112)  
- Friday: 73  
- Tuesday: 2  
- Saturday: 2  
- Once a week: 5  
- Once a month: 1  
- No: 15  
- Yes: 3  
- Other answers: 6

(ii)  If yes, what activities take place on the Methodology Day?  
(Answered: 101 Skipped: 118)  
- work on yourself, independent work: 14  
- IELTS, TKT, Exam Prep, Testing: 9  
- No: 11  
- methods, methodology: 7  
- unspecified training or development activity: 7  
- ESN: 5  
- open class, master class, exchange ideas: 5  
- clubs, extra classes, teaches in another school: 4  
- 4 skills: 2  
- other single mentions, including: ‘he rests’ (!): 32

Q10  Do you think there are other opportunities for professional development for English language teachers at your school?  Explain your answer.  
(Answered: 199 Skipped: 20)  
Yes (including all affirmative responses): 77

Selection of supplementary comments (loosely grouped):

Digital opportunities  
- through effective use of ICT  
- if there are laptops and computers, teachers of other subjects also learn.  
- the school has modern computer rooms!  
- internet, equipment, separate room available  
- they study online on their own
• there is a computer, multimedia tools, an electronic board
• new methods of teaching through the Internet, listening comprehension, preparing lessons through video lessons

**Seminar or workshop opportunities**
• organizing a seminar training with the participation of foreign volunteers
• because he participates in international seminars
• can be sent abroad
• I think that English language teachers should be trained abroad

**Language practice opportunities**
• improving existing English language skills
• we speak a foreign language. Setting the days of the week in the topic.

**Teachers need to work on themselves**
• they received the 1 million soum funds delivered to the accounts and are using them to improve their knowledge. 1 of my teachers has an international certificate of level S1 and 1 has an international certificate of level 2. My teachers are working tirelessly on themselves in order to share their experience.
• there are all conditions for independent practice
• work more on yourself and conduct course activities with students
• pedagogues can develop themselves pedagogically with the help of methodological aids and additional courses sent on educational channels in social networks
• the groups were involved, and extra time was allocated for them to work on themselves

‘Should’ and ‘must’ recommendations from an administrative perspective
• the school is on 1st shift, it is possible to study on 2nd shift as well
• it would be good if groups were organized on the basis of a fixed schedule and additional trainings were organized
• there are a lot of possibilities. If schools are compared by monitoring the English language, and the result is high, organizing skill classes by English language teachers, sending young aspiring teachers to improve their skills abroad and spreading their experience
• the teacher is limited only to theoretical knowledge. I think it is necessary to allocate a practice day. On this day, it is necessary for them to talk with foreign colleagues through video communication, to support their theoretical knowledge in practice. Only then will they be able to easily communicate with children, talk in English in English class, and explain the secrets of science in that language.
• must work in partnership with more experienced mentors
• most of them should read the masterpieces of world literature written in English

No: (Including all negatively worded answers): 36

There were hardly any supplementary comments:
• except for the internet. I doubt that they used the 1,000,000 for a separate book for a complete book. I didn't see him read a book
• because there are 2 classes in the school. There is no empty classroom
• there are no conditions

Answers avoiding a direct ‘yes’ or ‘no’: 94

Selected responses (loosely grouped):

Digital link
• learning the methods of teaching using modern multimedia tools
• provide the English room with the latest technical equipment
• with the help of WFi from ICT and whiteboards in classrooms, they are getting additional information related to their field from various sites
• English language room, ICT available
• learn new methods through online video lessons
• they can improve their reading skills online

Training link, sometimes involving foreigners
• sending training abroad
• teacher training based on foreign experiences
• he should improve his qualifications abroad
• trainings with foreign experts
• it would be great if there were more professional development opportunities like this, especially in collaboration with foreign countries, which included a direct English language school
• it is necessary to establish training in England and the USA, the motivation and influence will be strong

Teachers need to take responsibility for their own CPD decisions
• work on yourself and actively participate in paid online courses
• work on yourself
• he should be more involved with the student and work on himself at the same time
• professional development is very important. 1 out of 5 teachers has a C1 certificate, 1 has a B2 certificate
• English language teachers should not limit themselves to self-development, but learn more about the methods of developing students by taking classes with each other

Miscellaneous other recommendations
• as much as possible, it is necessary to teach children’s psychology and methods
• the tradition of master disciple is well established
• APro test system, traditional and distance training platform developed by Khorezm VXTB, work on obtaining international certification
Q11 Does the school allocate funds to support the professional development of English teachers? (Answered: 202 Skipped: 17)

Yes: 32
Yes plus short comment: 4
No: 137
No plus short comment: 5

Selected other answers (loosely grouped):

Answers linked to availability of funding

Shortage of funding
- Insufficient funds
- Funds not allocated
- There is no school funding. Even if it is, he uses it sparingly
- Unfortunately, we don’t have the funds. Only certified teachers can receive a raise. However, since I myself can communicate in English and Russian as well as in my mother tongue, whenever we meet them, even when I give an assignment, I speak to English teachers in English, and to Russian teachers in Russian. I encourage them to speak in the languages of science

Funding is available
- 1,000,000 soums was granted in the last academic year. to purchase the book
- Each teacher was given 1,000,000 soums to get the necessary literature
- They get a salary
- Paid courses, bonus from the director's fund
- C1 level teachers are being paid a bonus.

Head teacher assuming responsibility
- I will allocate with the help of sponsors
- I will try to create conditions
Q12 Do you have to observe and analyse the lessons of English language teachers in your school? If your answer is YES, explain what you do and how you evaluate the lesson. (Answered: 195 Skipped: 24)

No: 58
I don’t have to (mostly without comment): 8

Yes (no comment): 16

Yes plus comment: 61 Selected comments here, very loosely grouped:

Head sees him/herself as an expert evaluator
- I analyse teaching methods and give my opinion (approximately 15 answers along these lines)
- I analyse the lessons and set an example for other subject teachers. Because it widely uses interactive methods
- we are obliged to improve the quality of education. I will evaluate the lesson positively or negatively depending on its completion.

Observation taking account of wider factors than just teacher performance
- To monitor the quality of education of students. In the class, I evaluate the students by the fact that they will find a place in the future through their knowledge of the language. Because the knowledge of the language is important when working abroad, even if an English teacher is not able to do so
- I am constantly watching. We defined the basis of the school's development as a foreign language and created a strategic development program. In this direction, we will analyse the lessons and additional training
- learning the ability to teach the student based on the new requirements

Attention to various aspects of a teacher's skills plus identifying help needed
- the teacher's data transfer skills and the students' language skills
- the teacher's teaching method, communication with students, the importance of reinforcement exercises
- because I have to observe the work of the teacher and give methodical help. In this, I pay attention to the preparation for the lesson and the methods used, working with the students, I enter the lesson with an expert
- I will interpret and evaluate in cooperation with an English teacher
- students' level of knowledge is assessed, experience sharing with other English language teachers is offered

Student-centred and learning-centred perceptions of a lesson;
- because I am not indifferent to how students learn
• as a result of observing the lesson, what did the student get from today's lessons? If the teacher's skill and the student's interest increased, the teacher can be given an excellent rating

• because I want to know how well the children are being taught their subject

• during the lesson, I observe the methods used by the teacher to form students' foreign language skills, and I evaluate the effectiveness of the lesson depending on the students' level of speaking

• I observe the course of the lesson, and of course I am interested in the students' knowledge, I observe the teacher's use of new pedagogical technologies

Head teacher as a learner of English

• for the purpose of learning English

• I observe and analyse the lessons, because I myself am learning English using the DUO LINGO application. Lessons are considered to be conic or non-conic. Now, English language teachers are studying to earn extra money for their monthly salary, the main goal is not to provide quality education to the child

• to speak English. Love for children and profession. Pedagogical skills. Mood. I am also interested in problems if necessary

Other comments (mostly assuming a ‘yes’ but not stating it): 44

Selected comments (loosely grouped):

Monitoring, evaluating, analysing in general terms, without mentioning criteria

Approximately 12 answers

• to monitor the passing of classes according to international standards

• obligation. When analysing the lessons, we evaluate it on a 100-point system

• of course I watch the lesson. In this process, the teacher's pedagogical and methodical skills, appropriate and efficient use of information technologies, psychological skills, use of assignments encouraging logical thinking, etc. I evaluate the total on a 100-point system

• I have to evaluate the teacher's goal in the analysis, the student's involvement in the topic, the ability to use interactive methods, the child's ability to think independently and express his opinion freely, and the teacher's attention to the child's personality

• I focus on conducting lessons in English and improving students' English conversational skills

• emphasis is placed on the use of new methods and multimedia tools

Head takes own expectations into observations and evaluates accordingly
- I check that the lesson is conducted according to the given plan and that the students are interested in the lesson, and I evaluate the lesson truthfully
- I check that the lesson goes according to the given plan and that the students are interested in the lesson
- I check teaching methods, teaching methods and students' level of knowledge
- I check what methods they use in class and the effectiveness of exercises aimed at developing oral speech

**Head's view of teaching as performance**
- as a leader, we can observe the employee's work performance
- we installed a surveillance camera in the room. Because he attracts students to his science

**Miscellaneous responses**
- it is not mandatory, but I will follow, the teacher works on himself, introduces new methods, etc
- I did not analyse, I gave a recommendation
- there are no analyses of the lesson
Q13 What other thoughts do you have about the professional development of English language teachers at your school? (Answered: 173 Skipped: 46)

Selected responses (loosely grouped)

**Teachers need for to work (more) on themselves**
25 responses

**Value of international study, international co-operation etc:**
Approximately 18 responses

- organization of foreign training
- sharing experience by sending abroad
- exchange experience by traveling to foreign countries
- it would be better if they went to foreign countries to improve their skills and exchange experience. It would be appropriate if the qualifications were improved abroad
- in order to develop speaking abroad, you need to improve your skills abroad
- in my work plan, I have included a clause about providing English language teachers with embassies and other countries to improve their skills and exchange experience. It’s been happening since the beginning of the year, I’m motivating my other teachers, and it will continue.
- if I had the opportunity, I would send 4 teachers to Finland and implement their experiences in our school.
- English language teachers of ordinary schools should be sent abroad to improve their experience
- English language teachers should be more involved in the exchange of qualifications to foreign countries
- it is necessary to organize remote compulsory professional development courses and to cooperate with foreign experts for practice, and if possible, to organize training of English language teachers abroad
- organising seminars and webinars based on cooperation with foreign institutions
- international cooperation should be established in the regions as well

**Need for school resources and better computers, whiteboards, video facilities and IT support**
14 responses

there should be computers, linguaphones, special books, foreign literature, dictionaries, tablets, and projectors
(It is necessary to strengthen the material and technical base of the school on ICT, interactive whiteboards are needed, smart rooms should be organised)

**International certificates of language proficiency are important**

11 responses.

*My English teachers are teachers who work on themselves. 4 have C1 and 2 have B2 certificates.*

*Each teacher continues to study for a CEFR, TKT certificate*

**Selection of other responses (mostly unrelated, a small number incomprehensible without further context):**

- we declared one day in school as "English language day". On that day, our students will also talk in English during the break. We are looking for ways to communicate with foreign peers on the same day through Internet chats.
- I think that the English language will develop even more if foreign colleagues of teachers work in our school
- by establishing training centres in rural areas, it is possible to get English language teachers to work more on themselves, to increase competition with English-speaking regions
- time and room are an issue for two-shift schools. therefore, I consider this to be seriously impossible. when space and time are allocated by the state, little results can be achieved. basically, it is necessary to create conditions and demand.
- it will be good if there are enough rooms
- participation in republic-wide professional competitions
- they are participating in various online Olympiads and competitions
- sharing experience following the class of the best experienced teachers in the district
- learn from powerful mentors
- there are facilities for professional development of English language teachers
- I believe that teachers should have the books and materials they want for their professional development
- regular training courses should be organised
- teaching foreign languages is generally unsatisfactory.

**Summary of some issues from rural/village schools**

The vast majority of respondents were from rural settings (see responses to Q4 above). There was little overall consensus in responses but these issues did stand out:

- need for more training opportunities, face-to-face as well as online
• need for more direct contact with native speakers, international agencies etc
• need for more properly qualified English teachers (i.e. with B2 or C1 level)
• need for more resources (especially IT)

Some more general issues to emerge from the Head Teacher survey

• Many head teachers from our sample see CPD in terms either of training or language qualifications
• There is relatively little evidence that Heads see CPD as a shared enterprise. It seems to be seen as an individual responsibility (‘they should work on themselves’) or as being concerned with certificates and salary bonuses;
• Many respondents are clearly aware of the need for teachers to improve their English
• There is very little mention of ESN in the responses, which is at odds with our teacher data. We are not sure of the reasons for this.
• Heads seem to recognise the advantages of study abroad for language teachers
• Classroom observation by head teachers is seen largely as an opportunity to judge teacher performance, sometimes with stated criteria but more often without
Appendix 11
Teacher Survey analysis

Maktab Ingliz tili o`qituvchilari uchun so`rovnoma

Hurmatli Hamkasblar,

Xalq ta'limi Vazirligi va Britaniya Kengashi nomidan, biz davlat maktablarida ingliz tili o`qituvchilarini tayyorlash va rivojlantirish ehtiyojlarini to'g'risida hisobot tuzmoqdamiz. Ingliz tili o`qituvchilarining ehtiyojlarini kengroq tushunishimiz uchun o`qituvchilar bilan birga ish olib borishimiz zarur. Ushbu so`rovnoma savollariga javob berib, Siz O`zbekiston bo`ylab ingliz tilini o'rganilishi va o'qitilishi standartlarini oshirishiga qaratilgan ushbu hisobotga muhim hissa qo'shasiz. Barcha javolbar ko'rib chiqiladi va sizning ismlaringiz hisobotda yoki boshqa hujjatlarda ko'rinmaydi. Hamkorlik uchun tashakkur.

Javoblarni 27 yanvarga qadar yuborishingizni iltimos qilib qolamiz.

Iltimos, ingliz yoki o'zbek tilida javob bering.

*Simon Smith and Rod Bolitho*
Norwich Institute for Language Education, UK

   d) Boshqa zaruriyat (Izoh)
13. O’zbekistondagi ingliz tili o‘qituvchilari uchun kasbiy rivojlanish imkoniyatini yaxshilash uchun Sizning fikrlaringiz:

.................................................................

.................................................................
Years of teaching experience, grades taught, qualifications
Just over 1400 of the respondents have been teaching English for 10 years or fewer - roughly 57.5% of the sample. Just over 1000 (nearly 43%) have been teaching English for 11 years or more. 11.19% of this more experienced group have been teaching English for more than 20 years (Appendix Q1).

Q2 reveals an even spread of teachers responsible for the range of classes from Grades 1-11. The lowest percentage here is just over 40% of respondents teaching Grade 2, the highest just over 51% for Grade 6.

The overwhelming majority of teachers qualified to teach at a university or pedagogical institute (Appendix Q4). We deal with the responses per region in section X.

Experience of and feedback on INSETT
Just under half of our sample (46.35%) have attended 20 days or more of in-service training in the last 5 years (Appendix Q5). Of the 54% or so of the sample who had attended fewer than 20 days, 21.05% (520 teachers) have attended 5 days or fewer. We think that this figure may possibly include some teachers who have been teaching for less than 5 years.

Avloniy, the British Council and the American Council or USAID account for the majority of training providers teachers have had contact with (Q6), though between roughly 7-13% of teachers have also attended training offered by their school, a university or another provider. It seems that Avloniy entry has mistakenly appeared on the questionnaire in 2 halves, and so the data here may not be especially valid or reliable.

Around 90% of teachers found training easy or fairly easy to attend (Q7). Around 31% of teachers work in school which do have a Methodology Day, with 69% reporting no Methodology Day (Q11).

With regard to which training courses teachers perceived as most useful and why (Q8), teachers mention courses run under the umbrella of USAID, ACCELS, RTI and RELO 358 times. This breaks down as ESN courses 158 times, TESOL courses 88 times, American courses [sic] 77 times, and USAID courses 55 times. Teachers mention British Council courses 204 times, and Avloniy courses 125 times. Courses run by a University receive 42 mentions, and TKT courses 28.

While a variety of reasons are given for the usefulness of courses, the most striking pattern is that 439 teachers said they found it useful to learn more about methods or methodology, with learning about techniques mentioned 21 times.

What teachers do to develop teaching skills or knowledge
In response to a question (Q9) on what teachers do beyond attending courses in order to keep teaching skills and/or knowledge up to date, the following are the most frequent responses:

i) Attending a course 502  
j) I work on myself 354  
k) Watching online lessons 285  
l) Reading 268  
m) Using the internet 170  
n) Watching or using video generally 165  
o) Taking a test or exam 138  
p) Using other social media channels 74

This was an open question, so a number of teachers recorded more than one option. Clearly, there is overlap between some of these categories, but we have recorded them as far as possible as answers given without overlap e.g. references to video(f) which omit references to social media (h).

Attending courses appears as the most popular way to work on professional learning. 169 of the references in a) mention online courses. A number of entries appear in machine translation wording as I work on myself in, and variants such as I constantly work on myself or I work hard on myself. We are not sure about the meaning of the phrase here – an Uzbek speaker would need to dig deeper here. However, one possible interpretation here is that the answer refers to teachers finding, creating and using opportunities to learn whenever they can. References in g) include mention of IELTS, CEFR and TKT. Category f) is quite diverse: there are references here, for example, to watching video bloggers, video lessons, video tutorials, and playing video games.

What teachers do to improve their own English

Q10 asks teachers what they do to improve their own English. Teachers were able to choose multiple options here. 43% of teachers attend a course, 40% read in English, 61% study at home, 49% listen to podcasts or radio, while 43% watch films in English. There were a few intriguing responses in the ‘Other’ category, but nothing we could see of significance.

Teachers’ views on their own development needs

In answer to Q12, which asks about teacher’s main training or development need, about 44% expressed a wish to improve their own English, 36% prioritised teaching skills, and 18% a desire to learn how to use the new textbooks for English. As with question 10, there were some thoughtful replies in the ‘Other’ category, but insufficient data here to note any clear pattern.
Teachers’ suggestions on improving professional development ideas for teachers.

The final question (Q13) asks teachers for suggestions on improving professional development ideas for teachers. There is some rich data here which merit further study, we think. Amongst the most frequent patterns in responses to emerge are:

a) The value teachers place on updating language knowledge and skills by contact with people from English speaking countries (659 mentions)

b) The importance attached to attending training courses (530 mentions)

c) A desire for financial assistance with CPD (54 mentions)

d) An interest in clubs and exchanges of knowledge and/or skills (32 mentions)

In category a) teachers mention their interest in studying abroad (227 mentions). In addition, 72 responses mention specific countries (UK, Britain or England 37, America/USA 28, Finland 7). Many teachers would also value contact with English speakers in foreign countries (288 mentions), either via visits or study tours. In addition, contact with native speakers, either in Uzbekistan or abroad, receives 72 mentions.

Category b) suggests that as with questions 9 and 10, teachers are interested in attending courses as a way of continuing to learn. However, in category c) some teachers said that the cost of attending a C1 course was too high, and in some cases unaffordable. A few responses said that course fees should be refunded to candidates who gain a C1 pass. Others say simply that they would like a salary increase. Category d) is a small but interesting one. It suggests that some teachers are willing and able to look beyond courses as a source of professional learning. The category includes suggestions to organise clubs for speaking and discussion (11 mentions), and an interest in exchanging ideas and experiences with other teachers (21 mentions).

Summary of findings

Though a number of health warnings clearly apply to the nature and extent of both our findings and our interpretation of them, we think a number of patterns do emerge clearly.

- The teacher sample see attending courses as a viable way to improve both language and pedagogical skills. (responses to Qs 9.10)

- American, British Council and Avloniy courses have received positive feedback. (Q8)
• The teacher sample see both language and pedagogical development as significant ingredients in their professional learning. (Q 9, 12)

• They are interested in learning more about teaching methods and ideas. (Q8)

• Teachers value contact with speakers of English from outside Uzbekistan as a way of helping their own language learning. (Q13)

• teachers are willing to invest time and effort into their professional learning. (Q9, 10, 13)

• a small minority of teachers are interested in professional learning via clubs and exchanges. (Q13)

A presentation and analysis of findings by region.

For Q3, we received responses from each of the different regions of Uzbekistan as follows. Numbers here are approximate, as respondents used different spellings for some provinces, as well as a mix of Uzbek, Russian and English in their answers. We are unable to assign 473 responses to regions, as many of the remaining answers mention only districts, towns, villages or schools. We did not have time to work on matching these places to provinces.

We have sequenced provinces in this table from west to east.

We analysed 100 questionnaires across 5 areas of Uzbekistan, by dividing Uzbekistan’s 14 regions into 5 areas as follows from west to east:

Area 1: Karakalpakstan and Xorazm regions
Area 2: Bukhara and Navoiy regions
Area 3: Jizzakh, Qashqadaryo, Samarqand, Surxondaryo and Sirdaryo regions
Area 4: Tashkent City and Region
Area 5: Fergana, Namangan and Andijan regions

We took 20 questionnaire returns randomly for each area, with equal representation from each region. Our thinking here was to investigate whether there are any regional patterns, similarities or differences in findings, as this was an issue we ourselves were professionally curious about. It turned out that we were not able to find any significant patterns within or between regions or with the main overall findings from the quantitative questionnaire analysis. In part, this may be due to the small sample size chosen. More detailed analysis across all returns from each province would be needed in order to investigate any similarities and differences more robustly. However, we think this more detailed focus on a cross-section of questionnaires is useful as a way of focussing on and giving voice to teachers’ views. We report and discuss our findings via selected sample comments below.

Discussion

Overall findings in this micro analysis are congruent with those in the macro analysis. For example, there is an even spread of grades taught with each area sample and across the micro sample as a whole, and Methodology Day exists in a noticeable minority of schools. With regard to the range of grades taught, we noted that some teacher teach just one grade, while others teach all or almost all classes. Some entries suggest that teachers who teach most or all grades work in a village school. However, some entries also include city schools, and so data is inconclusive on this.

There is evidence that some teachers misunderstood the question about how easy it was to attend training, intended this to encompass the accessibility of training with regard to convenience. A number of teachers responses referred instead ease with reference to their own language level or professional knowledge with regard to the focus of the training. This suggests that our question was unclear, either in the original, in translation, or both.

We have omitted analysis of questions 10, What teachers do to improve their own English, and 12, Teachers’ views on their own development needs for reasons of time. However, a superficial glance through findings suggests that for Question 10, all 5 options are mentioned. It is not possible to see from this whether one option is more popular than others. Similarly, the options listed in question 12 receive a spread of response. An impressionistic look though returns suggest that the most popular response is improving their English, followed by improving teaching skills, followed by learning how to use the new textbooks, with a very small number of other responses. However, we’d need to look more forensically at findings in order to be able to claim this with confidence.

We turn now to consider findings from 3 open-ended questions, which ask about teachers’ experience of and feedback on INSETT, what they do to develop their teaching skills and their suggestions on improving professional development options for teachers of English in Uzbekistan. Due to the small sample size and time constraints, we omit quantitative analysis of this data.

Teachers’ experience of and feedback on INSETT (Qs 6 and 8)

As with the overall findings, training given by American providers, British Council and Avloniy were most commonly attended. About a third of teachers gave no reason for an INSETT preference. In contrast to the Head teacher responses, American training received much positive feedback in the comments which teachers did make. British Council and Avloniy training was also viewed positively. Other universities and Maktab training were also mentioned appreciatively. The overriding reason for positive feedback was linked to methods or methodology. Again, this very much reflects the content and tenor of overall findings. A number of sample comments illustrate the value teachers see in learning about methods and methodology.

- ESN was directed to the development of a real methodology for improving the skills of foreign language teachers
- ESN is valid methodology
- Lesson transition had a good effect on my methodology

www.britishcouncil.org
• ESN, a program organized by the American Council, was able to develop me a lot. I was able to find an answer to the problems in the organization of lessons
• We learned the methods. I applied the necessary games to our lessons during the course of the lesson
• Samarkand state foreign languages in the institute in training taught me methods which I use in my classes
• Avloni National Research Institute: It was beneficial to work on methodological aspects of teaching young learners with various fun activities and creating language atmosphere in upper classes. In LPA trainings I learned interesting games methods
• I learned methodology
• New methods are important for me
• Methodology learning
• Methodology excellent
• American Council because of Methodology in the Teaching Process
• We learn new interactive methods in your advanced training courses. It's convenient and in English.
• The course conducted by Avloni was very useful for me because I learned effective methods

A few isolated responses also referred to the value of increased knowledge gained from training. Interestingly, one response valued the sharing of experiences

• Avloniy British Council experienced at The British Council named after Avloni. Our teachers shared experiences

What teachers do to develop their teaching skills (Q9)

Patterns in response to this question were also consistent with those identified in the overall findings

The 4 most common means teachers reported as using to develop their teaching skills, in order of frequency, were

• Using the internet (excludes attending online courses or watching videos)
• Attending courses
• Reading
• Watching videos

There is overlap here between the categories - using the internet, for example, may involve reading or watching a video or both. It may also involve attending an online course. As far as
possible, we have recorded entries these categories as discrete ones. In addition, a number of teachers stated explicitly different examples from some or all of these categories as ways of learning. There were a small number of answers which fall into other categories.

Using the internet
Some teachers like to develop in ways which may involve them working alone.

- I look for grammar books and visual aids and interactive methods, games on the Internet
- I perform tasks on 4 skills from the Internet.
- I study online courses. Both in language and psychology in pedagogy.
- I use internet educational sites
- I update my knowledge online

Others like to learn through internet activity more likely to involve social interaction.

- I participate in webinars
- I also participate in additional online groups
- I learn various methods and information through groups on Google and Telegram

Attending courses
Both online and face-to-face course were a popular way for teachers to focus on their teaching skills.

- I attend various trainings and seminars
- I attend online courses
- I attend CEFR courses
- I study in additional courses
- I attended online courses by BC and American embassy in Tashkent.
- I regularly attend English courses

Reading

- I read a book
- I read additional resources
- Read some articles
Video

- Watching YouTube Tutorials to have interactive lessons
- I watch English with Cambridge on You Tube. I got the C1 level for the 2nd time in November
- I always try to improve my teaching skills. I watch some videos related to how to teach professionally on YouTube
- I watch Telegram or YouTube

A mix of ways

- To improve my skills, I often attend trainings, watch master classes and read foreign articles. As far as knowledge is concerned, I work at home in my free time to work on myself
- I am reading additional literature. I am preparing for international certificates. I am watching video lessons
- I try to find new things using the Internet and follow the lessons of teachers
- In order to develop my career, I take part in zoom classes or conferences of my country. Because they help how to teach language with new methods
- I work on myself, take exams, attend online courses and webinars
- I attend different local or international conferences, and I search for important materials from TESOL INTERNATIONAL ASSOCIATION.
- I always work on myself. Self-study or taking information from telegram groups

Other categories

6 responses referred to taking exams or attempting to gain international certificates. For example:

- Continuing to attend courses in order to obtain more International certifications
- I am trying to get various foreign certificates
- I am currently working and preparing for the multi-level exam

3 responses included reference to learning by sharing

- I share ideas with other teachers
• We analyse our lessons by exchanging ideas with my colleagues. I ask students for their thoughts on my lesson and read teaching guides.

One response suggested, perhaps, learning by experimenting and reflecting.

• I use more new methods.

In sum, the sample group use the internet as the most common way of continuing their professional learning. A number of responses referred to more than one way of continuing to learn professionally. Attending courses, whether online or F2F, is also popular. In some cases, the gaining of an international certificate is important for teachers. Teachers also consider professional reading and watching videos as useful. A very small number of responses referred to learning by sharing.

Teachers’ suggestions on improving professional development options for teachers of English in Uzbekistan (Q13)

This question produced the most diverse set of responses from teachers. As in the overall findings, sending teachers to an English-speaking country was the most frequent suggestion. This arguably overlooks the practical wording in the question, but is nonetheless a useful indication of what teachers would recommend. Contact with other speakers of English was also a popular suggestion. A number of responses prioritised helping teachers to use the new textbooks. Some respondents also see offering courses and improving the range of resources available to teach English as important. Some responses referred to the need to provide opportunities for teachers to share ideas and experiences.

It was intriguing to note that a number of teachers, mostly those from rural areas, argued for increased support for rural and remote schools.

Selected comments appear below in order of category frequency. Caveats apply once more. Some categories contain replies which could sit elsewhere and others were unclear. We have omitted these from our selection.

Send teachers abroad

• I consider a one-week refresher course to be completely ineffective. I believe that it is necessary to send teachers to foreign countries for training and exchange of experience with foreign teachers.

• Teachers should be sent to countries that speak this language for training.
• It will develop if the state ensures that English language countries go to countries for training and travel
• It would be great if they organized a trip abroad
• The best thing is to send teachers to English speaking countries
• Sending teachers as travellers to English-speaking countries for 1 month a year
• It is necessary to send an internship abroad to countries where English is the official language for at least 3 months.
• I wanted to go to the countries where the language is being studied, learn the language more perfectly and exchange methods with real Englishmen, and compare Uzbek children with them and then teach the language.
• As for me there should be a real condition for teachers to go to Great Britain and live there for at least 3-2 weeks. Teachers should see Big Ben, London Bridge, Buckingham palace in real life not only in their imaginations, in pictures or in books. From my point of view teachers should see a real atmosphere in British schools, feel the calling of TEACHING and know the learning process in British schools. It will give us (for teachers) a big motivation, inspiration for us
• Sending internship abroad

More contact and communication with foreign teachers or speakers of English
• Organising trainings with more foreign experts,
• Find foreign volunteers and invite them to work at the school.
• I would recommend to organize more trainings with local and foreign specialists
• I think teachers should communicate more with native English speakers.
• Meetings with teachers and native speakers organized as much as possible
• The attachment of a teacher whose mother tongue is English in each school.

Further support on textbook use
• Learning to use new English textbooks (6 mentions)
• It is necessary to teach how to work with textbooks in training courses, to help to improve methodological knowledge
• New study guides and textbooks should be dealt with on the basis of experience

More courses
• Authentic IELTS Courses for Teachers
• It would be appropriate if different methodological classes were organized
• Give more possibility to get International necessary certificates
• Organization of trainings
• Increasing training
• To organize training courses
• Attending weekly master classes by strong English teachers

Support with resources
• All conditions for teachers: electronic board, language rooms, computers, etc
• Additional textbooks and manuals if given
• Modern audio material, language, and technical tools should be brought to the libraries
• Provision of necessary equipment: computer, printer, projector, speaker
• English language room, ICT provision

Pay attention to supporting rural and remote areas
• Bring more qualified teachers to remote schools to teach methods
• More CPD courses for teachers with foreign teachers. Not only teachers who are active and who live in city centres but teachers who live in villages should also meet with foreign teachers to develop themselves to improve their productive skills and to enlarge their outlook. Provision of various methodological literature for English language teachers in rural schools with language classes.
• When organising trainings, involve teachers in remote areas, not only in schools in the centres
• More international seminars if organized. In villages, too..
• In my opinion English teacher should participate international webinars, conferences or zoom classes more and organizing one day for them to share their challenges in order to develop their professional qualifications. Furthermore in rural places please pay attention to training courses by professional trainers online or offline

Cooperation/sharing
• Sharing training methods
• … the main point of course the collaboration with other teachers, exchange ideas, share experiences with native speakers will also give its effectiveness
• Working in cooperation with teachers from more foreign countries
• Sharing experiences with teachers from other developed countries
• Extra courses should be organised, teachers should share their knowledge with each other.

Other
• Mainly, it is necessary to establish communication with parents of students, because children spend more time at home than at school. Because, as Abdulla Awlani said, I think education should be the most important feeling for us. It is very important not only for foreign languages, but also for all subjects.
• A student must graduate from the institute as a graduate, not a specialist
• Competitions between schools
• Development of public literacy
• Simplification of textbooks
• More discussion clubs
• Creating conditions for additional engagement in schools
Online and in-country interviews and meetings

Appendix 12
First online meeting with Avloniy

Interview with Avloniy 23/12/22 16.00-17.15 Uzbek time

After introducing everyone, Jamilya informed everyone that the aim of the current NILE consultancy is to identify the current CPD journey of teachers of English in Uzbekistan, and to consider also what a desirable journey might consist of. Jamilya mentioned that the President of Uzbekistan announced 2023 as the Year of Quality in Education earlier this week. This suggests that the current consultancy has come at an opportune time, she thinks.

General question
1. What is the nature of the relationship between Avloniy and the Ministry of Public Education (MOPE)? Do you maintain close contacts?

A colleague explained that Avloniy institute comes under MOPE umbrella. There are therefore close connections between Avloniy and MOPE.

CPD

2. Could you tell us about the scheme of CPD which is replacing the once in every 5 years professional development courses.

A colleague confirmed that there is a new system of public education now, including the way in which CPD is handled. He explained that there is attention now on increasing teacher qualification every year. An Avloniy person is preparing a plan with MOPE on how they’ll improve quality in education. Previously, one institution was responsible for CPD nationally. There is a much more decentralised CPD landscape now, with more CPD options and more CPD providers.

Now CPD provision consists of 4 options:

v. F2F traditional trainings

vi. CPD provision on Avloniy’s LMS platform. This was built from scratch 2 years ago, and works on a similar principle to, for example, Coursera, MOOCs-

vii. Private sector CPD providers

viii. University providers

www.britishcouncil.org
The reason for this change is that MOPE wanted to end the previous monopoly system on CPD provision, as there was little evidence that this had led to improved teacher knowledge or skills. The new system also recognises certificates from other countries e.g British Council courses. A teacher who gets a PhD or writes a coursebook receives 54 credits. This means they’ll be exempt from CPD for 3 years.

Avloniy have a list of 17 routes to CPD with accompanying credit allocations. British Council have kindly offered to translate this and send to NILE.
3. How is quality of CPD provision determined?

Avloniy has one uniform curriculum for everyone. If a CPD provider wants to offer courses, they need MOPE permission, via approval from Avloniy.

4. Are courses inspected?

Avloniy is responsible for QA.

5. How does the LMS platform work?

Another took over at this point. He told us that the digital platform is heart of CPD reform. It diagnoses user needs (e.g. of a teacher or Head) by identifying gaps in competences. 6 of the 7 competences are uniform across all curriculum subjects. The subject-specific competence relates to ‘pedagogical knowledge’.

Diagnosis is by multiple choice. Based on this diagnosis, the platform generates a radar map of a teacher’s competence. This map leads to offers of courses based on a deficit model of teacher learning. It also calculates the credit weighting of a specific course. Course content consists of 10-15 minute videos. Periodic comprehension checks prevent course participants from skipping content. Participants need to go the rough content in a linear fashion, i.e. step-by-step. They can do their course at any time. Some courses are asynchronous, others have synchronous components (e.g. 4 or more F2F meetings with coursetakers per year, or a live Zoom-meeting).

Avloniy invite best teachers from schools and universities to develop the online videos. Anyone can contribute.

He stressed that the LMS platform is still very much work in progress (e.g design of multiple choice questions), as it is only 2 years old. For reasons of time, we weren’t able to clarify whether multiple choice diagnosis of teacher needs is via self-assessment, objective assessment, or a mix of both.

6. What’s the relationship between Avloniy and Universities? E.g. do you approach a university lecturer you want on your CPD course directly, or do you go through MOPE?

We want to develop video content for 2024 in 2023: there is a project manager for this. They make approaches to university teachers or others directly, including to previous trainers.

Standards
7. Could you tell us a little about the new standards Avloniy are developing for teachers and for Heads?
We got together with UNICEF experts from a European country to develop standards (i.e. competences) for teachers and for Heads.
8. How do you get information to teachers and Heads about the standards? For example, what they mean, why they're important.

One opinion, not an official MOPE one, is that the old system was centralised, but now Uzbekistan is moving towards a decentralised system. While moving to a new model, Avloniy doesn’t want to bombard teachers with too much information, he feels, especially theoretical or academic information. In sum, Avloniy are going step by step, and at the moment are keen not to overwhelm teachers and Heads. He confirmed that the transition from a top-down to more of a bottom-up approach is a slow process.

9. Do you know if there are any plans to develop and use standards for INSETT providers and for INSETT trainers?

This is now under consideration. Teacher training was under the aegis of Ministry of Higher Education rather than the Ministry of Public Education. Now, with the new model, this may change.

Work with Teachers of English generally

10. Have you built everything you need to build on the LMS for teachers of English?

Content is still being developed. We might need help with the competences, for example., and with diagnostic questions. We have one course specifically for Teachers of English from George Mason University, called ‘Teaching English through English’. This course is open access under the ESN English Speaking Nation project https://sites.google.com/view/mason-tete/home?pli=1 (B1 teachers study for TESOL certificates and A2 teachers take this course). It is similar to British Council’s Online Teacher Community English for Teaching course which is also for A2 teachers.

11. A teacher’s CPD journey arguably starts with PRESETT, so what are Avloniy’s links with PRESETT?

We have 3 ministries, and so historically there hasn’t been much interaction between MOPE and Ministry of Higher Education, which prepares future teachers. It looks now that more control might be given to MOPE. PRESETT courses are now developed based on competence. A goal is to link PRESETT with INSETT.

Other

12. Could we have permission to interview some of Avloniy’s trainers?

Please could British Council send Avloniy more information about the current consultancy so that we can make a decision.
13. Is there anything else you’d like to say about CPD for teachers of English?

Not at the moment.
Appendix 13
Second online meeting with Avloniy

Follow up questions for Avloniy meeting 28/2/23

Courses

1. **Is the 36 hour course for teachers online, or can training and retraining institutes teach it F2F?**
   The course is essentially an INSETT syllabus to support the new CPD model (i.e. ongoing rather than periodic CPD). Any of the 4 main CPD players can run courses based on this syllabus. The course can be longer than 36 hours if need be. The courses must address the 8 competencies in the syllabus, though materials from different providers may vary.

2. **What language are the non-English language teaching parts (e.g. focus on legal documents) of the 36-hour course taught in?**
   Uzbek. Our informant said that the CPD model is new for everyone. They’re having problems with content. They wish all courses could be run in English, but due to the novelty of the CPD scenario, there is lack of specific CPD content for teachers of English. This is also in part due to lack of human resources. Most courses are now taught in Uzbek. Only one or two state-run courses are in English.

3. **How far do your courses build on what PRESETT graduates have studied?**
   Not sure. Personal view: as far as he knows, they don’t. PRESETT programmes aren’t designed on the new CPD - they base their programmes based on MOHSSE requirement. So in some ways a bridge needs to be built between INSETT and PRESETT. This needs to happen.

4. **What expertise do you have within Avloniy for online course design for teachers of English?**
   They have online specialists for designing materials for teachers of English, but not many - just 1 or 2. The content they have isn’t much. They have received content thru GMU (Teaching English Through English) and have uploaded this. Teachers are taking that course as part of their PD.

5. **Who designed the course syllabus and how?**
   This was all done in-house. They developed competencies themselves. They need more help with course content and with designing materials. British Council and US are filling up the void, especially ESN.

6. **What are the principles behind the design of the course?**
   One module consists of 5 lessons, Each lesson consists of 5 parts.
   
   i) a video (7-15 mins),
   ii) additional materials
   iii) check-up qs,
   iv) PowerPoint of other materials used in the video
   v) Other material based on what the course creator thinks is important.

   Shift from periodic CPD update phase to ongoing CPD phase is tough for teachers, he says. He doesn’t want to overburden teachers.

   He said that Avloniy need more specialists in course design.

7. **Do any features of your LMS put constraints on your online materials design?**

www.britishcouncil.org
No. Avloniy get quite a lot of data about how long teachers spend on doing the course at national, regional, district and school level.

They have a wide range of functions on platform, but not depth, i.e. they use a wide range of functions, but use them superficially.

8. **Does Avloniy have other courses for English teachers; language improvement courses, for example? Please tell us more…**

No. Avloniy are interested in this, as one of the competencies is self-development. This is loose concept, but language development can be part of this. There may be issues of whether a language course aligns with standards, but Avloniy could give credits for them.

9. **Do you have plans for the future for English teacher courses?**

Not aware of these. They want to develop more versions of our platform -75% of users use mobile phones. They want to make sure the LMS is accessible offline. Teachers can then download materials offline, and then when they go online can synchronise with the LMS.

They’re thinking about how they can connect learners’ Maths results with CPD. They’re collaborating with KIE Advanced, a Japanese company. Avloniy want learners to take exams and connect the results with teachers of Maths. A Maths teacher would then take a Maths course based on the Maths performance of their learners in order to upskill on any perceived weakness in an aspect of Maths.

The project on Maths will be trialled, and could be scaled up for other subjects if successful. He is aware of possible problems with this approach to teacher education, but is hoping it could be useful for teachers to learn about their learners’ results.

10. **How does the diagnostic m/c q system work for teachers of English? Could you tell us more?**

We didn’t ask this question.

11. **Could you tell us more about the 8 teacher competences- how do you match with standards? Who designed them? Will they stay, be further developed etc?**

Our informant said that standards and competencies should match: standards on vertical line, competencies on horizontal line.

Presidential schools are doing work on competencies, they’re starting to elaborate them. Avloniy are starting to look at whether they can work together with Presidential Schools. The leadership of Avloniy should review the Presidential standards before any decision on alignment with Presidential schools is made. Our informant has not seen the Presidential standards himself.

12. **How do you monitor and evaluate your teacher education courses? (both online courses and F2F in the institutes around the country)**

Responsibilities exist for Avloniy, but human resources at Avloniy are scant. They can monitor quantity (e.g attendance) but not quality.

13. **Do you have criteria for quality assurance?**

Our informant thinks that it would be useful for Avloniy to develop criteria for QA, linked to principles of CPD.
He added that most donor-led projects are HR intensive. They require a lot of detailed work, which they appreciate, but when projects end, momentum is not there anymore. This is partly due to lack of financial support.

If Avloniy develop something less dependent on manpower, but more dependent on computers, that would be good. He recognises that human involvement is necessary for assessing quality.

14. **How do you license private INSETT course providers? (e.g. What does the application process involve and what criteria do you use to assess suitability?)**
   - Private provider compiles a letter to MPSE and programme requesting approval
   - MPSE check legal status and other aspects of the provider. If they approve the institutions’ request, they then send request to Avloniy,
   - Avloniy check details, send feedback, which may involve asking the provider to embed certain competencies, for example, into their programme
   - The institute makes changes if need be, and sends documentation back to Avloniy for approval

15. **How do you recruit new trainers for your courses? What qualifications and experience do they need to have?**
   Should have C1 level - this is the only requirement our informant knows. Masters’ degree would be useful, too. He recognises that training teachers is a specialised skill, and is open to the idea of, for example of trainers attending a trainer education course.

16. **What is the status of the 17 CPD activities a colleague referred to in the ERSG meeting last week?**
    These are accessible to teachers now. They can be updated quarterly if necessary. Not sure if a Maths teacher gets credit for C1 in English.

    The rationale for the credit system is to acknowledge teachers' efforts. He feels that Avloniy can’t ask more from teachers at this stage. When you switch from an old system to a new one, you don’t want to overwhelm teachers if they are not competent. If teachers were aware of these things at University, Avloniy’s job would be easier.

17. **You mentioned at the ERSG meeting that you’re short of resources- do you know what the future looks like on this?**
    Structure of new CPD model - the skeleton, is ready. Avloniy now need to put flesh on the bones. E.g. they have a competency model but now need to develop sub elements, and also to develop monitoring and evaluation.

    The state budget is tight- about $20 per teacher who attends an Avloniy course. Teachers need to decide on which course they will attend in November. They can choose from any of the 4 main providers. Avloniy’s funding is therefore clear by late December or so. Fixed costs (e.g salaries, maintenance) are provided but other funding from the teacher numbers needs to be bid for in the form of projects. Avloniy are currently planning for 2024.

18. **Is there anything else you want to tell us or ask us about your work with English teachers?**
Our informant is keen for system alignment, e.g PRESETT and INSETT, standards and competencies. He says that English teachers are often in the vanguard, and so it would be good is consultants’ report can help with alignment.
Appendix 14
First in-country meeting with Champions Panel

Champions Panel Meeting Irrigation University 10.00-12.00 17/2/23

Simon showed the interim findings from the consultancy so far. A brief summary of panel feedback below

- There is no common CPD policy which makes it clear what teachers are aiming at (Nodira). If there is no common aim, some teachers feel they can do what they like in the classroom
- There are problems with both CPD policy and strategy. With regard to policy, there is no recognition of the efforts of some institutions e.g. one panel member’s university offer a UK-validated MA, but this is not on the creditworthy CPD list. Its impact on CPD is high and involves a process. As for strategy, she sees no interest in process in current Ministry thinking. For her, some form of Action Research pitched in teacher-friendly guise would be an example of an informed and strategic approach to CPD,
- Teachers are at different stages of career- CPD needs to be more targeted at different profiles of teacher
- A problem with the current system is that it is course and certificate focussed, not learning-focussed. “It’s just certificate and bye-bye”. The value is in gaining the certificate, not in professional, learning.
- There is an implementation gap in teacher education in Uzbekistan. A teacher may know, for example, about CLIL, but isn’t able to teach in a CLIL-friendly way.

Simon then asked the panel to do the following task

<table>
<thead>
<tr>
<th>Undertake a critical examination of the list of 17 MPSE creditworthy CPD activities available to teachers of English in Uzbekistan. (see final page of minutes)</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) How relevant are they to the needs of state school teachers of English?</td>
</tr>
<tr>
<td>b) How coherent are the options as a whole?</td>
</tr>
<tr>
<td>c) Any other comments or thoughts?</td>
</tr>
</tbody>
</table>

Report back with recommendations on what you might keep and what you might change.

A summary of oral contributions and short written summaries from each group follows.

Relevance and coherence
On balance, the panel felt that the options were far less relevant and coherent than they might because they
a) lean much more towards individual than collaborative professional learning
   
   *e.g. options 1-8*

b) are more competitive than collaborative in orientation

   *Many of the options are competitive—there is insufficient recognition of the value of cooperation in CPD*

c) are elitist, as some options provide credits to a very small number of teachers
   
   *e.g. options 2,5,6,7,8*

d) favour teachers in cities over those in remote areas
   
   *e.g. options 2,8, 15*

e) do not acknowledge sufficiently school, local and regional CPD initiatives
   
   *No options seem to do this*

f) are at times more academic than pedagogical in nature
   
   *e.g. options 3,4,14-16*

g) contain options which do not necessarily improve classroom teaching
   
   *e.g. options 2-8, 15-17*

   *A written comment from one group captures this view. Key question which we discussed in our group was if as a teacher who just his/her job the relevant or possible form of CPD in the list does well is point 9 and because this is a compulsory course. Other points or items are for very limited numbers of teachers or they are just not for them to teach a better lesson*

h) omit key CPD options such as mentorship

i) are not all continuous

   *e.g. options 1-8*

j) are weighted questionably at times

   *Many felt that the credit weighting of some of the options was questionable e.g. 4 credits for taking part in an International Scientific Event, as this typically requires huge amounts of time and effort. A similar view from some on 9 credits awarded to the gaining of a C1 qualification.*
Many panel members said that the weighting of 54 for Olympiad success was inflated that Olympiad success can be due to factors other than the teacher (e.g. private tuition, residence abroad).

k) arguably prize international contribution over Uzbek contribution

There were differing views on whether some of the conference activities diminished the role of Uzbek initiatives, as Uzbek conference participation receives fewer credits than international participation. Some colleagues held this view, but there was also a view that participating at an international conference is more demanding and time-consuming, and so deserves greater recognition.

What the panel would keep

The panel worked in 4 groups

3 mentions: 10, 11

2 mentions: 9, 13, 14, 16 and 17 (these last 3 all modified)

1 mention: 1, 3, 4 (all modified)

What they would change

The panel felt that a number of the options are too centralised, and insufficiently targeted at everyday classroom teaching. They said that there needs to be inclusion and more recognition for:

a) Small professional learning initiatives at school level

Numerous oral contributions on this.

b) Regional initiatives (e.g. speaking at, participating in, organising a conference in your town or region).

Numerous oral contributions on this. One written comment: Some of them should be decentralised, regional courses should be organised.

c) Mentorship

Numerous oral contributions on this and some written comments, e.g.

Add: mentoring, any research work (not only PhD), authorship, publications (any learning/teaching resources)

Point new: There should be added a new item that would encourage teachers to grow as a facilitator, trainer, and mentor. We do not see this idea in the list.

Add mentoring to support ‘lesson study’ approach

d) Dissemination of any learning gained from attending events, writing materials etc
A number of oral comments on this.

e) **Needs or interests of the teacher.**

Numerous oral contributions on this. Panel would like to see more chances for CPD based on needs analysis. At the moment, they say, course are offered to teachers, who sometimes have to attend, regardless of need. (e.g. teacher proficient in ICT required to attend an introductory course on digital literacy).

f) **Quality.**

The options focus more on quantity (e.g. certificates). This jeopardises quality, as teachers go for shortcuts.

One colleague also commented that school leadership also need their own specialised focus on CPD, so that they can understand and support teacher CPD needs when feasible.

**Panel suggestions on modifications to existing options**

- Point 14 can be written as ‘(any) publications produced by a teacher (or as a co-author) e.g. articles, handbooks, toolkits etc (that is shared in practice with colleagues)’
- Points 10+11 can be all right, but they should be paraphrased as ‘a CPD activity including training programmes offered by the recognised international organisations such as British Council, American Council, etc’. At the moment, the courses mentioned in the list are very narrowed options.
- Change: Olympiads (omit), Certificates, completing courses (what courses? The purpose of courses?)
- Join 9-12, and 15-17
- Get rid of 2,6,7,8,16

**Suggested changes to credits**

- Point 15, 17: credit amount should be increased (comment: especially for schoolteachers who have very limited opportunities and options for participating in such kind of events)
- We can change the credits some of them (increase)
- We should make it collaborative, real consistent
- Change: Credit changing from [points] 10 to 17 forms of alternative CPD
- 16 form of alternative CPD to increase awareness of the importance among teachers
- 17- ranking: regional -4, republic-8, international -16
- TKT/CELTA/TESOL qualification course completion credits 54

Appendix 15

First in-country meeting with teachers

Meeting at a school in Tashkent 15 February 2023 9.10-10.40

Background on the school
It operates 2 shifts. The first is from 8.05-13.00, the second from 13.10-18.00. In first shift there are 4 hours of English, in 2nd shift 3 English lessons. Students have 3 lessons a week of English, 4 hours for specialised classes (Maths and English 7 and 4 hours in place of 4 and 3 hours). The school has autonomy in choosing and making provision for specialised classes. The school has a high reputation: more than 70% of its graduates enter university.

Q1 How long have you been teaching English?
A mix of experience here, though no one has been teaching English for more than 20 years.

Which grades do you teach?
1 teacher teaches grades 1-2, the rest some of the grades between 5-11

How did you qualify as a teacher of English?
All are university graduates.

Which courses have you attended?
All have attended a lot of courses. They say that they find specialised courses (i.e. specifically for English teachers) useful, general courses less so. Avloniy has online offers which are not useful, they say. Medical content in some courses (e.g. about anatomy) is compulsory for English some courses. teachers said that British Council and USAID courses are more useful than Avloniy, because they learnt new methods on those courses. Avloniy courses are less useful because most of them are in Uzbek, trainers not trained, information is transmitted via lecture, and subject matter is not so useful e.g. new laws. Also content is too basic for this group, they say. Last year some teachers did British Council and ESN for 18 credits, but this year can’t repeat these and have to do Avloniy.

They would therefore like more opportunities for courses, i.e. more variety to choose from.

What else do you do to keep your teaching skills and/or teaching knowledge up to date?
sharing learning with other teachers from cascading courses (as trainers on other courses for teachers which run over 10 Fridays from 9-1pm), paying 800 dollars CELT S, search internet, learning from teacher book for Prepare.
What do you do to improve your own English?
A few say that husbands are not always keen for them to spend time learning, but they manage to navigate this. Motivation comes, they say, from the 50% salary bonus for a C1 certificate, and to keep up with students, some of whom already have IELTS 5.5 by Grade 11. The Rector also demands high standards, and the fact that the school has a good reputation is also a driving force.

Internet, online courses, which they pay for.

Does your school hold a regular Methodology Day?
This stopped in Jan 23. Teachers said they found the day useful, but acknowledged that the day is open to abuse.

What is your own most important training or professional development need?
Both language and methodology
Please mention any practical ideas you have to improve professional development opportunities for teachers of English in Uzbekistan.

Teachers said that the government demand high level from teachers but can’t offer sufficient variety of opportunities, teachers feel. Teachers would like there to be free language development opportunities on offer. They say that fees for certificate courses is in theory reimbursed on production of certificate. But in practice this it is time-consuming and hard to get a refund.

One teacher would like chances to exchange ideas and experiences with foreign teachers

Change programmes to make them more TESOL-like
Appendix 16
Second in-country meeting with teachers

Focus group of teachers – meeting at Tashkent Training and Retraining Institute 10am -1pm
Monday 6th March

Six teachers:
For foreign languages, class of 25-30+ divided into 2

What do you enjoy about your teaching?
One teacher: proud to teach language, I love foreign language, it’s my dream, I want to travel
Another: enjoy/interested in foreign languages, IELTS next month
Another: [translated] she just brought her documents and she passed for teaching…but do you enjoy it?] so so
Another: after overseas travel, feel someone should stay here and be ‘patriot’,
   English will be language of business and we should teach in English
5th teacher: parents were teachers, I played role of T with my dolls, I’m a teacher with my nature, now retirement age and I say ‘work/stay at home means more work!
5th teacher: [translated] a good option for traditional Uzbek families, convenient as school is close ‘to be at home on time’

Challenges?
Lack motivation
-value of learning English, lack of connection now (opportunity to communicate outside class) and to future life
-mobables, games
-‘boys are lazy’
Problems with playing recording – use phone +speaking
45’ lessons and moving between classes carrying equipment

Hopes and dreams?
One teacher: hopeful of Grade 1-11 Cambridge books, Prepare in English and Guesswork ‘I thank authors’
-including technology [multimedia]
www.britishcouncil.org
-up to date topics
-Reading and Listening in the book is wonderful (One teacher agrees, but another doesn’t like them, too easy)
-continuity between books/levels, so it’s easy to work with them
One teacher: high score in IELTS and teach in Learning Centres where ss are motivated
Another: IELTS as gateway to TESOL courses > methodology to apply to teaching
Another: retirement, because teaching isn’t respected via salary (most agree)

**Your CPD journey?**
One teacher: Uzbek language teacher, ELT came on move to Tashkent, and mentoring of ‘Clara’, a teacher at our school years ago, I came to love English and every 3 yrs I come to Tashkent city Training and Retraining Institute, would like to teach overseas
Another: TT every 5 yrs lectures-test then Avloniy: no tests, chance with exchange of methods, in my school we try to help novice teachers and there is an atmosphere that helps this.

*How do you feel about CPD? Feel included/heard?*
If you want to go to institutes other than Tashkent Training and Retraining Institute, you have to pay.

*Meth Day…?*
This was a rest day for most, for two, school gave them duties

**Whose responsibility is yr CPD?**
Unanimous: our school

**Written answers to 3 questions:**

- **Should CPD be tailored to the stage you are at in your career?**
  - One teacher: no
  - Two others: yes
  - Another: Dividing CPD courses according to their experience is not a good idea. Sometimes, even experienced teachers can learn a lot from novice teachers.

- **Is it better to develop individually or work with other teachers on development?**
4 teachers: with others, to exchange experience
Another: with others, because ‘people should be lazy’

Should you CPD be based on a needs analysis, or based on a standard national programme?

2 teachers: standard
Another: standard ‘it is normal for me’
Another; standard ‘because they know more what we need
Another: based on NA ‘because I have to get something’
Appendix 17
Online meeting with UWL and Nizami

Uzbekistan CPD: Online interviews with representatives of Nizomi (State Pedagogical University) and University of World Languages (UWL), on 20 January 2023. Main focus on links within PRESETT to CPD.

In response to a question about the role and status of Nizomi SPU, a colleague told us that the University has 14 faculties, 54 departments and more than 1000 teaching staff with a Doctor of Science qualification, as well as 100 plus with full PhDs in pedagogy. It was founded in 1935. It is the parent university to 17 other pedagogical HE institutions nationwide.

Answering a question about the links between the PRESETT Curriculum and CPD, a UWL colleague explained that, while there is no dedicated module on CPD in the programme, many of the modules from Year 2 onwards focus on the realities of teaching in school. There is a graded approach to Teaching Practice: Year 2 - Guided Observation; Year 3 > Teaching Apprenticeship; Year 4 > Full responsibility for lessons. Assignment work in most modules includes an element of reflecting on practice, and modules or part modules on lesson planning, discussion of professional articles, classroom investigation (two modules in Yrs 3 & 4) and the main methodology modules all prepare students for their career as teachers.

To what extent does Nizomi follow the reformed four-year PRESETT curriculum?
Another colleague added that they follow the PRESETT Curriculum quite closely though with combined skills language courses in Year 1.

How many undergraduate students of English does Nizomi have in each year?
They had 200 graduates majoring in English in 2022 and expect 400 in 2023. These numbers are relatively small compared with UWL, which reports 1500+ graduates annually.

What proportion of successful graduates from the PRESETT programme go into state school teaching as a career?
However, the proportion entering state school teaching is far higher among Nizomi graduates (80%+) than among UWL graduates (30 – 40%). But a significant number of UWL graduates find employment in colleges and lyceums as well as in the private sector, and around 20% go on to full time MA studies in Applied Linguistics.

To what extent (if at all) is Nizomi involved in INSETT or other CPD activity for serving state school teachers of English?
Nizomi, through its network of pedagogical institutions also offers INSETT for state school teachers once a month, usually focussing on pedagogy for young learners. They also offer courses leading to TKT (all three modules), which qualifies teachers for a 50% salary bonus.

- CEFR - C1
- IELTS - 7+
- TKT- 1, 2 and 3 (4 modules needed for University teachers)
- TESOL- Level 6
- CELTA/DELTA
- TOEFL- C1
- APTIS for teachers C-1

Some Nizomi staff attend courses at UWL for their own CPD.
The new CUP Textbooks

Two different opinions on the new CPD textbooks were offered. A colleague said that INSETT courses should focus on the new books and that this would improve the quality of teaching. This is because the books represent a change of thinking about language learning from the books previously in use. One colleague (a mother as well as a teacher) told us that the books are too strongly focussed on preparation for international exams (e.g. FCE) rather than on the needs of young Uzbek students. This led to a mention by Rod of the need to include sessions on evaluating, adapting and supplementing of textbooks in the PRESETT programme (a colleague agreed to consider this) and as possible INSETT course topics.

Other discussion points

- A puzzle: in addition to their degree certificate after 4 years of study, graduates have to pass a language test at B2 level or above in order to start teaching. One contributor mentioned a real case in which a PRESETT graduate was refused a state school teaching post because she didn’t have the required certificate of language proficiency.
- A colleague (Nizomi) reminded us that private universities are now proliferating in Uzbekistan (more than 60 at the last count) and that many of them offer English as a main subject of study.
- Yayra reported on the MA degree in Applied Linguistics at UWL. It is delivered by lecture to large groups of students (100+), is theoretical in orientation, and has no practical components. It’s a two-year full-time programme. (Comment: A professionally oriented MA programme for practising teachers, possible part-time, would be a valuable addition to CPD options; perhaps mention in report)
Appendix 18
In-country meeting with Akfa private university

Interview with a colleague at Akfa private University, and 8 PRESETT teachers. 14.30-15.45

Can you tell me something about the history of Akfa? When was it established and what is its main role in teacher education?

Set up in 2019 by presidential decree. Started as a medical university, in partnership with a S. Korean medical university. They wanted it to be the first English medium medical university in Uzbekistan. Over time, they decided to diversify. They launched a business school in 2020, in 2021 a school of Education, with one programme, a 3-year bachelor programme for PRESETT ELT. This year Akfa has 6 schools and 18 programmes. Campus was built in 11 months. Akfa group own the university. Within the group, it is the mayor of Tashkent who is the owner. He is a v successful entrepreneur.

Current PRESETT cohort is in 2nd year. Ca 130 students in 2nd year, 160 students in first year. 2nd year students have already started their TP. They also started work in private schools, and some have been offered jobs already.

What is CPD?

We expect staff to work on their own, and also twice a year provide courses for their own teachers, including, possibly, courses at NILE this year.

What connections do you see between your PRESETT programme and CPD for future English teachers?

They have developed their own programme for secondary teachers. Around 70 teachers were offered this TET (Teaching of Teachers) programme free of charge. The programme is a F2F 22 hours methodology-focussed course. Certificate offered isn’t recognised by the government. We informed our informant that Akfa could apply to Avloniy if they want the course to gain validation as an official CPD option.

How do you evaluate the quality of your work?

The fact that 2nd year students already have a job offers suggests they’re doing well, our informant says. Feedback from teachers in schools where the students are placed also suggests that the students are doing a good job.

To what extent does Akfa follow the reformed 4-year PRESETT curriculum?
Akfa have their own. They started from their own objectives. They felt that there was extraneous materials in the national curriculum. They have gained this information from some of their own teachers, who have graduated from state universities. Their curriculum was licensed by SISQE.

**How do you sow the seeds of CPD and career-long learning in your staff?**

They have monthly staff meetings, and pair new teachers with more experienced ones for support, and encourage peer observation. It’s unwritten policy that you observe 2 classes per month.
Interview with 8 teachers

What staff enjoy in their work
Seeing progress in students’ learning. Learning about teaching. This university is different from other universities, as those have lots of unnecessary content, and Akfa has more practical content and is maybe more western in outlook, staff feel. For example teaching students strategies to learn. Also teach them via assessment for learning.

What staff find hard.
Multilevel classes (A1-B2). Priority is to get them to make progress in language. 2nd years are enthusiastic about becoming English teachers, even those with low levels of language. Motivation might depend a bit also on their specialism (e.g. business or law). There may also be a cultural pattern that some students are trying to become teachers because their parents want them to, rather than because they themselves want to.

Their own priorities- in CPD
(8 teachers)
Teachers already do a lot, e.g. some have done CELTA or Delta. One teacher wants to know more about using corpora, another about writing for blogging., another about using authentic materials Many are interested in Project-Based Learning (PBL). One teacher wants to do PhD on this.

Their own professional needs
Teaching grammar vocabulary is tricky-partly because she has to develop own materials. She wants to break away from the more traditional teaching of grammar to focus more on grammar for communication.
Adjusting to new generation who need videos, images and low concentration span.
More on digital learning
Appendix 19
In-country meeting with Nizami

Meeting with Nizami 10.00-11.30 16 February 2023
This was an unstructured interview. The only intended follow-up focus on the previous online interview was to find out more about how the Nizami PRESETT curriculum differs from the National PRESETT Curriculum

Challenges Nizami staff face
A colleague outlined 5:

a) Coursebook coordination and progression
Frequent coursebook changes meant that there was little or no progression between school years. The new Cambridge CBs have largely solved this problem - they’re also popular with students and teachers.

b) How to use the coursebook
National curriculum implies that regions should select their syllabus according to local needs. Not sure if teachers are able to do this. Intercultural education - this is difficult to teach. One colleague is not sure how well the books have been adapted.

c) Students’ entry and exit language levels
Lots of very motivated students – they are learning from them. But, exit results are a bit disappointing in some cases. Some of these graduates become serving English teachers - this has a negative impact on the students they teach.
B2 minimum is entry for University PRESETT course - students need to show a B2 certificate to get in, but some obtain certificates which they have bought. A colleague told an anecdote about meeting 18 students in a group 2 or 3 years back – only 2 could really speak properly and they’re really B2, he felt. The other 16 they’re silent. They got the certificate from local testing centre. Local centres are opened in universities and are open to corruption. Aptis is also open to corruption, a colleague said. Nilufar clarified that the problem with Aptis was more to do with insufficient versions of the test, which meant that candidates they’re able to learn content by heart.

d) International exchanges
Nizami would like to organise more student and teacher exchanges. One colleague supports the idea of exchanges with English-speaking countries. This is PD for them, he says. Finance is an issue here in setting such exchanges up.

e) Nizami’s support for students

They support them too much, in one colleague opinion. They should be stricter.
A colleague added a 6th

f) The quality of teaching in schools

Quality of teaching is a problem—especially in the villages. Schools blame universities, universities blame schools. This produces a never-ending vicious circle, he says.

Nizami’s PRESETT trainers

No real problems according to a colleague: she feels that they have been they’ll-trained and do a good job.
Nizami’s International Relations

The Head of the International Relations Department is a former ESP professional. Has just started in this job. She says that it’s a challenging one, as it’s very bureaucratic to establish international relations now that Nizami is under the umbrella of the Ministry of Preschool and Public Education. This was easier when it was part of Ministry of HE. Nizami is interested in cooperation with Europe, USA, and South Asia. Some caution around cooperation with China.

Curriculum

They add some theoretical subjects taught by lecture to Years 3 and 4., e.g. comparative psychology of teaching English, typology of teaching English, stylistics, translation. Thinking is to widen job opportunities.

They teach more broadly about methodology in first and third year. They have excluded some topics from the national curriculum, e.g. materials development, as they think this falls general methodology. Nizami have reduced the number of hours allocated to writing in the national PRESETT curriculum. Some names of modules around the skills, grammar and vocabulary, are changed but the content is the same. UWL has 240 credits solely dedicated to English teaching methodology. Nizami has 240 credits for a wider range of topics, as it feels that this broadens knowledge and increases students’ job opportunities.

Approval for this change came from Ministry of HE. Presidential decree 290, in operation from 1 January 2023, says that Nizami is independent in financial, academic and organisational matters. This decree was issued for and relates specifically to Nizami.

Nizami’s involvement in INSETT

Nizami teachers used NILE certificate to continue working in university. In general, university teachers have to attend INSETT once a year every 3 years. This is a 144-hour F2F intensive course over a month, usually. Pensioners must also attend, but can attend online.

For public school teachers Avloniy and UWL are responsible. Universities can offer pedagogy courses to HE teachers of all subjects.

I had a short visit to Professional Learning Centre after this meeting.
Appendix 20

In-country meeting with Tashkent City Training and Retraining Institute

Meeting with Tashkent Training and Retraining Institute 15 February 2023 12.00-13.40

Brief discussion with a senior colleague. They didn’t know about British Council work with English teachers.

They said that there are 4 varieties of PD course available in Uzbekistan:
One is studying online (Avloniy), one is studying F2F (Tashkent), one is studying at a private language centre (Turon), 1 is a choice of coming to a course for run by HE institutions (for teachers at academic lyceums)

Private centres collect groups, then teach, then give certificates and then get money from state. Teaching private students IELTS is cheaper.

Discussion with 2 trainers

Pls tell us about your work with teachers of English
One trainer has been working 7 years at this institute. The other has been a trainer from 10 years, but is starting at this institute as of Monday.

The state used to offer 1-month courses every 5 years, but now offer one week courses under new system. 36 hours a day for 6 days. They have not only English lessons, but other subjects e.g. ICT, pedagogics, psychology. About 20 hours are devoted to English teaching. Teachers come from all grades – there is no targeting, for example, of primary or secondary teachers.

Please tell us about the content you teach to English teachers-
They plan at beginning of year, cover how to teach language skills, how to teach grammar, how to integrate ICT,. There is some flexibility in planning, as they also focus on the last training day on how to solve problems teachers have (from a quick and dirty needs analysis given on day 1).

The courses consist of both interactive teaching and a few lectures. Lectures can be based on theories e.g. methods, theories. One trainer gives her lectures in English, and tries to make them interactive.
What do teachers find useful in the courses you teach?
Doing practical tasks, as they can imagine themselves in students’ shoes

What do teachers find difficult on the courses you teach?
Some ideas don’t seem relevant to their students e.g. primary or secondary

What are the English levels of the teachers on your courses?
Mixed, but most are B2

What are your main strengths as a trainer?
One trainer said that recently in Finland- she got useful experience which she can use in her work, She always searches for new ideas and materials. ICT is a strength for her.
The other sees ICT as her strength, too, as well as an ability to give a lot of information about methods.
What areas of your training would you like to improve?

One trainer would like to exchange ideas with international trainers—she’d love to find out more about how they solve problems e.g. how they teach teenagers.

The other had a brief school teaching career. When she teaches teachers, they know today’s students better than her. She feels she needs to know more. About today’s school learners. She’s also like to develop skills in dealing with teacher resistance in the training room.

What kind of professional development would you benefit from as a trainer?

- being observed by another trainer and discussing their session
- Something else.

a) **Further language improvement**: Yes. Academic writing and speaking – they are also researchers and may need to present to foreigners
b) **Further guidance on training methodology**: Yes- e.g. working with mixed level teachers
c) **Access to reading resources about training teachers**: Yes. New methodological books specific to ELT: they only know old ones given to them by British Council
d) **Access to mini-videos about training teachers**: Yes- we can show such videos to our teachers: practical examples can be useful.
e) **Observing another trainer and discussing their session**: Yes. We’d enjoy observing a foreigner, in order to see if we’re on the right way. But observing Uzbeks can be OK, too.
f) **Being observed by another trainer and discussing your session**: Yes, as for e
g) **A checklist of training competences to refer to when planning, doing and reflecting on your training sessions**: Yes, we had one in Kashi. It helps me to work on strengths and weaknesses. I also think it’s useful—it can be a kind of framework we can use.
h) **Co-planning and conducting training sessions with another trainer**: Yes. I did this yesterday with another trainer. It can be useful.
i) Something else? They’d like a foreign person in the room to talk with them, hear experiences from foreign teachers.

Other discussion points

**CPD in the institution**

Criteria exist for CPD in this institute e.g. observing, publishing, organising events. Each teacher has a personal development plan. They review it with a commission, and decide plan for next year independently. Must teach 850 hours pa.

**Work a in a private language centre**
One colleague worked as a methodologist on 1-week courses. Have same courses as at Tashkent Retraining Institute.

Why some teachers study at private rather than state institutes
State provider has contracts with area specialist. State negotiates X teachers per week. Teachers above that quota can choose where to go. Some choose based on location, geography or other criteria. Teacher doesn’t pay up front for a private CPD course, private institute collects money later.

Brief discussion with ca 30 teachers attending first day of a course
Teachers like the new coursebooks, and most have all coursebook components
Appendix 21
Online meeting with RELO

Interview with RELO 27 January 2023 9.00-10.00 am

Nilufar introduced everyone. Jamilya explained the aim of the current consultancy, which is to unpack a desirable CPD journey for state school teachers of English, and the CPD implications arising from this. Below are RELO colleagues’ responses to questions from Rod and Simon:

1. **We understand that you provide training opportunities for serving teachers of English in state schools. Can you tell us more these opportunities are and what your objectives are in providing them?**

One colleague mentioned **English Speaking Nation** - it’s the biggest RELO initiative, involving 15,000 teachers in a cascade project. There are 3 levels in the cascade - trainer trainers, trainers and regional mentors. The project has a 3-year grant from the American Council, ending in October 2023. Trainers from George Mason University (GMU) are also involved in this project.

ESN’s aim is to raise teachers’ English level and to improve their teaching. It also aims to help teachers to move to more to more interactive teaching, away from a more transmissive style popular in Soviet times. The cascade element of the project is in full swing now, and training happens every Friday.

Another colleague explained that participating teachers in ESN need a certain level of English proficiency. Teachers who do not have this level of proficiency are eligible to attend a **one-month F2F summer course** aimed at improving their English.

A third colleague mentioned that the American Council through RTI has supplied 18 million dollars of **Cambridge University Press coursebooks with accompanying training for teachers**, which are now in every school.

RELO also organises **regional ELT conferences**

**RELO sends teachers to the US once for a month’s training.** There is strong competition for these places. Teachers’ willingness to share what they’ve learnt is considered during the application process. In addition teachers who go to the US can share their experience via a worldwide alumni programme, and also apply for further small grants.

2 colleagues both said that there is a considerable amount of American support for ELT in Uzbekistan. Their programmes are growing quickly. RELO are getting ready for next fiscal
year. A challenge for them is to be able to take time out (a colleague used the analogy of a hamster on a wheel) in order to take stock, and to develop further coordination of their work. One issue, for example, is how to link the RELO textbook training with ESN.
2. What are your INSETT and/or CPD priorities and why?

One colleague felt that continuation of ESN should be a priority because it’s wide-reaching and to scale. ESN seems to be having impact and is popular with the Ministry of Preschool and Public Education (MPSE), he said.

The first RELO regional conference in Tashkent was PRESET-orientated. RELO colleagues feel that it would be useful to focus on INSETT.

3. Do you monitor and evaluate the impact of your work?

RELO generally needs to rely on implementing partners for monitoring and evaluation. GMU and the American Council do this for ESN and send reports with qualitative and quantitative findings to RELO. RELO also does informal field visits to keep an eye on progress. A monitoring and evaluation budget is included in new project proposals.

4. We also understand that you have provided textbooks, published by CUP, for use at all levels in English classes in state school. How did you select these textbooks and how have you matched them to the needs of Uzbek learners and to the state school curriculum?

One colleague explained that the textbook project started with USAID and RTI. Pearson and Cambridge put out bids to supply textbooks. Cambridge won the bid, with the approval of MPSE. The content of the books was not greatly changed for Uzbekistan use. 2 regions (Namangan and Sirdarya) were chosen to pilot the books. In initial stages teachers received training on how to use the textbooks. MPSE retrofitted the curriculum to match more closely the content of the textbooks.

5. To what extent is the training that you provide directly linked to (a) the textbooks and (b) the school curriculum?

ESN isn’t designed to fit with textbooks. Training for textbooks is both F2F and by distance. No mention made of any link in training to curriculum (NB: possibly because textbook and curriculum are close?)

RELO colleagues are not familiar with the 8 national teacher competences. Jamila explained that the competences are not common knowledge at the moment, but that she may ask Avloniy to explain these further in the next ERSG meeting on 16 February.

6. How do you recruit your trainers and what qualifications do they need to have?

ESN Coaches- There were 7 initially. All are native speakers and most hold PhDs and are trainers. There are 4 now in Uzbekistan until August, under the auspices of the American
Council. They are placed at regional teacher training centres. They train trainers via TESOL courses. They conduct masterclasses, and visit and work in in schools.

**Trainers:** there are 95 core trainers who are TESOL certified. They work with TESOL International. They have done a TCCT course run by GMU.

**ESN Mentors** 300-400 peer mentors (who can become trainers) – they train teachers.

ESN went for a cascade model of project design because they felt this was the most likely format to enable spread into remote areas. They also hope that a cascade will help a community of practice to evolve.

Coaches and mentors got a 50% salary bonus from becoming trainers. After this, core trainers’ work became voluntary.

Simon asked if it would be possible to send an ESN syllabus. A colleague will look into the feasibility of sending this or sample materials.

7. **Do you see a distinction between INSETT and CPD? If so, how do you see that distinction?**

A colleague mentioned that most of RELO’s efforts involve serving teachers. Teachers are eager to learn, in his opinion. Rod mentioned that we (Simon and Rod) see INSETT as an event and CPD as a lifelong process. One colleague noted this view, but mentioned that state school teachers may not see this distinction.

Rod asked if RELO make a difference between ‘coach’ and ‘trainer’. 2 colleagues explained that ‘coach’ is part of ESN-specific internal language.

8. **How does RELO get its funding?**

A colleague explained that this comes from many different sources. RELO therefore applies for funding to different bodies. A maximum project cycle is 5 years.

9. **You’ve mentioned coordination a couple of time in this interview. What practical steps are you considering to develop coordination of your work in the future?**

2 colleagues are both relatively new to Uzbekistan. They feel it’s important to make coordination steps like this interview. Communication is a key step. They also need to take time to review and understand their own programmes, one colleague feels. Jamila added that the ERSG meetings are another possible way for communication to keep flowing.
Appendix 22
In-country meeting at Avloniy of ERSG

Notes on ERSG Meeting, Avloniy National Research Institute 16.02 23
Jamila Gulyamova opened the meeting on behalf of the British Council and explained the reasons for focussing on CPD for state schoolteachers of English, highlighting the cooperation with NILE and the reasons for Simon’s short consultancy visit to Uzbekistan. She also stressed the need to see CPD as a process and a career-long journey for teachers, which they should own themselves.

She then handed over to colleagues from the host institution Avloniy.

- One colleague informed the meeting that there is a national CPD policy for all teachers, ratified on 23 January 2022.
- CPD for teachers is currently being prioritised and there is a certain amount of government budget support
- Avloniy recognised the uneven provision of INSETT/CPD in the public sector and they have now opened the field to private sector providers. In the last year, three such providers were approved subject to quality checks and all three were found to be satisfactory. As a result, this scheme will be expanded
- There was an interesting point about Philology graduates. Even if they have an excellent command of English, they are not qualified to teach.
- Another colleague made the point that the current investigation (and the current trend) seems to be concentrated on teachers’ perspectives and needs, and that to see a more complete picture it would be useful to take into account other perspectives, e.g. parents, INSETT materials designers, as this would provide a more solid base for analysis and action. He said that from a materials designer perspective, it is extremely tough to design suitable online course materials for teachers of English,. This is because Avloniy are short of human resources, of ELT specialists, and of time. He mentioned that there are numerous teacher profiles to design materials for, and that existing materials also need to be constantly reviewed and updated.
A colleague talked about the status and remuneration of teachers, especially English teachers, which means that those entering the profession do so as a last resort in terms of career choice, and that this has a negative impact on the quality of teaching in schools, as there is no real competition for teaching posts when they become vacant.

He explained that the education system in Uzbekistan is in crisis. He told the meeting about a survey conducted with Japanese support on maths teaching in Grades 8, 9, 10, showing that up to 30% of teachers surveyed would not be able to pass the maths exam they are preparing their learners for. Apparently, ratings in numeracy are very low, with no observable difference between public and private sector schools. He inferred that the same problems exist in the teaching of other school subjects.

There was some support for the idea that the quality of CPD/INSETT needs to be assessed against levels of achievement by learners in schools, but this was challenged on the grounds of complexity in any attempt to establish criteria, because of variables at play, and because it leads to a deficit view of professional development needs.

Simon presented the findings so far of the British Council consultancy on the CPD journey of English teachers. He asked groups to work on a question arising from the consultancy. Below are the questions and the views of the groups working on them:

1. **What do you understand by quality in CPD with regard to state school teachers of English in Uzbekistan?**

   *Colleagues saw quality in terms of the influence on CPD on students results. Simon mentioned a MPSE representative’s view that it might also be useful to think of CPD in terms of immediate and long-lasting impact.*

   *Nilufar also mentioned that it might be useful to think of CPD in stages, e.g. Foundation, Advanced etc, along the lines of the British Council CPD framework for Teachers of English.*

2. **Is it a) feasible and b) desirable for a national CPD system for state school teachers of English in Uzbekistan to include a non-INSETT dimension as well as a course-based dimension? Please explain and exemplify your response.***
A colleague said that a mix of course and non-course based CPD options already exists in Uzbekistan. He referred the meeting to the 17 CPD options listed as part of the MPSE CPD policy.

Another colleague from former LPA said that there are currently Telegram special interest groups of teachers which share information and ideas. This seems to work well, she says.

The feasible and desirable aspect of this question was not directly discussed, but the implication was that a mix is feasible and desirable as it exists already to some extent, and anecdotally, at least, a non-course option is popular with some teachers.

3. What would a feasible system to monitor and evaluate the impact of CPD for state school teachers of English in Uzbekistan consist of? Please outline some of the tools, processes and considerations.

Colleagues in this group explained that there needs to be a culture change for an effective system of monitoring and evaluation to take root. This would involve moving away from the idea of feedback as a form of judging and criticising, and towards the valuing feedback as a tool for learning and as a source of evidence. Colleagues in this group felt that student performance, student feedback, teacher reflection journals, and feedback from observations could all form part of a monitoring and evaluation system.

Simon added that from the point of view of education authorities, they might also want to see some form of ROI on their investment, i.e. they might find it hard to deal with soft data, and might also wish to collect hard data in order to gauge how effective their financial investment has been.

4. How to support novice teachers of English (first 2 years in school)? Please outline your suggestions.
This group felt that support should be within schools. They outlined the value of a positive attitude from school authorities and colleagues to new teachers, and patience with mistakes new teachers may make. They supported the idea of an induction phase in schools. They stressed that professional learning takes time. They supported the idea of mentorship, e.g. monthly school meetings with new teachers. One person said that mentorship had been tried, but didn't work well. A colleague said that it did seem to be working well on ESN, but is time-consuming to set up. The idea of distance mentoring for rural teachers was also mentioned. Anecdotal evidence that this is feasible.
Appendix 23

In-country meeting with MPSE representative

Informal meeting with MPSE representative 15 February 14.30-15.30

Jamila said that this is a critical time, vital that government get things right. Global Partnership for Educational Change (GPE) coordinated by UNICEF, will contribute $40 million to Uzbekistan for educational planning (curriculum, teachers, monitoring and evaluation, assessment, inclusion, financial management) 5 days of meetings were held last week in Tashkent. The Islamic Development bank will contribute an additional $160 million, but this will be for hard resources, e.g. school buildings and equipment.

New deputy minister to be appointed soon.

Avloniy platform a technical solution to a professional problem, our informant says.

Our colleague will soon head a new department of strategic educational planning and international relationships. Another colleague known to British Council will be in his team.

Decision to emulate Finnish education system came from the President, not MPSE. Now the emphasis is on learning from ‘world-leading’ education systems.

Our informant is aware of a number of problems in current CPD system: e.g. he says it’s really INSETT, not CPD. There is a national CPD policy, but it needs revising.

The new approach to CPD will be results-based. Impact of CPD on learner achievement and attitudes. He’s aware of the variables involved here. New focus is that any decision in education must be evidence-based.

Our informant is also aware of the problem that the teacher certificate policy is out of step with PRESETT qualification. One solution is probably for PRESETT exams to be CEFR-aligned.

He sees quality in CPD in 2 dimensions, immediate impact and long-term.

Monitoring and evaluation a big concern- can’t monitor everything.
Fruit salad approach was intended partly to circumvent state providers - an immediate fix rather than a longer-term one.

Novice teachers are not getting support
